

# **CERTIFICATION PRACTICE STATEMENT (CPS)**

**VERSION : 05**

**DATE : 01.11.2011**

<b>1. INTRODUCTION.....</b>	<b>10</b>
<b>1.1. Overview .....</b>	<b>10</b>
<b>1.2. Document Name and Identification .....</b>	<b>10</b>
<b>1.3. Participants.....</b>	<b>11</b>
1.3.1. Issuing Certification Authorities .....	11
1.3.2. Registration Authorities.....	11
1.3.3. Subscribers .....	12
1.3.4. Relying Parties .....	12
1.3.5. Other Participants.....	12
<b>1.4. Certificate Usage.....</b>	<b>12</b>
1.4.1. Appropriate Certificate Usages .....	12
1.4.2. Prohibited Certificate Usage .....	12
<b>1.5. Policy Administration.....</b>	<b>13</b>
1.5.1. Organization Administering the CPS Document.....	13
1.5.2. Contact Person.....	13
1.5.3. Person Determining CPS Suitability for the Policy.....	13
1.5.4. CPS Approval Procedure .....	13
<b>1.6. Acronyms and Definitions.....</b>	<b>13</b>
1.6.1. Acronyms.....	13
1.6.2. Definitions .....	14
<b>2. PUBLICATION AND REPOSITORY RESPONSIBILITIES.....</b>	<b>18</b>
<b>2.1. Repository .....</b>	<b>18</b>
<b>2.2. Publication of Certificate Information.....</b>	<b>18</b>
<b>2.3. Time or Frequency of Publication .....</b>	<b>18</b>
<b>2.4. Access Control on Repositories.....</b>	<b>18</b>
<b>3. IDENTIFICATION AND AUTHENTICATION .....</b>	<b>19</b>
<b>3.1. Naming.....</b>	<b>19</b>
3.1.1. Type of Names.....	19
3.1.2. Need for Names to be Meaningful .....	19
3.1.3. Anonymity or Pseudonymity of Subscribers .....	19
3.1.4. Interpreting Various Name Forms.....	19
3.1.5. Uniqueness of Names .....	19
3.1.5.1. QEC.....	19
3.1.5.2. SSL and EV SSL (Commercial Entities Resident in Turkey).....	19
3.1.5.3. SSL and EV SSL (Commercial Entities Not Resident in Turkey).....	20
3.1.5.4. OSC.....	20
3.1.6. Recognition, Authentication and Role of Trademarks .....	20

<b>3.2. Initial Identity Validation .....</b>	<b>21</b>
3.2.1. Method to Prove Possession of Private Key .....	21
3.2.2. Authentication of Organization Identity .....	21
3.2.2.1. QEC, SSL or OSC .....	21
3.2.2.2. EV SSL .....	21
3.2.3. Authentication of Individual Identity .....	21
3.2.4. Non-verified Subscriber Information .....	22
3.2.5. Validation of Authority .....	22
3.2.6. Criteria for Interoperation .....	22
<b>3.3. Identification and Authentication for Re-key Requests .....</b>	<b>22</b>
3.3.1. Identification and Authentication for Routine Re-key .....	22
3.3.2. Identification and Authentication for Re-key after Revocation .....	23
<b>3.4. Identification and Authentication for Revocation Request.....</b>	<b>23</b>
<b>4. CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS .....</b>	<b>24</b>
<b>4.1. Certificate Application .....</b>	<b>24</b>
4.1.1. Who Can Submit a Certificate Application? .....	24
4.1.2. Enrollment Process and Responsibilities .....	24
<b>4.2. Certificate Application Processing .....</b>	<b>25</b>
4.2.1. Performing Identification and Authentication Functions .....	25
4.2.2. Approval or Rejection of Certificate Applications .....	25
4.2.3. Time to Process Certificate Applications .....	25
<b>4.3. Certificate Issuance .....</b>	<b>25</b>
4.3.1. CA Actions during Certificate Issuance .....	25
4.3.2. Notification to Subscriber of Issuance of Certificate .....	26
<b>4.4. Certificate Acceptance .....</b>	<b>26</b>
4.4.1. Conduct Constituting Certificate Acceptance .....	26
4.4.2. Publication of the Certificate by the CA .....	26
4.4.3. Notification of Certificate Issuance to Other Entities .....	26
<b>4.5. Key Pair and Certificate Usage .....</b>	<b>26</b>
4.5.1. Subscriber Private Key and Certificate Usage .....	26
4.5.2. Relying Party Public Key and Certificate Usage .....	27
<b>4.6. Certificate Renewal.....</b>	<b>27</b>
4.6.1. Circumstances for Certificate Renewal .....	27
4.6.2. Who May Request Renewal .....	27
4.6.3. Processing Certificate Renewal Requests .....	27
4.6.4. Notification of Renewed Certificate Issuance to Subscriber .....	28
4.6.5. Conduct Constituting Acceptance of a Renewal Certificate .....	28
4.6.6. Publication of the Renewal Certificate by the CA .....	28
4.6.7. Notification of Certificate Issuance by the CA to Other Entities .....	28
<b>4.7. Certificate Re-key .....</b>	<b>28</b>
4.7.1. Circumstances for Certificate Re-key .....	28
4.7.2. Who May Request Certificate Re-keying .....	28
4.7.3. Processing Certificate Re-keying Requests .....	28
4.7.4. Notification of New Certificate Issuance to Subscriber .....	28

4.7.5.	Conduct Constituting Acceptance of a Re-keyed Certificate .....	29
4.7.6.	Publication of the Re-keyed Certificate by the CA .....	29
4.7.7.	Notification of Certificate Issuance by the CA to Other Entities .....	29
<b>4.8.</b>	<b>Certificate Modification .....</b>	<b>29</b>
4.8.1.	Circumstances for Certificate Modification .....	29
4.8.2.	Who May Request Certificate Modification .....	29
4.8.3.	Processing Certificate Modification Requests .....	29
4.8.4.	Notification of New Certificate Issuance to Subscriber .....	29
4.8.5.	Conduct Constituting Acceptance of Modified Certificate .....	29
4.8.6.	Publication of the Modified Certificate by the CA .....	29
4.8.7.	Notification of Certificate Issuance by the CA to Other Entities .....	29
<b>4.9.</b>	<b>Certificate Revocation and Suspension .....</b>	<b>29</b>
4.9.1.	Circumstance for Revocation .....	29
4.9.2.	Who Can Request Revocation .....	30
4.9.3.	Procedure for Revocation Request .....	31
4.9.4.	Revocation Request Grace Period .....	32
4.9.5.	Time within which TURKTRUST Must Process the Revocation Request .....	32
4.9.6.	Revocation Checking Requirements for Relying Parties .....	32
4.9.7.	Certificate Revocation Lists (CRL) Issuance Frequency .....	32
4.9.8.	Maximum Latency for CRLs .....	33
4.9.9.	On-line Revocation/Status Checking Availability (OCSP) .....	33
4.9.10.	On-line Revocation/Status Checking Requirements .....	33
4.9.11.	Other Forms of Revocation Advertisements Available .....	33
4.9.12.	Special Requirements regarding Key Compromise .....	33
4.9.13.	Circumstances for Suspension .....	33
4.9.14.	Who Can Request Suspension .....	33
4.9.15.	Procedure for Certificate Suspension .....	33
4.9.16.	Limits on Suspension Period .....	34
<b>4.10.</b>	<b>Certificate Status Services .....</b>	<b>34</b>

<b>10.APPENDIX – EV SSL INFORMATION VERIFICATION REQUIREMENTS .</b>	<b>71</b>

## **1. INTRODUCTION**

TURKTRUST Information, Communications and Information Security Services Inc. (hereinafter "TURKTRUST") operates in the field of electronic certificate services provision pursuant to the Electronic Signature Law no.5070 (hereinafter "the Law") dated 15 January 2004 which was promulgated in the Official Gazette dated 23 January 2004 issue 25355 and enacted on 23 July 2004, and the Regulation and the Communiqué issued pursuant to the Law by the Information and Communication Technologies Authority.

This documentation named the Certificate Practices Statement (CPS) has been prepared by TURKTRUST, in order to disclose how TURKTRUST performs its operations of certificate services provision, in conformity to the "IETF RFC 3647 Internet X.509 Public Key Infrastructure Certificate Policy and Certification Practices Framework" pursuant to Article 7 of the "Communiqué Regarding Processes and Technical Criteria for Electronic Signature" issued by the Information and Communication Technology Authority under the Law.

As regards to SSL (Secure Socket Layer) Certificate, EV (Extended Validation) SSL Certificate and OSC (Object Signing Certificate) services, TURKTRUST conforms to the current version of the CA/Browser Forum Guidelines for Issuance and Management of Extended Validation Certificates published at <http://www.cabforum.org> and "ETSI TS 102 042 Electronic Signatures Infrastructure (ESI); Policy Requirements for Certification Authorities Issuing Public Key Certificates". In the event of any inconsistency between this document and either of those Guidelines or that ETSI document, they take precedence over this document.

This CPS document lays down how administrative, technical and legal requirements relating to receipt of services related with certificate applications, certificate issuance and management, certificate renewal and certificate revocation procedures are complied with, and specifies the implementation responsibilities of TURKTRUST as the certification authority ("CA") (or, electronic certificate service provider), subscribers and relying parties.

### **1.1. Overview**

This CPS document covers all electronic certificate services provided by TURKTRUST. The practice principles included in CPS cover all of TURKTRUST's practices of customer services, registration authorities and issuing certification authorities.

TURKTRUST certification authority conducts operational activities pursuant to this CPS which is a practice document subordinate to the relevant Certificate Policy (CP) document.

The electronic certificate services of TURKTRUST are executed via procedures, instructions and customer guides that are prepared based on practice principles that exist in the CPS document which are documented in accordance with ISO/IEC 27001 Information Security Management System together with ISO 9001 Quality Management System.

### **1.2. Document Name and Identification**

This CPS document is named as the "TURKTRUST Certification Practice Statement (CPS)". The version number and date of the document is provided herein on the cover page.

TURKTRUST CPS document describes how TURKTRUST conducts its activities relating to certification services in accordance with the certificate policy defined in the CP document.

The CPS document covers practice principles of all certificate policies laid down in CP and with object identifiers (OIDs) given below:

- TURKTRUST QEC Policy (2.16.792.3.0.3.1.1.1) covers qualified electronic certificates which allow the use of secure electronic signatures equivalent to hand written signatures of individuals pursuant to the Law, the Regulation and the Communiqué. Qualified electronic certificates aimed for mobile signature usage are also bound by the same policies.
- TURKTRUST SSL Certificate Policy (2.16.792.3.0.3.1.1.2) covers SSL certificates for servers. SSL Certificates are issued and maintained in conformity with "Normalized Certificate Policy" defined in ETSI TS 102 042.
- TURKTRUST OSC Policy (2.16.792.3.0.3.1.1.4) covers certificates related to object signing operations. OSC is issued and maintained in conformity with "Normalized Certificate Policy" defined in ETSI TS 102 042.
- TURKTRUST EV SSL Policy (2.16.792.3.0.3.1.1.5) covers certificates related to EV SSL certificates. EV SSL certificates are issued and maintained in conformity with "Extended Validity Certificate Policy" defined in ETSI TS 102 042.

This CPS document is disclosed to the public at the website <http://www.turktrust.com.tr>.

### **1.3. Participants**

Participants associated with TURKTRUST certification services whose rights and obligations are described in this practice statement are CA units offering certification services, customers receiving the service and users.

#### **1.3.1. Issuing Certification Authorities**

Issuing certification authorities are the units of CAs responsible for issuing, distributing and publishing certificates. TURKTRUST's issuing certification authorities operate within a hierarchy. The primary issuing certification authority has the TURKTRUST root certificate. Other issuing certification authorities who have sub-root certificates issued by this authority issue end user certificates.

