TB has some great options that ma  
lacks [labels/priorities/html mai  
works really fine.  
I miss the virtual folders of mai  
some incoming attachments feature  
and well i wish TB could use or a  
sync with Apple AddressBook -  
  
but well it is constantly develop  
it will get better. So far I am h  
with some reserves - but it never  
reverted all the messages to "Unr  
Mail often did.
