

## Mozilla Applications

These applications are developed by the Mozilla community and their code is hosted on [mozilla.org](http://mozilla.org).

### Camino

Camino® is a Web browser optimized for Mac OS X with a Cocoa user interface, and powerful Gecko layout engine. It's the simple, secure, and fast browser for Mac OS X.

### Firefox

The award-winning Web browser is now faster, more secure, and fully customizable to your online life. With Firefox® 2, we've added powerful new features that make your online experience even better.

### SeaMonkey

SeaMonkey® is the all-in-one application formerly known as the "Mozilla Application Suite", containing a web browser, a mail and newsgroups client, an HTML editor, web development tools, and an IRC chat client in a single software package.

### Sunbird and Lightning

Sunbird® is a cross-platform application that brings Mozilla-style ease-of-use to your calendar. The Lightning extension adds a fully integrated calendar to Mozilla Thunderbird.

### Thunderbird

Thunderbird™ is Mozilla's next generation e-mail client. Thunderbird makes emailing safer, faster and easier than ever before.

## Mozilla-Based Applications

These applications are built by individuals and organizations using Mozilla technologies. If you would like to suggest other applications to feature here, please [let us know](#)

### One Laptop Per Child Web Browser

A simple application that uses the Gecko browser engine to provide a browser for the low-cost laptop that will be made available to children in developing nations around the world.

### TomTom HOME

TomTom HOME gives access to a huge array of services for users of TomTom's navigation solutions, including installing maps, making back-ups and downloading software updates.