According to an agreement between TURKTRUST and the Union of Turkish Bar Associations (TBB), TBB performs QEC issuance and dissemination activities towards a closed user group comprised of lawyers or judges, prosecutors and all other officials working in Turkish Judiciary according to the TURKTRUST CP and CPS documents and a service agreement, through TBB sub-root that is connected to the TURKTRUST root certificate.

#### **1.3.2. Registration Authorities**

Registration authorities are CA units that offer services to end users directly such as certificate application, renewal and revocation. These units establish customer records; perform identification and authentication processes and direct relevant certificate requests to issuing certification authorities.

Actions associated with registration centers may be performed by registration units within the TURKTRUST center in response to certificate requests arriving from TURKTRUST sales representatives as well as by registration centers affiliated with TURKTRUST. In both cases, certificate requests are relayed to the TURKTRUST's issuing certification authority and the certificates are issued.

**1.3.3. Subscribers**

Subscribers are persons whose issued certificates are based on their verified identity or name.

Verification of identity or name is performed in accordance with the relevant legislation and standards as regards to the type of certificate application. Consequences due to the use of a certificate and liability of the subscriber are qualified by the relevant legislation and subscriber's commitment or agreement.

**1.3.4. Relying Parties**

Relying parties are those who receive documents signed by the private keys based on the certificates issued by TURKTRUST in the scope of TURKTRUST certification services and who rely on the relevant certificates.

TURKTRUST's disclaimer to the relying parties against the use of certificates issued by TURKTRUST is stated in this CPS.

**1.3.5. Other Participants**

All certification services within the scope of TURKTRUST certification services such as certificate issuing, publication of repository and similar services are provided by TURKTRUST.

As regards to its certificate services, in order to guarantee that service shall be reliable and proper, and any private or confidential information shall not be disclosed about processes or subscribers, TURKTRUST signs a contract with a cooperating and service providing participant.

**1.4. Certificate Usage****1.4.1. Appropriate Certificate Usages**

TURKTRUST's root and sub-root certificates shall be used only to sign certificates in line with the purposes of use.

TURKTRUST's QEC shall be used to create secure electronic signatures that have the same legal effect as hand written signatures. The following are all appropriate certificate usages: to sign documents and forms in e-state, e-commerce and similar practices, sign all commercial or official documents such as contracts and agreements in electronic medium, sign e-mail message texts, sign transaction instructions over the web, prove identity by client authentication features in network environments that require identification and authentication.

SSL and EV certificates can be used by the subscribers only for the server name in the certificate and for SSL operations.

OSC can be used by the subscriber or others who develop software under the subscriber's authority.

**1.4.2. Prohibited Certificate Usage**

TURKTRUST QEC cannot be used other than designated conditions in the regulations.

Use of other TURKTRUST certificates beyond the control of the subscriber is disallowed. TURKTRUST certificates cannot be used outside the limits and scope declared in this CPS document.

**1.5. Policy Administration**

TURKTRUST, as the authority that lays down the certificate policy, is responsible for administering and registering the CP document to which this CPS document is subordinate.

**1.5.1. Organization Administering the CPS Document**

All rights and responsibilities associated with this CPS document fall with TURKTRUST.

**1.5.2. Contact Person**

Contact information for this CPS document is as provided below:

TURKTRUST Bilgi İletişim ve Bilişim Güvenliği Hizmetleri A.Ş.

Address : Hollanda Caddesi 696.Sokak No: 7 Yıldız, Çankaya 06550 ANKARA

Telephone : (90-312) 439 10 00

Fax : (90-312) 439 10 01

Call Center : 444 0 263

E-mail : [sertifika@turktrust.com.tr](mailto:sertifika@turktrust.com.tr)

Web : <http://www.turktrust.com.tr>

**1.5.3. Person Determining CPS Suitability for the Policy**

TURKTRUST's senior management determines the suitability of this CPS document with the CP document.

**1.5.4. CPS Approval Procedure**

This CPS document of TURKTRUST has been prepared in compliance with the TURKTRUST CP document. CPS document is approved by the board of management of TURKTRUST. CPS so approved shall be used to regulate and run the CA activities.

The senior management of TURKTRUST is responsible for ensuring that the certification practices established to meet the applicable requirements specified in this CPS are properly implemented.

TURKTRUST conforms to the current version of "Guidelines for the Issuance and Management of Extended Validation Certificates" which is published by CA/Browser Forum at <http://www.cabforum.org> for EV SSL certificates. In case of any inconsistency between the Guidelines and this CPS, the Guidelines shall prevail.

**1.6. Acronyms and Definitions****1.6.1. Acronyms**

**CA** : Certification Authority (Electronic Certification Service Provider)

**CP** : Certification Policy

**CPS** : Certification Practice Statement

**CRL** : Certificate Revocation Policy

**CSR** : Certificate Signing Request

**DN** : Distinguished Name

**DNS** : Domain Name System

**DRC** : Disaster Recovery System

**ETSI** : European Telecommunication Standards Institute

- EV** : Extended Validation
- IETF** : Internet Engineering Task Force
- OCSP** : On-line Certificate Status Protocol
- OID** : Object Identifier
- OSC** : Object Signing Certificate
- PKI** : Public Key Infrastructure
- QEC** : Qualified Electronic Certificate
- RFC** : Request for Comment (documents of request for comment, published by IETF as guides)
- SSL** : Secure Sockets Layer
- TCKN** : Republic of Turkey the Number of Citizenship.
- TSE** : Turkish Standards Institution

### **1.6.2. Definitions**

**Activation:** An alternative and secure method to the printing and sending a PIN envelope to the subscriber. In this method, subscriber is required to use a software by TURKTRUST to "activate" his/her smart card. In order to achieve this, he/she needs to push the button for requesting the "activation code" while the smart card is plugged into the computer. The activation code is sent via SMS which enables him/her to set the PIN value.

**Activation Data:** Data such as passwords, biometric values etc. used to access secure electronic signature creation devices.

**Archive:** Information, documents and electronic data that the CA has to keep.

**Audit:** All works collectively undertaken to examine the compliance of the CA's activities and operations with the relevant legislation and standards and to find out possible errors, deficiencies, corruptions and/or abuses and impose sanctions as provided by the legislation or standards.

**Certificate Financial Liability Insurance:** Insurance that the CA should carry to cover the damages that would arise from its failure to perform its obligations under the Law.

**Certificate Hash:** An output of the certificate obtained via the algorithm.

**Certificate Policy:** A document that depicts general rules regarding the CA's functioning.

**Certificate Renewal:** Issuing a new certificate by using all data fields included a certificate including the public key as they are except for the term. A certificate must be valid to be renewed.

**Certificate Revocation List:** An electronic file that has been generated, signed and published by the CA to disclose the revoked certificates to the public.

**Certificate Signing Request (CSR):** A certificate request generated by the applicant that is signed by his own private key. Generally generated in PKCS#10 format.

**Certification Authority:** A public agency or institution or natural or legal persons in private law authorized to provide electronic certification, time-stamping and electronic signature services.

**Certification Practice Statement:** A document which describes in detail how the issues included in the certificate policy shall be implemented.

**Communiqué:** The Communiqué Regarding Processes and Technical Criteria for Electronic Signature published by the Turkish Information and Communication Technologies Authority.

**Directory:** An electronic storage which includes valid certificates.

**Distinguished Name (DN) Field:** DN consists of either the subscriber's or the issuer's name. DN may comprise of different subfields like CN, O, OU, T, L and SERIALNUMBER, each of which may exist with the relaxant data depending the type of certificate.

**Electronic Certificate:** Electronic record that associates the public key and identity information of the subject in PKI by using the private key of the Certification Authority.

**Electronic Data:** Records generated, transported or stored in electronic, optical or similar means.

**Electronic Signature:** Electronic data affixed to other electronic data or having logical association with electronic data and used to authenticate identification.

**EV SSL Certificate:** The SSL certificate issued and maintained in accordance with the "Extended Validity Certificate Policy" defined in ETSI TS 102 042 standard.

**Hashing Algorithm:** An algorithm which is used to produce a fixed length summary of the electronic data to be signed.

**Institution:** The Information and Communication Technologies Authority.

**Institutional Application:** An application for qualified electronic certificate made by a legal entity on behalf of its employees or customers or members or shareholders.

**Investigation:** All works collectively to determine whether notification served to the institution has met requisite conditions.

**Issuing Certification Authority:** A unit which is included in the CA structure, issues certificates in response to approved certificate requests, executes certificate revocations, generates, operates and publishes certification logs and certificate revocation status logs.

**Key:** Any of the public or private key.

**Law:** Electronic Signature Law no.5070 dated 15 January 2004.

**Mobile Operator:** The operator which is the corporate applicant for the QECs that will be used for mobile signature purposes and enables the mobile signature user QEC owners to make transactions via the GSM infrastructure.

**Mobile Signature:** The secure electronic signature generated by the QEC owner by mobile communication devices using the related network and service infrastructure.

**Mobil Signature Service:** The service that conforms to the Law and the related legislation and is offered for signatures to be used by users in several services via mobile communication devices.

**Object Signing Certificate (OSC):** The certificate that verifies the owner of the source code of software that can be executed on a computer.

**On-line Certificate Status Protocol (OCSP):** Standard protocol that has been created to disclose the validity status of certificates to the public, and allows receipt of certificate status information by on-line methods instantly and without interruption.

**Personal Identification Number (PIN):** Data used by the subscriber to use the private key, protected by PIN in a secured environment.

**Private Key:** Data such as passwords, cryptographic private keys etc. which are unique, owned and used by the subject to generate an electronic signature.

**Public Key:** Cryptographic key disclosed to the others in a public key encryption scheme; named as signature verification data in the Law.

**Public Key Infrastructure (PKI):** The architecture, techniques, practices and procedures that collectively support the implementation and operation of a certificate-based public key cryptographic system and based on cryptographic key pairs having mathematical connection.

**Qualified Electronic Certificate:** An electronic certificate which is compliant with the conditions listed in Article 9 of the Law.

**Registration Authority:** A unit which is included in the CA structure, receives certificate applications and renewal applications, executes identification and authentication processes, approves certificate requests and directs to the issuing certification authority, has subunits that handle customer relations under the CA activities.

**Regulation:** The Regulation on Procedures and Principles for Implementing the Electronic Signature Law published by the Turkish Information and Communication Technologies Authority.

**Re-key:** Issuing a new certificate by using all data fields included a certificate as they are except for the public key and the term.

**Revocation Status Log:** A log which includes revocation data for unexpired certificates and allows determining the exact revocation time and is accessible for third persons fast and securely.

**Root Certificate:** A certificate which associates the CA's institutional identity information with the CA's public key data, has been generated by the issuing certification authority, carries its signature, published by the CA to verify all certificates issued by the CA.

**Secure Electronic Signature:** An electronic signature which has the characteristics listed in Article 4 of the Law, and has the same legal effect as the manual signature for actions other than excluded by the Law.

**Secure Electronic Signature Creation Device:** Signature creation device that has the characteristics listed in Article 6 of the Law.

**Secure Electronic Signature Verification Tool:** Signature verification tool that has the characteristics listed in Article 7 of the Law.

**Signature Creation Device:** Software or hardware tool that uses the private key to create an electronic signature.

**Signature Verification Tool:** Software or hardware tool that uses the public key to verify an electronic signature.

**SIM Card:** The SIM card which hosts various specific applications, works integrated with mobile communication devices, can be used in mobile signature service and subscribers may get from mobile operators.

**SSL (Secure Sockets Layer):** A security protocol developed with the purpose of providing data security in internet communications, verifying the server source that serves the data and optionally verifying the client that receives the data.

**SSL Certificate:** The certificate that verifies the identity of the server which serves the data.

**Subject:** A person or a server name to appear in the CN field of a certificate.

**Subscriber:** The person on whose behalf a subscriber agreement or a letter of commitment setting the terms and conditions of certificate services is signed with the CA.

