performance, database neutral applications with JDBC as we continue our Expert series on improving your database applications. (sponsored)

JVMPI
Connect with your Java bits

Profile your code with JVMPI

In this Javalobby exclusive, Romain Guy explores how you can use the often missed JVMPI (The Java Virtual Machine Profiling Interface) to profile your application. Get control of your bits today!

Ant to the rescue

Using Ant as a Text Substitution Preprocessor

One of the lesser known features of Ant is the ability to replace tokens inside text files. Pete Eakle of JExamples examines how you can use Ant as an advanced preprocessor.

Fixed It!

I Fixed the JDK!

Sun recently announced a new "JDK Collaboration" project on java.net. Andy Tripp decided to test out this new mechanism by submitting a few bug fixes. Here is a writeup of his experience.

Pragmatic Project Automation

Book Review: "Pragmatic Project Automation"

Javalobby's own, Matthew Schmidt, recently read the latest addition to the Pragmatic Starter Kit, Pragmatic Project Automation. Read on for his thoughts on this well-written book about an important topic.
