

Firefox with google site:

The source viewer (Ctrl+U) – the Cursor is in signed position:

I press End key. In the normal editors the End move the cursor to end of the actual line.  
In Source Viewer not, it is positioned to End of file.

```
td><td></td></tr></table></td></tr></table></form></center></body></html>
```

When I press Home key, the the cursor positioned to beginning of the document, not the line's first char !

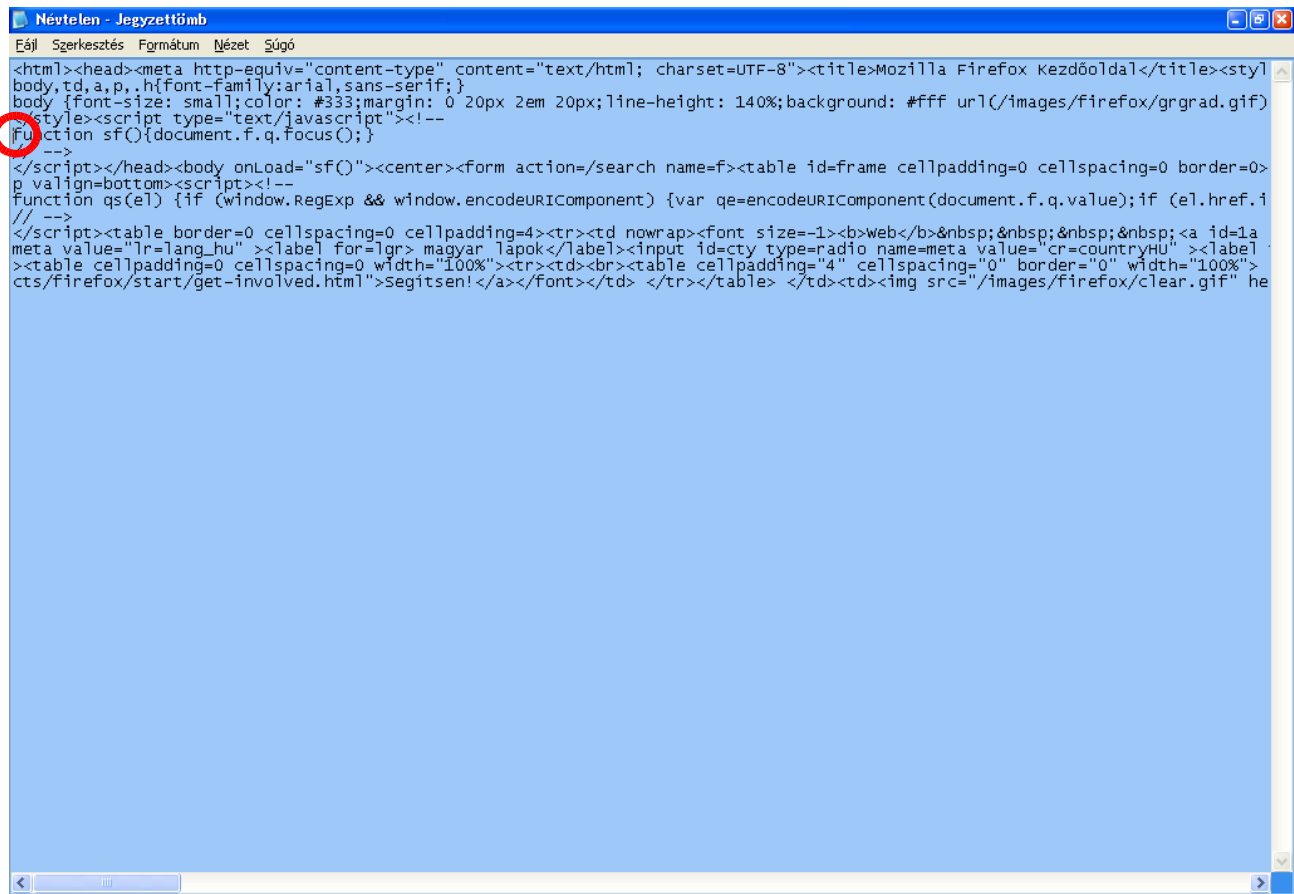

```
<html><head><meta http-equiv="content-type" content="text/html; charset=UTF-8"><title>Mozilla Firefox Kezdőoldal</title><style>
body,td,a,p,.h{font-family:arial,sans-serif;}

```

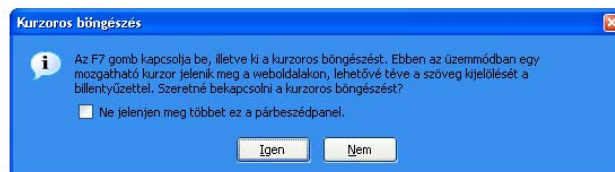

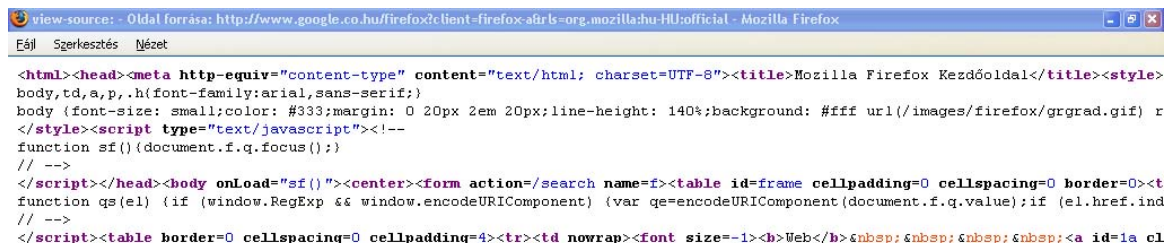

[illegible]A screenshot of a Windows Notepad application titled "Névtelen - Jegyzetfőm". The menu bar includes "Fájl", "Szerkesztés", "Formátum", "Nézet", and "Segítség". The main text area contains HTML source code for Mozilla Firefox's start page. A red circle highlights the closing script tag "</script>" at the end of the first function definition. The code defines two functions: `sf` (focus) and `qs` (querySelector), followed by their respective calls. The document body features a search form and a language selection section with labels like "magyar lapok" and "countryHU".

```
<html><head><meta http-equiv="content-type" content="text/html; charset=UTF-8"><title>Mozilla Firefox kezdőoldal</title><sty

```

I push Home. It is working good:

I enable the another mode with F7.