**Sub-root Certificate:** Certificate that has been created by the issuing certification authority pursuant to the PKI hierarchy of the CA, carries the signature of the CA's root certificate and is used to sign the end user certificates.

**Time Stamp:** An electronic record verified by the Electronic Certification Service Provider to determine the time when an electronic datum has been generated, altered, sent, received and/or recorded.

**Time Stamp Policy:** A document which depicts general rules regarding the time stamping and services

**Time Stamp Practice Statement:** A document which describes in detail how the issues included in the time stamp policy shall be implemented.

## **2. PUBLICATION AND REPOSITORY RESPONSIBILITIES**

TURKTRUST is under obligation to prepare and maintain necessary documents and records concerning the certification services under electronic certification service provision. Some of these documents and records are published to the public to ensure effective provision of certification services to customers and reliability and continuity of certificate usage.

### **2.1. Repository**

TURKTRUST ensures accuracy and up to dateness of all data kept in the repository. TURKTRUST does not employ a trusted third party (person or enterprise) to operate the repository and publish the relevant documents and records.

### **2.2. Publication of Certificate Information**

Information in the TURKTRUST repository regarding the conduct of certification services are kept public except for the institutional procedures and instructions specific to the operation of the CA and confidential commercial information. The CP document which includes basic working principles of the CA, the CPS document which describes how these principles are to be implemented, subscriber and CA commitments or agreements, customer guides regarding certification processes are kept public in the repository. Further, all root and sub-root certificates relating to TURKTRUST's electronic certification and time stamping services are published in directory servers and in information repository open to the public. Updated revocation status records are kept public by both OCSP support and through CRLs.

Certificates issued by TURKTRUST are kept public only if the subscribers consent in writing.

The information referred to in this section is kept publicly at the TURKTRUST's web site <http://www.turktrust.com.tr>.

### **2.3. Time or Frequency of Publication**

As new versions of the documents referred in Section 2.2 become available, they will be published in the repository along with their old versions. Certificate and on-line certificate status inquiry logs are constantly published. CRL is published twice a day within 12 (twelve) hour intervals with a validity period of 24 (twentyfour) hours.

### **2.4. Access Control on Repositories**

The repository is open to the public. TURKTRUST takes all security measures necessary to ensure authenticity of the published information at <http://www.turktrust.com.tr>.

### **3. IDENTIFICATION AND AUTHENTICATION**

TURKTRUST authenticates, based on official sources together with all information in accordance with legal and technical requirements, the identification of first time certificate applicants or renewal requestors or the electronic address information of webs, e-mail and similar servers for which certificates will be issued.

#### **3.1. Naming**

##### **3.1.1. Type of Names**

All certificates issued by TURKTRUST use X.500 distinguished names.

##### **3.1.2. Need for Names to be Meaningful**

Names on the issued certificates are free of ambiguity and have meanings.

Name fields of qualified individual electronic certificates include the names of subscribers as they appear in their identity documents and verified through up-to-date official identity records. Server names authenticated by TURKTRUST are used in the SSL or EV SSL certificates. The names of legal entities or real persons, which in any case are validated according to legal documents, are used in object signing certificates. Name fields of root and sub-root certificates include explicitly the commercial title and relevant root information of TURKTRUST.

##### **3.1.3. Anonymity or Pseudonymity of Subscribers**

TURKTRUST does not issue QECs that include anonymity or pseudonymity.

##### **3.1.4. Interpreting Various Name Forms**

Names on certificates should be interpreted according to the X.500 distinguished name form.

##### **3.1.5. Uniqueness of Names**

Certificates issued by TURKTRUST allow unique identification of subscribers with information contained in DN. Relevant data providing uniqueness in DN is explained in this section. For legislative reasons, DN data may vary according to the type of the certificate.

###### **3.1.5.1. QEC**

The SERIALNUMBER in DN of a TURKTRUST QEC contains TCKN for Turkish citizens and permanent residents of other nationality, and concatenation of country code ((ISO 3166-1 alpha-3) with passport number for other nationality.

###### **3.1.5.2. SSL and EV SSL (Commercial Entities Resident in Turkey)**

In order to distinguish the subscriber uniquely, DN in TURKTRUST SSL and EV SSL certificates are conditioned according to the type of the legal entity as below:

DN field for incorporations resident in Turkey:

- "CN" contains server name registered in DNS under the name of the subscriber (for SSL wildcard certificates, "\*.<DNS name>" is the CN; wildcards are not issued for EV SSL certificates).
- "O" contains the complete name of incorporation as in Turkish Trade Register.
- "SERIALNUMBER" contains the unique trade registration number of the center of the incorporation registered in Turkish Trade Register.

DN field for public entities in Turkey:

- "CN" contains server name registered in DNS under the name of the subscriber (for SSL wildcard certificates, "\*.<DNS name>" is the CN; wildcards are not issued for EV SSL certificates).
- "O" contains the complete name of the entity as in applicable Turkish legislation, possibly in the law of establishment or in any other legislation.
- "SERIALNUMBER" contains the unique tax registration number of the subscriber public entity.

DN field for non-commercial entities (associations, foundations, chambers or unions) in Turkey:

- "CN" contains server name registered in DNS under the name of the subscriber (for SSL wildcard certificates, "\*.<DNS name>" is the CN; wildcards are not issued for EV SSL certificates).
- "O" contains the complete name of entity as in applicable official records.
- "SERIALNUMBER" contains the unique tax registration number of the subscriber non-commercial entity.

DN field for other business entities (ordinary partnership or real persons) in Turkey:

- "CN" contains server name registered in DNS under the name of the subscriber (for SSL wildcard certificates, "\*.<DNS name>" is the CN; wildcards are not issued for EV SSL certificates).
- "O" contains the complete name of entity as in applicable official records such as a recent document showing the accrued tax.
- "SERIALNUMBER" contains the TCKN if applicable, the unique trade registration number in Turkish Trade Register otherwise (for those ordinary partnerships lacking a registry in the Turkish Trade Register shall not be qualified for SSL or EV SSL certificates).

### **3.1.5.3. SSL and EV SSL (Commercial Entities Not Resident in Turkey)**

DN in SSL certificates for entities who are not resident in Turkey are conditioned in as similar manner as in Turkish residents with the exception that any required official record or document is replaced by a local equivalent.

Practices that apply to EV SSL certificates are given in Appendix.

### **3.1.5.4. OSC**

DN in TURKTRUST OSC is formed as below:

- "CN" contains complete name of the subscriber, which is based on the official documentation according to the legislation of residence.
- "SERIALNUMBER" contains a trade registration number or code of the subscriber, where the number or code is based on the official documentation according to the legislation of residence.

### **3.1.6. Recognition, Authentication and Role of Trademarks**

Subscribers are held responsible for their trademarks appear correctly and rightfully in a certificate application. In this regard, subscribers shall be liable against any violation of intellectual property rights (IPR) of others. TURKTRUST is not only irresponsible for checking an issue for IPR in an application but is also detached from any disputes that may arise. Notwithstanding this clause, TURKTRUST holds right to deny an application or suspend or revoke a certificate if a violation of IPR is detected in the certificate application.

**3.2. Initial Identity Validation****3.2.1. Method to Prove Possession of Private Key**

Certificate applicants prove their possession of the private key by submitting a PKCS#10 or equivalent file to TURKTRUST. In cases where the private key is generated by TURKTRUST, this condition does not apply.

**3.2.2. Authentication of Organization Identity**

In cases where a certificate contains the name of a legal entity, the following methods of verification apply.

**3.2.2.1. QEC, SSL or OSC**

The name of legal entity is verified against the official documents of the country of residence of the applicant. Verification herein is executed according to the TURKTRUST procedures.

For SSL and OSC applications, the e-mail address submitted by the authorized person who conducts the application operations on behalf of the subscriber should be verified. This verification is done with a unique user name and activation code sent to the authorized person's e-mail address.

**3.2.2.2. EV SSL**

In verification of an EV SSL application, minimum criteria to be met are as follows:

- The name of legal entity is verified against the official documents of the country of residence of the applicant. Additional to this verification, circular of signature or an equivalent official document in applicable legislation, showing the authority of the applicant to act on behalf of the legal entity is required.
- Operational existence of the legal entity is confirmed via a third party, who is a buyer of a product or service of the legal entity. Where possible, an official document, obtained from a public agency or a legally authorized person to do so, proving the operational existence suffices to verify.
- Address of the legal entity's place of business is verified according to the legal documents of the country of residence. Moreover, telephone numbers, submitted by the applicant, are checked if they are exactly matched with the official records. In case of mismatch, correction is required. Verified telephone is the called for applicant to confirm the application.
- The e-mail address submitted by the authorized person who conducts the application operations on behalf of the subscriber should be verified. This verification is done with a unique user name and activation code sent to the authorized person's e-mail address.
- The following conditions should be met as well:
  - The legal entity is the owner of the DNS registry, or
  - The legal entity is given the exclusive right and authority to use the DNS name.

All conditions that apply for authentication of legal entity for an EV SSL applicant are given in Appendix. Given the conditions here, the process of authentication of legal persons is conducted according to the TURKTRUST procedures.

**3.2.3. Authentication of Individual Identity**

Personal information for persons applying for qualified electronic certificates should be verified in the way stated in the laws and based on official documents. When receiving

the applications for qualified electronic certificates, authentication shall be made face to face at the first application pursuant to the law.

For second and subsequent applications, face to face authentication turns into a must if either of the following is the case:

In cases where

- It passes more than 6 (six) months after the expiry date of the last certificate of the subscriber.
- TCKN or name in DN field in the last certificate of the subscriber is about to change.

In all other cases, telephone, fax messages or e-mail are possible ways of authentication in line with the TURKTRUST procedures.

To verify personal identity in applications for qualified electronic certificates, the originals of one of the official identity documents such as an identity certificate, a driver's license or a passport is submitted and photocopies furnished. TÜRKTRUST confirms that the copies conform to the originals. In cases where professional title needs to be contained in the certificate, submission of the official documentation according to the applicable legislation is a must.

#### **3.2.4. Non-verified Subscriber Information**

The e-mail addresses in QEC applications are accepted upon the declaration of the applicant and contained in the certificate without further verification.

Such other fields as "L", "S", and "O" that may appear in DN field of a certificate are also accepted upon the declaration of the applicant as factual information.

#### **3.2.5. Validation of Authority**

In cases where the name of a legal entity is to be contained in a certificate, the applicant must submit an official document showing the authority of the applicant to act on behalf of the legal entity.

#### **3.2.6. Criteria for Interoperation**

Cross or unilateral certification with another electronic certificate service provider for easing interoperability is not applicable.

### **3.3. Identification and Authentication for Re-key Requests**

#### **3.3.1. Identification and Authentication for Routine Re-key**

The realization of the new key production at the end of the secure usage period of the key pair starts with a new qualified electronic certificate application completed by the user. New certificate application can also be done in electronic media and by signing with the private key attached to the current certificate while the last certificate is still valid. In such a case, if the key pair is generated by the subscriber, the public key is transmitted to the CA along with the certificate request.

If any of the data to be contained in the new certificate is about to change, then such change must be based on the official documentation. Change in other subscriber's data, not to be contained in the certificate, is accepted upon the written or electronic declaration of the applicant.

In re-keying, face to face verification for QEC is not pursued. However, in cases where telephone calls or fax messages lead to indecisiveness, face to face verification is then required.

A re-key request for a valid subscriber of QEC cannot be called before 30 (thirty) days prior to the date of expiry of the certificate. A live request lasts for 30 (thirty) days.

For SSL, EV SSL and OSC renewal and rekey is not performed.

The applicant shall be properly informed if a change in terms and conditions of TURKTRUST services has occurred in the period between the initial identity verification and the time of rekey request of the applicant.

### **3.3.2. Identification and Authentication for Re-key after Revocation**

Except the following reasons of revocation, authentication for re-key after revocation is performed as explained in Section 3.3.1:

- Reasons due to incorrect, fault or incomplete data in the certificate.
- Reasons due to incorrect, fault or incomplete data in documentation proving authority, address or else, or complete invalidation of such documentation.
- Reasons due to fact that operational or legal existence of the subscriber ceases or due to strong suspicion that any such event occurs.

