Page(s): [Prev](#) [1](#) [2](#) [3](#) [Next](#)

Control of intercalation is cell-autonomous in the notochord of *Ciona intestinalis*.

Keys DN , Levine M , [Harland RM](#) , [Wallingford JB](#) .

Dev Biol. June 15, 2002; 246 (2): 329-40.

Convergent extension: the molecular control of polarized cell movement during embryonic developm

[Wallingford JB](#) , Fraser SE , [Harland RM](#) .

Dev Cell. June 1, 2002; 2 (6): 695-706.

Xenopus Dishevelled signaling regulates both neural and mesodermal convergent extension: parallel elongating the body axis.

[Wallingford JB](#) , [Harland RM](#) .

Development. July 1, 2001; 128 (13): 2581-92.

Calcium signaling during convergent extension in *Xenopus*.

[Wallingford JB](#) , Ewald AJ , [Harland RM](#) , Fraser SE .

Curr Biol. May 1, 2001; 11 (9): 652-61.

Cell autonomous regulation of multiple Dishevelled-dependent pathways by mammalian Nkd.

Yan D , [Wallingford JB](#) , Sun TQ , Nelson AM , Sakanaka C , Reinhard C , [Harland RM](#) , Fantl WJ , Williams LT .

Proc Natl Acad Sci U S A. March 27, 2001; 98 (7): 3802-7.

Regulation of convergent extension in *Xenopus* by Wnt5a and Frizzled-8 is independent of the canoni

[pathway](#) [Prev](#) [1](#) [2](#) [3](#) [Next](#)
[Wallingford JB](#) , Vogeli KM , [Harland RM](#) .

Int J Dev Biol. January 1, 2001; 45 (1): 225-7.
