 **Nancy Holland has not yet linked a family tree to their AncestryDNA results.**

Your DNA results show that you may be related, and comparing family trees is the best way to find out exactly how. We've got a few tricks up our sleeves to make it easy—automatically showing the surnames, places and people that both family trees share in common.

You can ask this member to link a family tree so that you both can take advantage of all of these features.

 **Invite Nancy**  **to link a family tree**

In the meantime, you can preview any public family tree that this member has posted on Ancestry. But keep in mind, the "Home Person" specified for each public tree may or may not be the same person that your DNA test has matched you with—something to remember as you are investigating. Good luck!