Re-key is not applied for the conditions stated here and certificate application procedures are carried out as if an application for the first time is done.

### **3.4. Identification and Authentication for Revocation Request**

TURKTRUST receives revocation requests in secure ways as described below and performs authentication:

- Subscriber, by using credentials given to him at the application phase, authenticates himself on the web or other TURKTRUST software to suspend or revoke his certificate.
- Subscriber may send revocation request by a fax message. In that case, the certificate is immediately suspended. With the submission of the revocation request in writing or at the end of the period of suspension, the certificate is revoked. In the period of suspension, the suspension status is removed if the subscriber declares in writing that reasons of revocation no longer exist.

## **4. CERTIFICATE LIFE-CYCLE OPERATIONAL REQUIREMENTS**

TURKTRUST generates certificates and manage the certificate life-cycle in accordance with the practices set forth in this CPS. In what follows, different practices per certificate type are described.

### **4.1. Certificate Application**

#### **4.1.1. Who Can Submit a Certificate Application?**

Any real person free of any legal obstacles may apply for QEC or OSC.

For SSL, EV SSL and OSC, including private public legal entities and public entities, any legal entity may apply for a certificate.

Hereby TURKTRUST declares its right to retain and archive all the necessary information that shall be submitted during a certificate application for a period of 20 (twenty) years.

#### **4.1.2. Enrollment Process and Responsibilities**

Enrollment of a certificate application is composed of two main steps as described below:

- Certificate enrollment: Certificate application is verified against the documentation and enrolled completely and free of errors.
- Key generation: Public and private key pairs are generated either by TURKTRUST or the applicant. In case of a key generation by the applicant, the applicant shall send public key to TURKTRUST in electronic form as stated in standards and TURKTRUST procedures. In this case, TURKTRUST verifies this electronic form whether it proves the possession of the private key of the applicant.

Practicing these steps with respect to different types of certificates is described in detail below.

TURKTRUST QEC application can be realized with different methods. For places where TURKTRUST has a local office, applicant may show up at the office or may request on-site application at his own location upon additional payment. For places where no local TURKTRUST office exists, applicant must make face to face authentication at a notary. All TURKTRUST QEC applications can be initiated online at TURKTRUST web site. For applications of the type exprEss-Sign (where the certificate is issued on the same or the next day of request), online application is prerequisite. In a QEC application, the applicant fills in the application form thoroughly and signs. The applicant then sends to TURKTRUST the application form, the Letter of Commitment signed by the subscriber and the attached documents of authentication. In exprEss-Sign applications, the application documents are hand delivered and authentication is performed. In this case, the smart card containing the certificate is also hand delivered.

QEC applications aimed at use of mobile signature are made by the mobile operator on behalf of the subscriber. Mobile operator acts as if its subscribers are part of its corporate, and thus collects all the required information and documentation and submits to TURKTRUST.

**4.2. Certificate Application Processing****4.2.1. Performing Identification and Authentication Functions**

When processing a QEC application, the identification of the applicant shall be authenticated based on official documents pursuant to the laws. At the initial identity verification, the authentication action is made face to face by TÜRKTRUST. This may not be required in subsequent applications.

QEC applications aimed at use of mobile signature are initiated by a pre-registration on channels provided by the mobile operator. Subsequently, subscriber's information and documentation are obtained via registration offices of the mobile operator. In the course of this process, call center of the mobile operator makes phone calls to the subscriber to enable him to complete application procedure.

SSL, EV SSL and OSC applications are carried out according to the principals of Section 3.2 and relevant TURKTRUST procedures.

**4.2.2. Approval or Rejection of Certificate Applications**

Based on the following conditions, a certificate application is approved:

- According to the principals of Section 3.2 and relevant TURKTRUST procedures, required forms and documentation are completed.
- Payment is made.

Occurrence of any of following conditions leads to the rejection of the application:

- According to the principals of Section 3.2 and relevant TURKTRUST procedures, required forms and documentation are not completed.
- Applicant is not responding timely or satisfactorily to the questions raised for verifying the submitted information and documentation.
- In 30 (thirty days) after the enrollment of an SSL, EV SSL or OSC application, CSR is not delivered to TURKTRUST.
- For an SSL, EV SSL or OSC application, there emerges a strong opinion that issuing the certificate may damage TURKTRUST reputation.
- Payment is not made.

**4.2.3. Time to Process Certificate Applications**

QEC applications delivered to TURKTRUST are processed within at most 5 (five) working days. TURKTRUST exprEss-Sign applications are processed on the same day.

SSL, EV SSL or OSC applications delivered to TURKTRUST are processed within at most 5 (five) working days.

Times given in this section is applicable only if certificate applications are accurate and free of errors, and conform with the principles of Section 3.2 and TURKTRUST procedures.

Certificate is issued within at most 1 (one) working day once a certificate application is accepted with regard to the principles stated in Section 4.2.2.

**4.3. Certificate Issuance****4.3.1. CA Actions during Certificate Issuance**

Accepted certificate applications with regard to the principles stated in Section 4.2.2. are processed at TURKTRUST certificate production centers.

**4.3.2. Notification to Subscriber of Issuance of Certificate**

After certificate issuing is completed, the subscriber is informed by e-mail or SMS message.

**4.4. Certificate Acceptance****4.4.1. Conduct Constituting Certificate Acceptance**

Subscribers are under obligation to review and verify the accuracy of the data in all certificate types before installing or using the certificate and to notify TURKTRUST and request revocation of certificates which happen to include data that are inaccurate or inconsistent with the certificate applications.

For QEC, after exprEss-Sign certificate generation, if the e-signature package that is to be delivered through the related registration authority is not taken by the subscriber within 1 (one) month, the certificate is taken into account as not accepted, revoked and no refund is paid. Likewise, after standard QEC generation, if the e-signature package delivered by courier is not taken by the subscriber within 1 (one) month, the certificate is again taken into account as not accepted, revoked and no refund is paid.

**4.4.2. Publication of the Certificate by the CA**

Certificates are published in the web or directory servers upon subscribers' consent in writing.

**4.4.3. Notification of Certificate Issuance to Other Entities**

Not applicable.

**4.5. Key Pair and Certificate Usage****4.5.1. Subscriber Private Key and Certificate Usage**

A subscriber should use his certificate and his private key related to his certificate in accordance with the Law, the Ordinance and other regulatory actions, and stipulations indicated in the CP and CPS documents and the related subscriber's agreement or letters of commitment.

A subscriber is under obligation for protecting the private key related to his certificate against third party access and using the certificate within the scope and authority defined in the legal regulations, CP and CPS documents and the related subscriber's agreements or letters of commitment.

For QEC, the private key activation data is sent to the subscriber by password envelope in those circumstances when activation operation is not used. Subscriber determines the activation data through the software supplied by TURKTRUST in case activation is applied instead of password envelope. QEC owner should:

- Receive in person the secure electronic signature creation device and the relevant activation data, if exists, issued to his name.
- Not allow other people to use his mobile phone and e-mail address for those circumstances when code activation is used.
- Immediately inform the CA for certificate revocation where the private key and/or the signature creation device is lost, disclosed, altered or used by other persons or any circumstance that may lead to such occurrence arises..

**4.5.2. Relying Party Public Key and Certificate Usage**

Relying parties are under obligation to check the validity of certificates on which they rely and use the certificates within the usage purposes stated in the Law, the Ordinance and other regulatory actions, and the CP and CPS documents.

Certificate validity control should be done under secure and appropriate conditions. Relying parties take necessary precautions if there is any doubt about an adverse situation. In this respect, before relying on a certificate, relying parties should check:

- Whether the certificate is used in accordance with its usage purpose, in particular the certificate is not installed on systems such as nuclear facilities, air traffic control, aircraft navigation or weapons control systems where an operational failure may lead to injury, death, or environmental damage.
- Whether the "key usage" field is in accordance with the usage condition of the certificate,
- That the root and sub-root certificates that the certificate is based on are valid, i.e. the root and sub-root certificates neither suspended nor revoked nor expired, and that he recognizes the CA.

Relying parties are under obligation to use secure software and hardware defined by legislation and standards during these operations.

TURKTRUST cannot be held responsible for relying parties not fulfilling the conditions stated here about public key and certificate usage before relying on the certificate.

**4.6. Certificate Renewal**

Certificate renewal is made by issuing a new certificate where the validity period is extended provided that the information in the certificate remains the same including the public key as well.

In order for a certificate to be renewed, the private key of the certificate should not have been compromised.

According to the certificate types, differences in certificate renewal are as follows:

For QEC, renewal application cannot be made based on certificates that are expired. With respect to the cryptographic security of the key pair, the total validity period of a certificate shall not exceed 3 (three) years.

**4.6.1. Circumstances for Certificate Renewal**

A certificate shall be renewed upon the request of the subscriber where certain time remains to the expiry and no changes occur in the information included in the certificate.

An expired certificate may also be renewed provided that the renewal request is done within the validity period of the certificate. This renewal operation is done within at most 30 (thirty) days, otherwise the certificate renewal request is rejected.

**4.6.2. Who May Request Renewal**

The subscriber or a person who is authorized to represent the subscriber may request renewal.

**4.6.3. Processing Certificate Renewal Requests**

Certificate renewal is only performed for QECs. As explained above, in circumstances where the private key is compromised or the cryptographic security of keys is to be lost

along with the renewal period, or the 30 (thirty) day validity period of renewal request expires, the renewal request is rejected.

For QEC, the certificate renewal period is 1 (year) in all cases. Within the validity period, the QEC owner may request renewal via internet by using electronic signature. In this operation, the subscriber signs the renewal request, as well as that demonstrates possession of the private key based on the certificate. Acceptance of the renewal request depends on satisfying all the conditions below:

- A written commitment is taken from the subscriber indicating explicitly that the information given during the previous application is still valid. In case this written commitment is not made available or knowledge of a change in the certificate information is received, then principles of Section 4.7 apply.
- Along with the renewed certificate, the total validity period of the keys shall not exceed 3 (three) years. In case of any indication about compromise of subject's private key, re-key is required.
- Payment is made.

**4.6.4. Notification of Renewed Certificate Issuance to Subscriber**

Principles of Section 4.3.2 apply.

**4.6.5. Conduct Constituting Acceptance of a Renewal Certificate**

Principles of Section 4.4.1 apply.

**4.6.6. Publication of the Renewal Certificate by the CA**

Principles of Section 4.4.2 apply.

**4.6.7. Notification of Certificate Issuance by the CA to Other Entities**

Not applicable.

**4.7. Certificate Re-key**

Except for the special condition mentioned below for QEC, certificate re-key is not applicable.

**4.7.1. Circumstances for Certificate Re-key**

For QEC in the first 3 (three) months of the validity period, a new certificate is issued with re-key without any new documentation of verification if the certificate is erased from the smart card, or the card is lost, or the card malfunctions. The data submitted at the certificate application remains unchanged is prerequisite. In cases where deemed necessary, data remains unchanged shall be checked.

**4.7.2. Who May Request Certificate Re-keying**

A real person may request re-key for a QEC.

**4.7.3. Processing Certificate Re-keying Requests**

In case of any indication or doubt about any change in any information in the QEC, related information and supporting documents are taken again.

**4.7.4. Notification of New Certificate Issuance to Subscriber**

Principles of Section 4.3.2 apply.

**4.7.5. Conduct Constituting Acceptance of a Re-keyed Certificate**

Principles of Section 4.4.1 apply.

**4.7.6. Publication of the Re-keyed Certificate by the CA**

Principles of Section 4.4.2 apply.

**4.7.7. Notification of Certificate Issuance by the CA to Other Entities**

Not applicable.

