

Report of Independent Accountants

To the Management of QuoVadis Limited

We have examined the accompanying [assertion](#) made by the management of QuoVadis Limited (QuoVadis) titled **Management's Assertion Regarding the Effectiveness of Its Controls Over the Extended Validation (EV) SSL Certification Authority Services Based on the WebTrust Principles and Criteria for Certification Authorities - Extended Validation SSL v1.6.2** that provides its Certification Authority (CA) services at Bermuda, the Netherlands, Switzerland, the United Kingdom, Belgium and Germany, throughout the period 1 January 2019 to 31 December 2019 for CAs as enumerated in [Appendix A](#), QuoVadis has:

- ▶ Disclosed its EV SSL Certificate practices and procedures in the [QuoVadis Root CA 2 Certification Policy/ Certification Practice Statement, version 2.7](#) dated 20 June 2019, for the QuoVadis Root CA 2, QuoVadis Root CA 2 G3, and the issuing CAs listed in [Appendix A](#) to Assertion of Management in accordance with the [WebTrust Principles and Criteria for Certification Authorities - Extended Validation SSL Version 1.6.2](#).

including its commitment to provide SSL certificates in conformity with the CA/Browser Forum Requirements, and provided such services in accordance with its disclosed practices

- ▶ Maintained effective controls to provide reasonable assurance that:
 - ▶ The integrity of keys and EV SSL certificates it manages was established and protected throughout their life cycles; and
 - ▶ EV SSL Subscriber information was properly collected, authenticated for the registration activities performed by QuoVadis and Registration Authorities,
- ▶ Maintained effective controls to provide reasonable assurance that:
 - ▶ Logical and physical access to CA systems and data is restricted to authorized individuals;
 - ▶ The continuity of key and certificate management operations is maintained; and
 - ▶ CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

based on the *WebTrust Principles and Criteria for Certification Authorities - Extended Validation SSL v1.6.2*.

QuoVadis management is responsible for its assertion and for specifying the aforementioned Criteria. Our responsibility is to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the Chartered Professional Accountants of Canada ("CPA Canada"). Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

QuoVadis Management has disclosed to us the attached comments ([Appendix B](#)) that have been posted publicly in the online forums of the CA/Browser Forum, as well as the online forums of individual internet

browsers that comprise the CA/Browser Forum. We have considered the nature of these comments in determining the nature, timing and extent of our procedures.

The relative effectiveness and significance of specific controls at QuoVadis and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Our examination was not conducted for the purpose of evaluating QuoVadis' cybersecurity risk management program. Accordingly, we do not express an opinion or any other form of assurance on its cybersecurity risk management program.

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. Because of inherent limitations in its internal control, QuoVadis may achieve reasonable, but not absolute assurance that all security events are prevented and, for those controls may provide reasonable, but not absolute assurance that its commitments and system requirements are achieved. Controls may not prevent or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements.

Examples of inherent limitations of internal controls related to security include (a) vulnerabilities in information technology components as a result of design by their manufacturer or developer; (b) breakdown of internal control at a vendor or business partner; and (c) persistent attackers with the resources to use advanced technical means and sophisticated social engineering techniques specifically targeting the entity. Furthermore, the projection of any evaluations of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, that the degree of compliance with such controls may deteriorate, or that changes made to the system or controls, or the failure to make needed changes to the system or controls, may alter the validity of such evaluations.

In our opinion, QuoVadis management's assertion referred to above is fairly stated, in all material respects, based on the aforementioned criteria.

QuoVadis' use of the WebTrust for Certification Authorities - Extended Validation SSL Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

This report does not include any representation as to the quality of QuoVadis' CA services beyond those covered by the [WebTrust Principles and Criteria for Certification Authorities - Extended Validation SSL Version 1.6.2](#) criteria, or the suitability of any of QuoVadis' services for any customer's intended purpose.

**Management's Assertion Regarding the Effectiveness of Its Controls
Over the Extended Validation SSL Certification Authority Services
Based on the WebTrust Principles and Criteria for Certification Authorities -
Extended Validation SSL v1.6.2**

31 March 2020

We, as the management of QuoVadis Limited (QuoVadis), are responsible for operating the Extended Validation (EV) SSL Certification Authority (CA) services at Bermuda, the Netherlands, Switzerland, the United Kingdom, Belgium and Germany, for the Root CA(s) and Subordinate CA (s) in scope for EV SSL Certificates Requirements listed at [Appendix A](#).

Controls have inherent limitations, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective controls can provide only reasonable assurance with respect to QuoVadis' CA operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Management of QuoVadis has assessed the disclosures of its certificate practices and controls over its EV SSL CA services. Based on that assessment, in providing its SSL Certification Authority (CA) services at Bermuda, the Netherlands, Switzerland, the United Kingdom, Belgium and Germany throughout the period from 1 January 2019 through 31 December 2019, QuoVadis has:

- Disclosed its EV SSL Certificate practices and procedures, and its commitment to provide EV SSL Certificates in conformity with the applicable CA/Browser Forum Guidelines for the QuoVadis Root CA 2, QuoVadis Root CA 2 G3, in the [QuoVadis Root CA 2 Certification Policy/ Certification Practice Statement, version 2.7](#) dated 20 June 2019.

including its commitment to provide EV SSL certificates in conformity with the applicable CA/Browser Forum Requirements on the QuoVadis website, and provided such services in accordance with its disclosed practices

- Maintained effective controls to provide reasonable assurance that:
 - The integrity of keys and EV SSL certificates it manages was established and protected throughout their life cycles; and
 - EV SSL Subscriber information was properly collected, authenticated for the registration activities performed by QuoVadis and Registration Authorities,
- Maintained effective controls to provide reasonable assurance that:
 - Logical and physical access to CA systems and data was restricted to authorized individuals;
 - The continuity of key and certificate management operations was maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

for the QuoVadis Root CA 2, QuoVadis Root CA 2 G3, and the issuing CAs listed in [Appendix A](#) in accordance with the [WebTrust Principles and Criteria for Certification Authorities - Extended Validation SSL Version 1.6.2](#).

Very truly yours,

A handwritten signature in black ink, appearing to read "Anthony Nagel". The signature is written in a cursive, flowing style.

Anthony Nagel