**4.8. Certificate Modification****4.8.1. Circumstances for Certificate Modification**

Where there occurs any change in the information included in a certificate issued by TÜRKTRUST, such certificate shall be revoked and an application shall be filed for a new certificate with new information.

New certificate application is performed according to the principles stated in Section 4.1.

**4.8.2. Who May Request Certificate Modification**

Principles of Section 4.1.1 apply.

**4.8.3. Processing Certificate Modification Requests**

Principles of Section 3.2 apply.

**4.8.4. Notification of New Certificate Issuance to Subscriber**

Principles of Section 4.3.2 apply.

**4.8.5. Conduct Constituting Acceptance of Modified Certificate**

Principles of Section 4.4.1 apply.

**4.8.6. Publication of the Modified Certificate by the CA**

Principles of Section 4.4.2 apply.

**4.8.7. Notification of Certificate Issuance by the CA to Other Entities**

Not applicable.

**4.9. Certificate Revocation and Suspension****4.9.1. Circumstance for Revocation**

Where a certificate loses its validity within the term of use, it shall be revoked. The following circumstances shall require revocation of a certificate:

- Request by the subscriber or the person authorized to represent,
- It is understood that the information regarding a qualified electronic certificate or an application is false or incorrect; TÜRKTRUST may have the opinion that this requirement may pose plausible evidence. Both the subscriber and the person authorized to represent have this opinion as well.
- For QEC, after exprEss-Sign certificate generation, if the e-signature package that is to be delivered through the related registration authority is not taken by the subscriber within 1 (one) month, or after standard QEC generation, if the e-

signature package delivered by courier is not taken by the subscriber within 1 (one) month,

- A change occurs in the information regarding the subject or subscriber included in a certificate's content,
- It is learned that the subscriber's legal capacity is restricted, or the subscriber is bankrupt or lost in danger of death, or died,
- It is understood that or a notification is received indicating legal existence or business activity of the legal person subscriber has been terminated for SSL and EV SSL certificates,
- The private key has been lost, stolen, disclosed or a risk of access or use by a third party arises,
- The subscriber has lost his/her control over the private key due to the compromise of activation data or similar reasons,
- The software or hardware in which the private key is located has been lost, broken down or compromised,
- It is understood that or a notification is received indicating the certificate has been used in contradiction to the provisions of the CP and CPS guide documents and TURKTRUST Certificate Subscriber's Agreement or Letter of Commitment,
- It is understood or received a notification that a court or an authorized person has received the authorization of use of subscriber's domain name for SSL and EV SSL certificates,
- The GSM subscriptions of QEC subscribers who use mobile signature have been terminated by the GSM operator,
- TURKTRUST, in its sole discretion, detects any irregularity while issuing the certificate on the merits of the application of this CPS document,
- The disappearance of the right to give the certificate based on Law for QECs,
- The disappearance of the right to give the certificate of TURKTRUST for EV SSL certificates,
- Any of the algorithms, or associated parameters, used by TURKTRUST or its subscribers are compromised or become insufficient for its remaining intended usage,
- The private keys of TURKTRUST's sub-root and root certificates are out of suspicion or compromised,
- TURKTRUST suspends provision of certification services.

#### **4.9.2. Who Can Request Revocation**

The following people may request revocation:

- The subscriber himself, or the legal entity authorized to represent the subscriber juristic people if there exists a corporate expression in the certificate for QECs and OSCs,
- Secure electronic signature creation device owner for QECs,
- The legal entity authorized to represent the legal person subscriber for SSL and EV SSL certificates and OSCs,

- Mobile operator for QECs used for mobile signature,
- TURKTRUST's authorized persons (TURKTRUST center and registration authorities) for end user certificates and root and sub-root certificates where security concerns necessitate.

#### **4.9.3. Procedure for Revocation Request**

Revocation requests for QECs shall be received in different ways as follows:

- Via TURKTRUST web site, on 7 days 24 hours basis,
- Via the Interactive Voice Response (IVR) system over the telephone number announced to all customers and published openly, on 7 days 24 hours basis,
- Via a declarative statement written by the subscriber (signed papers sent by fax or by post), within official working hours.

If the subscriber prefers to send the revocation request through internet, he chooses the certificate to be revoked from TURKTRUST web site by logging in with interactive password. Online certificate revocation process is completed by entering the revocation reason after a secondary authentication stage on 7 days 24 hours basis.

If the subscriber prefers to send the revocation request through telephone (IVR), he accesses the IVR system via the related telephone number announced. The subscriber completes the authentication steps by entering his national ID number and the other information requested. Then, the subscriber finishes the suspension or revocation operation for the certificate of which the serial number is indicated, on 7 days 24 hours basis.

Besides, the subscriber may inform TURKTRUST with a hand written certificate revocation request signed manually as an optional choice. When the original copy of the request reaches TURKTRUST authorized personnel, the certificate is revoked by checking the signature on the written request. If the hand written request is delivered by fax, certificate status changed to on hold till the original copy of the request reaches TURKTRUST authorized personnel.

The revocation status after the action shall be notified by e-mail to the subscriber.

For revocation of QECs used for mobile signature, the subscriber notifies revocation request by contacting with mobile operator call center. The authorized person of mobile operator call center enters the revocation request to the system after verifying the user's identity. The revocation request is received via mobile signature service infrastructure by TURKTRUST and revocation process is completed. Revocation status after the completion of process is notified to the subscriber via mobile signature service infrastructure.

If there exists a corporate expression in the certificate, revocation requests for QECs may be obtained from the subscribers as well as from the authorized persons representing the related corporation of companies along the approved revocation applications. After the certificate revocation request is confirmed with a hand written paper coming from the authorized person of the firm, the act of revocation is completed. The revocation status after the action shall be notified by e-mail to the subscriber and organizational authorized personnel.

In circumstances where QECs used for mobile signature shall be revoked by the mobile operator, revocation request is sent to TURKTRUST via mobile signature service infrastructure.

Revocation requests for SSL, EV SSL and OSCs are taken only with a revocation request letter signed by the authorized person to act on behalf of the legal entity. Upon the

verification of revocation request letter, the revocation action is completed. The revocation status after the action is notified by e-mail to the authorized personnel.

Where a security compromise occurs at TURKTRUST, or a notice is received regarding the existing certificates or a fault is detected in TURKTRUST's internal operation, TURKTRUST may initiate certificate revocation. For all certificate revocations originating from TURKTRUST, the outcome shall be notified by e-mail to certificate users. Where necessary, new certificate issuing operations shall be immediately started after the revocation without demanding any fee.

TURKTRUST provides certificate revocation services without interruption 7 days 24 hours through web and telephone (IVR). Revocation requests coming to the TURKTRUST via hand written paper are processed during working hours.

There is neither a procedure for reinstating a revoked certificate nor a tool made available to anyone to reinstate a revoked certificate. Revocation transaction leads to several updates in the database; the immediate update of OCSP service and next update of CRL. A revoked certificate shall continue to be in CRL until the certificate expires.

Where root and sub-root certificates of TURKTRUST are revoked, the status shall be notified in electronic media to all related parties urgently in the shortest possible time. End user certificates that have the signature of the revoked root or sub-root certificates shall also be revoked and users shall be notified by e-mail.

#### **4.9.4. Revocation Request Grace Period**

As long as the technical and commercial opportunities allowed, the certificate revocation request is processed within the shortest period of time.

#### **4.9.5. Time within which TURKTRUST Must Process the Revocation Request**

TURKTRUST immediately resolves all certificate revocation requests transmitted over the web and received through telephone (IVR) 7 days and 24 hours, following the approval of the request and authentication of identity.. Revocation requests transmitted on paper shall be taken into evaluation in the shortest time possible during working hours and necessary actions shall be completed urgently.

The revocation requests for QECs used for mobile signature are sent to TURKTRUST via mobile signature service infrastructure following necessary authentication carried out by the mobile operator that is the corporate applicant itself and revocation requests are immediately resolved.

#### **4.9.6. Revocation Checking Requirements for Relying Parties**

Relying parties are under obligation to verify the relevant certificate before relying on an electronic signature transmitted. To verify a certificate's status, updated CRLs published by TURKTRUST or OCSP, the on-line certificate status inquiry service, should be used. TURKTRUST recommends that relying people should use secure electronic signature verification tools when verifying electronic signatures.

#### **4.9.7. Certificate Revocation Lists (CRL) Issuance Frequency**

TURKTRUST issues a new CRL at least once a day even if there is no change in the status of end user certificates.

The CRL's for TURKTRUST sub-root certificates are issued at least once a year or upon sub-root certificate revocation.

**4.9.8. Maximum Latency for CRLs**

CRLs are issued within at most 10 (ten) minutes after generation.

**4.9.9. On-line Revocation/Status Checking Availability (OCSP)**

TURKTRUST provides uninterrupted on-line certificate status protocol OCSP support. By this OCSP service which is a real time certificate status inquiry and more reliable than CRLs, the status of certificates may be inquire on-line by appropriate software on the customer side. It is possible by this inquiry to obtain information about the status of a certificate at any specific time (valid, suspended, revoked, expired/unknown).

**4.9.10. On-line Revocation/Status Checking Requirements**

It is recommended that relying people when inquiring the status of certificates should prefer OCSP if their technical capabilities allow, or opt for CRL as a second alternative.

**4.9.11. Other Forms of Revocation Advertisements Available**

TURKTRUST does not employ any method other than OCSP and CRL for advertising revocation status.

**4.9.12. Special Requirements regarding Key Compromise**

Where a security compromise occurs at TURKTRUST, end user certificates affected by the incident shall be revoked by TURKTRUST. If the root or sub-root certificates of TURKTRUST need to be revoked, end user certificates that have the signature of such certificates shall also be revoked and subscribers shall be informed by e-mail.

The compromise incident and its effects shall be notified by TURKTRUST to subscribers and relying parties urgently over the public website and where necessary via the press media.

In case of a CA compromise notification, subscribers shall no longer be allowed to use their certificate.

TURKTRUST is responsible for starting to issue new certificates after revocation in cases of all certificate revocations originating from TURKTRUST.

**4.9.13. Circumstances for Suspension**

Where the source of a certificate revocation request could not be verified, TURKTRUST shall suspend, rather than revoke, the certificate in question until the verification is finalized, or upon a request where the end user is unsure whether any circumstance that requires revocation does exist.

**4.9.14. Who Can Request Suspension**

Principles of Section 4.9.2 apply.

**4.9.15. Procedure for Certificate Suspension**

Principles of Section 4.9.3 apply except for the situations defined below:

Where a security compromise occurs at TURKTRUST, or a notice is received regarding the existing certificates, TURKTRUST may suspend relevant certificates until the revocation requirement is validated. A certificate suspension process initiated by TURKTRUST may originate from registration authorities or issuing certification authorities. For all certificate suspensions originating from TURKTRUST, the outcome shall be notified by e-mail to certificate users.

TURKTRUST's root and sub-root certificates shall not be suspended.

**4.9.16. Limits on Suspension Period**

Certificates suspended by TURKTRUST, where the source of a certificate revocation request could not be verified, shall remain suspended until the finalization of verification or the period is over. Certificate, suspended where the subscriber is not sure whether any circumstance that requires revocation exists, shall be revoked when the subscriber reconfirms the request for revocation.

In both cases, the duration of suspension may not exceed 30 (thirty) days. Those still in suspension at the end of this period shall be automatically revoked for security reasons.

Where it is understood while certificates are suspension that there is no circumstance that requires revocation, such certificates may be taken out of suspension and moved into the valid status.

**4.10. Certificate Status Services**

Certificates issued by TURKTRUST shall be published over the web accessible to all subscribers and relying parties provided that subscribers consent in writing. Certificates may be published in a manner accessible directly on the web or via LDAP directory server.

Certificate status inquiries shall be made by two different methods: Certificate Revocation List (CRL) and On-line Certificate Status Protocol (OCSP).

**4.10.1. Operational Characteristics**

TURKTRUST publishes CRL twice a day within 12 (twelve) hour intervals with a validity period of 24 (twentyfour) hours even if there is no change in the status of certificates.

TURKTRUST provides on-line certificate status protocol OCSP support. It is possible by this inquiry to obtain real time information on the status of a certificate any time (valid, suspended, revoked, expired/unknown).

**4.10.2. Service Availability**

TURKTRUST provides CRL and OCSP services under conditions stated in Section 4.10.1 without interruption 7 days 24 hours. TURKTRUST uses backup systems to prevent interruption of OCSP service.

TURKTRUST certificate services given from the Headquarters are always sustained with sufficient level of infrastructure for availability and fail over purposes. In case where a situation beyond the control of TURKTRUST arises that leads to interruption of services, TURKTRUST DRC shall take over the management of certificate services not later than 2 hours of the situation.

**4.10.3. Optional Features**

Not applicable.

**4.11. End of Subscription**

Subscription ends upon the expiry of the term of a certificate or the revocation of a certificate.

**4.12. Key Escrow and Recovery**

In case private key is generated by TURKTRUST itself, TURKTRUST does absolutely not store or re-generate these data. Moreover, TURKTRUST does not hold any data it could re-generate it.

**4.12.1. Key Escrow and Recovery Policy and Practices**

Not applicable.

**4.12.2. Session Key Encapsulation and Recovery Policy and Practices**

Not applicable.

## **5. FACILITY, MANAGEMENT AND OPERATIONAL CONTROLS**

This section of the CPS document covers non-technical security controls that TURKTRUST practices to ensure facility and operation safety when performing certification services.

### **5.1. Physical Controls**

#### **5.1.1. Site Location and Construction**

The TURKTRUST center has been established on secure premises protected against external threats, and high-security areas and various security areas have been designated within the facility.

#### **5.1.2. Physical Access**

Physical access to areas within the TURKTRUST center is constantly controlled.

The perimeter of the facility has been surrounded by protection to prevent uncontrolled access or exit. Security personnel man all entry-exit points to the center. Physical access to secure areas is allowed via the pass card entry control system. Unauthorized persons are prohibited to enter certain areas. High-security areas where basic certificate generation is carried out are always closed to unauthorized access. Entries and exits are logged. As an additional security measure, critical areas and passes are monitored by cameras and daily recording of cameras is kept for security reasons.

#### **5.1.3. Power and Air Conditioning**

Uninterrupted power supplies have been installed to operate all hardware and equipment used at the TURKTRUST center. Systems are supported by uninterrupted power supplies and generators which will immediately be enabled in cases of power interruption. Maintenance for standby power units is regularly performed and their capacities are developed according to requirements.

Particularly in areas where computer hardware is concentrated, adequate and uninterrupted ventilation is provided. Appropriate heating and cooling systems are used and temperature and humidity are kept under control to ensure optimal climatic conditions inside the building.

#### **5.1.4. Water Exposures**

The TURKTRUST center is protected against floods and water exposures due to natural disasters by way of construction measures. The outer surface and ground layer of the building are water-tight. Necessary insulation has been provided to prevent the underground water leaking into the building.

To prevent internal water exposures that may occur due to failures in the water and sewage system, the plumbing has been built appropriately, and the water flow inside the building is taken under control by passing the water channels through main plumbing routes. No water or sewage routes pass through the sections and areas where critical hardware and equipment are located.

Adequate water discharge systems have been installed to dispose of water floods which might occur despite all construction measures without damaging the existing system.

**5.1.5. Fire Prevention and Protection**

An appropriate lightning arrestor system has been installed to prevent fires due to lightning in the TURKTRUST building. To prevent fires that may originate from electrical contacts, high quality appropriate materials have been used for the electrical installation, and electrical fuses of adequate rating have been installed in power systems. Open flames are not used in areas other than the kitchen and certain limited and designated areas; and the rule of no smoking is strictly enforced outside the designated areas.

Smoke and heat detectors have been installed at appropriate locations in the facility to detect probable fires and prevent them from spreading. An embedded fire extinguishing system exists which will activate automatically in case of a fire alarm. This embedded system utilizes different physical and chemical fire extinguishing materials depending on various areas of the building. In addition, fire extinguishing units of appropriate chemical and physical characteristics have been placed at appropriate locations in the building, and the staff has been trained in fire intervention at critical equipment and areas.

**5.1.6. Media Storage**

Backups of all records generated during the activities of TURKTRUST are kept in appropriate storage media. Such backups are stored in a fire and water protected area inside the building where all physical and electromagnetic security precautions are taken, access is secured and provided through only by procedural controls.

**5.1.7. Waste Disposal**

All information and documents relating to basic certification services stored in electronic or paper medium shall be destroyed and disposed of pursuant to relevant procedures if they need not be stored. Cryptographic modules, when should be disposed of, shall either disposed of by physical destruction or reset according to the manufacturer's instructions.

All other waste of the building and TURKTRUST units shall be removed appropriately out of the facility.

**5.1.8. Off-site Backup**

TURKTRUST, to ensure business continuity of certification services, keeps the backups of electronic records in secure safes off-site in order to re-start operation of its systems in case of a disaster that may occur to the existing facilities and the building.

**5.2. Procedural Controls****5.2.1. Trusted Roles**

Trusted roles have been designated to perform all electronic certification business processes to organize the employees of TURKTRUST:

- **Executive Managers:** Managers technically and administratively responsible for running TURKTRUST's CA services.
- **Registration and Customer Services Officers:** Employees responsible for routine certification services such as customer services, document control, processes relating to certificate registration, generation, suspension and revocation.
- **Security Officers:** Employees responsible for administering the implementation of the security policies and practices.

- **System Administrators:** Employees authorized to install, configure and maintain CA systems and also authorized to perform system backup and recovery.
- **System Auditors:** Employees authorized to view archives and audit logs of CA systems.
- **Security Personnel:** Serving as security personnel who are responsible of physical security of the entire TURKTRUST facilities.

#### **5.2.2. Number of Persons Required per Task**

A multi-person controlled system has been established at TURKTRUST to perform critical operations in certification processes. Certificate and CRL generation activities which require use of cryptographic modules can be made by at least two authorized persons present.

In addition to the routine certificate generation steps stated above, all generation, renewal, revocation and backup operations relating to TURKTRUST root and sub-root certificates can be performed by at least two authorized persons present and upon the issuance of approved duty instructions to the relevant authorized persons.

#### **5.2.3. Identification and Authentication for Each Role**

Employees appointed to trusted roles within TURKTRUST shall be first identified to the security system with their designated authorities first. Thus, authentication shall be performed for persons in such roles prior to each critical operation. After the authentication is successfully completed, the operation is allowed, and logged after completion.

#### **5.2.4. Roles Requiring Separation of Duties**

While the certification process is operated, the entirety of sequential operations made on the same certificate shall be performed by different persons at different process points. Duties have been distributed to separate roles and thereby a single person is prevented from performing the entirety or a large part of the work in the process. Each operation is logged so as to include detailed place and time data based on roles.

Specifically, a user that is authorized to assume a Security Officer or Registration and Customer Services Officer role is not authorized to assume a System Auditor role. A user that is authorized to assume a System Administrator role is not authorized to assume a Security Officer or a System Auditor role.

### **5.3. Personnel Controls**

#### **5.3.1. Qualifications, Experience and Clearance Requirements**

Personnel employed at TURKTRUST have appropriate educational levels (high school, baccalaureate degree, master's degree etc.) with qualifications to perform certification processes accurately and reliably, are knowledgeable and trained in their fields, have experience in similar works and have passed security checks.

#### **5.3.2. Background Check Procedures**

TURKTRUST assesses in detail personal backgrounds and references of personnel employed at TURKTRUST, and makes sure that they are technically and administratively suitable. Criminal records certificate shall be required of personnel found to be suitable and security investigation shall be conducted as necessary.

**5.3.3. Training Requirements**

TURKTRUST's personnel undergo training for their responsibilities prior to commencing their works. Employees shall be trained and informed in detail, throughout the training period, on basic certification business processes, customer services, procedures and instructions relating to operation of registration authorities and issuing certification authorities, information security principles and the existing information security management system, and units of software and hardware employed.

Employees working at registration authorities undergo training to the extent required for their duty roles.

**5.3.4. Retraining Frequency and Requirements**

Training provided to employees shall be repeated periodically and as necessary after the initial training prior to commencing work. In light of results of continuous assessment and evaluation studies, personnel's training needs shall be identified and additional training sessions may be organized to increase work efficiency in addition to the periodical training. The topics and scope of training provided shall be continuously updated and refreshed in accordance with the advancing technology and renewed software and hardware units.

**5.3.5. Job Rotation Frequency and Sequence**

TURKTRUST's security personnel and operators shall be subjected to rotation in sub-duties within their field of work. However, no rotations shall be made between fields of work.

**5.3.6. Sanctions for Unauthorized Actions**

Appropriate disciplinary actions shall be imposed pursuant to TURKTRUST's human resources instructions on those TURKTRUST personnel who attempt unauthorized actions. If TURKTRUST or customers of TURKTRUST suffer damages due to such unauthorized action, this damage shall be recovered from the relevant employee.

TURKTRUST further refers those who commit unauthorized actions to judicial authorities to ensure institution of proceedings against them pursuant to the Law, the Regulation and the Communiqué.

**5.3.7. Independent Contractor Requirements**

For operations carried out by way of subcontractors within certification processes, TURKTRUST signs a service contract with the contractor company. This service contract stipulates the security clauses and service principles required by TURKTRUST.

**5.3.8. Documentation Supplied to Personnel**

TURKTRUST's personnel are supplied with the CP and CPS documents, operational and security procedures and instructions relating to certification processes, job descriptions arranged to specific roles of employees, user's guides of software and hardware.

**5.4. Audit Logging Procedures****5.4.1. Types of Events Recorded**

Records relating to all certification services within the certification life cycle are kept by TURKTRUST. Included among such records are certificate application records, all records of customer requests relating to issued, renewed, suspended and revoked, records relating to issued and published certificates and CRLs, operational records of TURKTRUST units having trusted roles, employees' entry and exit records to/from TURKTRUST and their

accesses to system modules, records relating to document monitoring, software and hardware installation, updating and repair records.

When logging operations, the description of an operation, the person who performed the operation, date and time of the operation and result of the action are logged. Exact time of logs are taken from the related servers that are synchronized by the time source used for time-stamping services.

#### **5.4.2. Frequency of Processing Log**

Audit records are logged continuously and, backed up and archived periodically.

#### **5.4.3. Retention Period for Audit Log**

Audit logs for TURKTRUST's operations shall be retained in the system for one year. Upon expiry of this period, they will be archived pursuant to the legislation.

#### **5.4.4. Protection of Audit Log**

Audit logs are protected by physical and electronic security measures, and kept open for access by authorized personnel only. The data integrity of audit logs is ensured by keyed hashing method.

#### **5.4.5. Audit Log Backup Procedures**

Logs are periodically backed up on-site and off-site pursuant to the related procedures.

#### **5.4.6. Audit Collection System (Internal vs. External)**

Audit logs are kept by the CA management software used in carrying out CA business processes.

#### **5.4.7. Notification to Event-Causing Subject**

Where audit logs are created other than routine operations, the event causing subject is warned by the system. Depending on the type and significance of the event, the system may also inform person(s) who may have higher authority level in charge of the subject causing the event.

#### **5.4.8. Vulnerability Assessments**

Audit logs are reported on the system. By analyzing these reports, security gaps in the system and fault points in certification processes shall be identified and measures shall be taken.

### **5.5. Records Archival**

#### **5.5.1. Types of Records Archived**

Pursuant to TURKTRUST's operation, all audit logs stated in Section 5.4, applications, requests and instructions relating to certification processes, all supporting documents obtained on paper and subscriber's agreement (or letter of commitment), all correspondence with customers, all generated certificates and CRLs, all versions of CP and CPS documents, all practice procedures, instructions and forms shall be archived according to the TURKTRUST archival procedures. While a large portion of archives is retained in electronic medium, such materials kept on paper as correspondence; forms, documents, customer files and company information are archived in paper medium.

**5.5.2. Retention Period for Archive**

Archives relating to TURKTRUST's operation regarding QECs shall be retained for at least 20 (twenty) years. Archives regarding SSL's, EV SSL's and OSC's shall also be retained for 20 (twenty) years by TURKTRUST.

**5.5.3. Protection of Archive**

Archives are protected by physical and electronic security measures, and kept open for access by authorized personnel only.

Electronic archives are protected against unauthorized viewing, modification or deletion. Archives on paper are retained in special units to which only authorized personnel can access.

**5.5.4. Archive Backup Procedures**

Backups of electronic archives are retained pursuant to the related procedures. No backup is made for archives on paper.

**5.5.5. Requirements for Time-Stamping of Records**

All electronic archive records are kept by TURKTRUST bundled with time data.

**5.5.6. Archive Collection System**

Archive logs are collected using the TURKTRUST archive management system according to the related procedures.

**5.5.7. Procedures to Obtain and Verify Archive Information**

Controlled access is provided for TURKTRUST's archives upon the request of the Institution or as required by laws.

**5.6. Key Changeover**

Re-keying actions for root and sub-root certificates of the issuing certification authorities under TURKTRUST shall be administered by the TURKTRUST center.

Where the expiry of a root certificate draws closer, the term of an end user certificate to be issued shall be designated not to go beyond the expiry of any of the associated root certificates.

**5.7. Compromise and Disaster Recovery****5.7.1. Incident and Compromise Handling Procedures**

Where events or security compromises occur which would prevent TURKTRUST's operations, intervention is made pursuant to TURKTRUST's disaster management procedures and business continuity plans. Violation events that were recognized and reported by TURKTRUST personnel and intervention to security breaches and troubleshooting methods are clearly mentioned in related documents.

There exists a Certificate Security Problem Notification Form on TURKTRUST web site for TURKTRUST subscribers or third parties to notify security troubles encountered during their certificates' usage. The security breach notification submitted here is evaluated by TURKTRUST and if deemed necessary, TURKTRUST return is made within the shortest period of time.

**5.7.2. Computing Resources, Software and/or Data Are Corrupted**

Where computing resources are damaged, software units or operational data are corrupted, the damaged hardware in the facility shall first be made up and running again. Then, lost records shall be re-created by backup systems and certification services shall be re-activated. If it cannot be made fully operational or some of the records cannot be re-created, all subscribers and relying people that may be affected shall be urgently notified. Where necessary, certain certificates shall be revoked and new certificates shall be issued.

**5.7.3. Entity Private Key Compromise Procedures**

Where security and trustworthiness of TURKTRUST private keys are compromised, the relevant certificates shall be revoked pursuant to TURKTRUST's disaster management procedures and business continuity plans and new private keys shall be generated and enabled pursuant to Section 5.6. New certificates shall be issued to replace the revoked certificates according to procedures and all subscribers and relying people that may be affected shall be urgently notified.

**5.7.4. Business Continuity Capabilities after a Disaster**

TURKTRUST has established a disaster recovery center (DRC) outside the Headquarters. Data stored at TURKTRUST Headquarters are backed up to ensure the business continuity after a disaster. In particular, real time web services such as OCSP and CRL can be made available in a maximum period of 2 hours through DRC once a need arises. Similarly, other certificate services such as enrollment, suspension, revocation etc. can be evoked at DRC to serve without loss of data or business interruption on a 24x7 hours basis. As regards to controls ensuring robustness of this policy, periodic practices are conducted according to the related procedures.

Where events or security compromises occur which would prevent TURKTRUST's operations, intervention is made pursuant to TURKTRUST's disaster management procedures and business continuity plans.

**5.8. Termination of TURKTRUST Operations**

Where TURKTRUST is to terminate its certification services, it shall notify this case to the Institution and announce to the public at least 3 months in advance pursuant to the Law and the Regulation. TURKTRUST shall, pursuant to the termination of operations procedures, turn over to another CA all data, documents and records relating to the existing certificates within one month pursuant to the Law. The Institution may allow an extension of no more than one month if so deems appropriate. If the turn over operations could not be completed within the specified time, TURKTRUST shall revoke relevant certificates and notify all related parties through public notice and direct e-mails to subscribers. In such case, TURKTRUST generates the last CRL log and destroys its own private key and backups.

SSL and EV SSL certificate and OSC subscribers become aware of the termination of the activities via above public announcement and e-mails. The mandatory transfer process for QEC, in principle, is tried to be performed for these certificates. In this context, within the validity period of certificates, the points related to continuity of TURKTRUST obligations and issuances of certificate status information for valid certificates are regulated in the transfer process.

## **6. TECHNICAL SECURITY CONTROLS**

This section of the CPS document describes security controls for the management of private keys and activation data used in business processes relating to TURKTRUST certification services and for the technical infrastructure and certification services operation.

### **6.1. Key Pair Generation and Installation**

#### **6.1.1. Key Pair Generation**

Key pairs for TURKTRUST root and sub-root certificates are generated pursuant to the TURKTRUST procedures for key generation and dissemination for root certificates under the dual control of authorized personnel as described in Section 5.2.2 in a technically and administratively secured environment. Private keys are protected against unauthorized access by physical and technical security measures. Dual control for this process is achieved by password controls and biometric checks. The system is evoked only if each of the two authorized persons logs into the system successively by entering password credentials and biometric data.

In all cases where TURKTRUST handles key generation, key pairs are generated in hardware security modules that have at least EAL 4+ or FIPS 140-2 Level 3 security level. The length of the key pairs and algorithms used are made to be compatible with current legislation and standards. The life of the key pair generated is limited in the same way up-to-date legislation, standards, and the lifetime of the keys with respect to cryptographic security. It is provided to continue to serve without interruption by generating a new key pair and a certificate within a suitable time margin before the validity period ends for TURKTRUST root and sub-root certificate.

TURKTRUST HSMs are kept and operated under physical and electronic protection against all types of intervention. The secure backup of the data in HSMs are taken and stored according to the procedures. Thus when an HSM completes its physical and economic lifetime, the private keys on the HSM are destroyed as described in Section 6.2.10 while keeping the relevant backups in other media to be used in new HSM devices.

Server administrators who apply for server certificates and technical administrators that apply for object signing certificates are responsible for conducting the key generation securely during the applications for server certificates.

#### **6.1.2. Private Key Delivery to Subscriber**

The signature creation and verification data for QEC owners can be produced at TURKTRUST side or at client-side. When the production takes place in TURKTRUST side, it is performed in hardware security modules having the appropriate security level in certificate production center. In this case, the private keys that belong to subscribers are neither kept nor copied at TURKTRUST. Alternatively, an applicant having a secure electronic signature creation device can produce his/her signature creation and verification data in accordance with TURKTRUST certificate application methods.

In QEC applications aiming mobile signatures usage, the key pair is generated in the SIM card of the subscriber and signature verification data is conducted to TURKTRUST for certificate production via mobile signature service infrastructure.

QEC applicants who self-generate their key pairs are responsible for the use of a secure electronic signature creation device.

The applicants who will apply for SSL certificates, EV SSL certificates or object signing certificates are responsible for a secure key generation during application.

For a QEC whose key pair is generated by TURKTRUST, the signature creation data in a secure electronic signature creation device is delivered to its owner by courier in exchange for owner's authentication and signature. A secure electronic signature creation device access password envelope is delivered to its owner by courier in the same fashion. This delivery does not occur when activation takes place instead of password envelope.

Within the scope of "exprEss-Sign" applications, the signature creation and verification of data pairs are already produced in TURKTRUST Headquarters; the signature creation data, by default, are sent to the local offices of TURKTRUST on secure signature creation devices. After having produced, the certificate which is installed to the applicant's secure electronic signature creation device in related office is delivered to its owner (together with password envelope if exists) by a TURKTRUST authorized personnel in exchange for owner's authentication and signature.

In QEC applications aiming mobile signatures usage, the signature creation data is generated in the SIM card of the subscriber. The mobile signature PIN code which provides access to signature creation data for mobile signature usage is determined by the subscriber with the help of SIM card software.

#### **6.1.3. Public Key Delivery to the ECSP**

Where key pair generation takes place on the certificate applicant side, the certificate request has to be signed by the private key. To prevent third parties accessing the request information, the request shall be communicated to TURKTRUST through electronic communications.

In QEC applications for mobile signature usage, the signature creation data which is generated in the SIM card by the owner of SIM card is sent to TURKTRUST over mobile signature service infrastructure for certificate issuance.

#### **6.1.4. TURKTRUST Public Key Delivery to Relying Parties**

TURKTRUST root and sub-root certificates are published at <http://www.turktrust.com.tr> accessible by relying people. The SHA-1 hash for these certificates shall be published in three (3) most circulated newspapers in Turkey. Thus, relying people may use public keys of TURKTRUST.

#### **6.1.5. Key Sizes**

TURKTRUST certificates comply with minimum key lengths specified in the Communiqué.

TURKTRUST's root and sub-root certificates are 2048 bit length when and if RSA keys are used.

For all end user certificates issued by TURKTRUST, 2048 bit RSA key pairs are used.

The information about digest algorithm used in certificates issued by TURKTRUST is given Section 7.1.3.

#### **6.1.6. Key Generation and Quality Checking**

Where key generation takes place at the TURKTRUST center, key pairs are generated in hardware security modules that have appropriate security levels in accordance with the parameters specified in the Communiqué.

Where key generation takes place on the customer side, the customer is responsible for generating the private key in appropriate tools and quality. However in this case, TÜRKTRUST verifies the validity of the CSR file sent by the customer according to key length and other parameters along with the signature on the file.

#### **6.1.7. Key Usage Purposes**

End user keys generated under TURKTRUST certification services shall be used for authentication and electronic signature purposes.

Keys of root and sub-root certificates of TURKTRUST's issuing certification authorities shall be used for signing certificates and CRLs.

Usage purposes of keys are indicated in key usage fields of X.509 v3 certificates.

### **6.2. Private Key Protection and Cryptographic Module Engineering Controls**

#### **6.2.1. Cryptographic Module Standards and Controls**

Key pair generation and certificate and CRL signing operations at TURKTRUST are realized in secure cryptographic hardware modules, i.e. HSMs, conforming to the standards specified in the Communiqué. Before using these HSM devices for the first time after procurement, controls are applied to ensure that these devices are not tampered with during shipment and while stored. Factory packaging and security seals are checked upon receiving the devices and these HSMs are stored and used in physically and technically secured working areas. During the whole life time of HSMs, the devices are kept under continuous control regarding their functionality and any possible incidents are managed according to the incident management procedure.

Where private keys of subscribers of QECs are generated on the TURKTRUST side, they are loaded into smart cards, smart bars and similar secure electronic signature creation devices conforming to the standards specified in the Communiqué. Private keys in the secure electronic signature creation devices are prevented from removal, modification or reproduction. Where a certificate applicant generates the key on his side, he should use a tool that has security levels defined in the Communiqué.

#### **6.2.2. Private Key Multi-Person Control**

Unauthorized access is prohibited to root and sub-root certificates of issuing certification authorities under TURKTRUST. In addition to physical and technical access controls, the use of such private keys is only possible by two separate authorized persons connecting to the relevant module and approval by the system. It is never allowed in the system that one single authorized person alone can use TURKTRUST's private keys.

Private keys of QECs shall be stored only in the password controlled, secure electronic signature creation devices which are under the responsibility of subscribers. Private keys cannot be used unless the password to the tool is known. Password security is ensured by the tool's hardware.

#### **6.2.3. Private Key Escrow**

Private keys of end user certificates issued by TURKTRUST are strictly not escrowed by TURKTRUST, nor are such keys copied.

#### **6.2.4. Private Key Backup**

Private keys of end user certificates issued by TURKTRUST are not backed up, or copied.

In order to ensure continuity of services in case of a disaster or a problem, the private keys of root and sub-root certificates of TURKTRUST's issuing certification centers are kept under physical and technical security controls with respect to TURKTRUST root certificates key production procedure.

The private keys of root and sub-root certificates of TURKTRUST are backed up in secure tokens that are EAL4+ or FIPS 140-2 Level 3 certified. These tokens are stored off-site in secured vaults. In need of a key recovery, these tokens can be used with appropriate credentials and by authorized persons to reload the private keys into the relevant HSMs. These backup and recovery operations for private keys are conducted under the dual control of authorized personnel as described in Section 5.2.2 in a technically and administratively secured environment.

#### **6.2.5. Private Key Archival**

Not applicable.

#### **6.2.6. Private Key Transfer into or from a Cryptographic Module**

Private keys of CA root and sub-root certificates are generated in secure cryptographic hardware modules. These keys cannot in any way be taken out of the module except for transfer into secure modules used for backup purposes. The backup operation is realized in encrypted form on the cryptographic hardware module.

Where key generation takes place on the TURKTRUST side, the key pair is generated in the secure cryptographic hardware modules that have appropriate security levels and transported to the secure electronic signature creation devices of subscribers of QECs.

Where key generation takes place on the customer side, it is the customer's responsibility to ensure control of private key and its security during a possible transfer.

#### **6.2.7. Private Key Storage on Cryptographic Module**

Private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities are stored on cryptographic hardware modules where they are generated and which have security levels specified in the Communiqué.

Where private keys of subscribers of QECs are generated on the TURKTRUST side, they are stored on cryptographic hardware modules where they are generated and which have security levels specified in the Communiqué. Private keys in the secure electronic signature creation devices are prevented from removal, modification or reproduction.

Where a certificate applicant generates the key on his side, he should use a tool that has security levels defined in the Communiqué.

#### **6.2.8. Method of Activating Private Key**

Private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities shall be activated in the presence of two authorized on the hardware security module in which they are.

Private keys of QECs shall be activated by entering password to the secure electronic signature creation device.

Private keys of SSL, EV SSL and OSCs shall be activated on the software or hardware belonging to the subscriber.

The subscriber is responsible for the unauthorized use of the activation data by other persons, taking necessary measures to prevent data theft or loss.

**6.2.9. Method of Deactivating Private Key**

Private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities shall be activated only for a certain length of time and a specific operation on the hardware security module in which they are, and deactivated upon completion or time-out of the operation. To use the private keys again, the authorized persons should be identified to the system and the private keys should be activated again.

Private keys of QECs shall be activated for a certain length of time upon password entry to the secure electronic signature creation device, and deactivated at operation time-out. Also, the subscriber may, at his will, deactivate the private key. To use the private key again, the subscriber should enter the password to the secure electronic signature creation device.

Private keys of SSL, EV SSL and OSCs shall be deactivated on the software or hardware belonging to the subscriber.

**6.2.10. Method of Destroying Private Key**

All copies of the private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities that reside on active HSM devices are destroyed upon expiry of the certificate only by authorized persons using the zeroization function of related HSMs and the operations performed are logged according to procedures. For this operation, at least two persons should be present.

Private keys associated with QECs and stored in the secure electronic signature creation devices could be destroyed by deletion of the key from the device or destroying the device itself.

There is no stipulation for destroying private keys of end user SSL, EV SSL certificates and OSCs upon certificate revocation or expiry. The subscriber may destroy the private key if he so wishes.

**6.2.11. Cryptographic Module Rating**

Private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities are generated in cryptographic hardware modules that have security levels specified in the Communiqué.

Private keys of QECs are stored in secure electronic signature creation devices that have security levels specified in the Communiqué.

**6.3. Other Aspects of Key Pair Management****6.3.1. Public Key Archival**

Public keys associated with root and sub-root certificates of TURKTRUST's issuing certification authorities are stored for 20 (twenty) years by the CA.

**6.3.2. Certificate Operational Periods and Key Pair Usage Periods**

The term for QECs, SSL certificates and OSCs issued by TURKTRUST is 1 (one), 2 (two) or 3 (three) year(s). For the sake of cryptographic security of the key pairs, the total validity period with the same content for QECs cannot exceed 3 years.

The term for EV SSL certificates issued by TURKTRUST is 1 (one), 2 (two) year(s) or at most 27 (twenty seven) months.

The term for root and sub-root certificates of TURKTRUST's issuing certification authorities cannot exceed 10 (ten) years. At the end of this term, re-keying shall absolutely take place when certificates are renewed.

#### **6.4. Activation Data**

##### **6.4.1. Activation Data Generation and Installation**

The production of the keys belonging to TURKTRUST sub-root and root certificates and the creation of the access codes to them is done according to the ceremony described in the Root Certification Procedure. The private keys of root and sub-root certificates of TURKTRUST's cryptographic modules in which such keys are located can be accessed by presence of two authorized persons who possess the activation data as described in Section 6.2.2.

Access codes consist of randomly determined for at least 8 (eight) alpha-numeric value. Biometric verification is also required besides these passwords to access the system. The creation, installation and usage of access codes, are logged with keyed hash mechanism and kept in a dedicated database.

The activation data for the signature creation data of QEC owners are delivered to them via password envelope or activation method. 6 (six) character length random access password is generated in password envelope method.

In activation method, similar to the previous method, at least 6 (six) character length random access password is generated. Depending on the certificate and the card to which the certificate was written, an alphanumeric 6 (six) characters length activation code is also generated and stored in the database (after encrypted) during the same transaction.

The method for generation of the activation code is designed to recreate the access code when combined with the certificate and the smart card. Thus, a subscriber, to whom his/her card is delivered, request an activation code from the TURKTRUST software. The owner can determine the access password by using the activation code having sent to his/her mobile phone via SMS. The mobile phone number is submitted during application.

SSL, EV SSL certificate and OSC subscribers are responsible for creation and protection of the access passwords belonging to their certificate keys.

TURKTRUST strongly recommends the security items listed below to all subscribers while creating their access passwords:

- At least 6(six) character long,
- A character in it should not be repeated,
- At least 1 (one) character and 1 (one) number exist,
- Not to use birth date, name and can be easily guessed data

TURKTRUST recommends to change the activation data at least once in 6 (six) months and determine a new activation data other than the predecessor to its subscribers.

##### **6.4.2. Activation Data Protection**

The authorized TURKTRUST personnel using the private keys belonging to root and sub-root certificates change access codes at least in 6 (six) months period. Authorized people are responsible for protection and confidentiality of the access codes.

TURKTRUST subscribers are responsible for protection and confidentiality of the activation data belonging to their private keys in accordance with these recommendations indicated above.

#### **6.4.3. Other Aspects of Activation Data**

The delivery of TURKTRUST access passwords is only valid for QEC owners. If this delivery is done via password envelope, a secure courier service will be contractual. The secure courier delivery is completed with the handwritten signature of the subscriber. The certificate card and the envelope that contains the activation code are sent on two consecutive days. Hence, a measure is taken for not having both of them at the same time in case of an access by a third party.

In activation method, the activation code is not transported in any electronic or physical way. The activation code is kept in encrypted form in TURKTRUST database, and any user's access is turned off. In order to decrypt the code and access it from the database, the subscriber should connect the card to the PC and request activation through the TURKTRUST software. Even in this case, the subscriber's PC and TURKTRUST server communicate in encrypted manner. Thus, security of the activation data of the card which is delivered to its owner is not less than any time during the life cycle of the card.

### **6.5. Computer Security Controls**

#### **6.5.1. Specific Computer Security Technical Requirements**

Under the certification business processes carried out by TURKTRUST, the following security controls are implemented to access and operate all information systems:

- Computer systems utilize secure and certified hardware and software products.
- Computer systems are protected against unauthorized access and security gaps. Controls for penetration and intrusion have been established and such controls have been validated by relevant tests and ensured for continuity.
- Computer systems are protected against viruses, malicious and unauthorized software.
- Computer systems are protected against network security hacking.
- Access rights to computer systems and authentication are ensured by passwords supplied to TURKTRUST's personnel.
- Access rights to computers have been limited to the roles assigned to authorized persons.
- In particular, all transactions peculiar to CA services such as certificate enrollment, generation, suspension, revocation are saved in the database. In order to prevent unauthorized access and unintended modification of the database, several physical and electronic measures are taken at different access levels of authentication. Logical consistency at the database level adds another measure of security to preclude modification of a revocation status which would otherwise be assumed to be irreversible.
- Data communications are handled securely between the units that make up the computer system.
- Since operational records are constantly logged, problems that may arise in the computer systems can be identified in short time and accurately.

- TURKTRUST uses trustworthy systems and products that are protected against modifications. In this regard, recommendations of CWA 14167-1 standard are strictly followed under continuous auditing of Information and Communication Technologies Authority of Turkey.

**6.5.2. Computer Security Rating**

Not applicable.

**6.6. Life Cycle Technical Controls****6.6.1. System Development Controls**

System development controls are applied for development facility security (through facility security clearance certifications), development environment security, development personnel security, configuration management security during product maintenance and software development methodology (through ISO/IEC 27001 and ISO 9001 certifications). Details about these aspects and change management are documented in Information Systems Acquisition, Development and Maintenance Procedure.

**6.6.2. Security Management Controls**

Appropriate tools are used and security procedures are implemented to ensure security of the operational systems and the computer network used in TURKTRUST.

TURKTRUST holds the ISO/IEC 27001 Information Security Management Systems Standard certificate.

**6.6.3. Life Cycle Security Controls**

Not applicable.

**6.7. Network Security Controls**

Private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities are used in environments where network security is ensured. Such systems are protected physically and technically.

All other systems within TURKTRUST are also protected by appropriate network security methods. All network elements such as firewalls, switches and routers have been installed correctly and securely in accordance with the network configuration procedures. Security controls of such network elements are constantly made pursuant to the procedures.

Registration authorities under TURKTRUST communicate records relating to their certification operations to TURKTRUST over the Internet by secure network connection.

**6.8. Time-Stamping**

During the execution of certification services of TURKTRUST, electronic records for certain operations contain time information synchronized by the time source used for time-stamping services. Data integrity is preserved by keyed hash method and time-stamping is used at the archiving phase.

## 7. CERTIFICATE, CERTIFICATE REVOCATION LIST (CRL) AND OCSP PROFILES

This section of the CPS document describes the profiles of certificates issued and CRLs generated, and the structure of OCSP service by TURKTRUST.

### 7.1. Certificate Profile

TURKTRUST certificate profiles are based on the documents "ISO/IEC 9594-8/ ITU-T Recommendation X.509: "Information Technology- Open Systems Interconnection- The Directory: Public –key and attribute certificate frameworks" and "IETF RFC 5280: "Internet X.509 Public Key Infrastructure Certificate and Certificate Revocation List (CRL) Profile". Besides, TURKTRUST QEC profile also follows the document "Nitelikli Elektronik Sertifika, SİL ve OCSP İstek/Cevap Mesajları Profilleri – Nisan 2007" ("Qualified Electronic Certificate, CRL and OCSP Request/Response Message Profiles – April 2007") which was published by the Information and Communication Technologies Authority of Turkey.

TURKTRUST certificates basically contain the following fields:

Field Name	Description
Serial Number	Unique number within issuer scope
Signature Algorithm	Object identifier (refer to Section 7.1.3)
Issuer	Refer to Section 7.1.4
Start of Validity	UTC time encoded in accordance with RFC 5280
End of Validity	UTC time encoded in accordance with RFC 5280
Subject	Refer to Section 7.1.4
Public Key	Key value encoded in accordance with RFC 5280
Signature	Signature value encoded in accordance with RFC 5280

"Certificate Policy" field in TURKTRUST QEC contains "Bu sertifika 5070 sayılı Elektronik İmza Kanununa göre nitelikli elektronik sertifikadır. (This certificate is a qualified electronic certificate according to the Electronic Signature Law no. 5070)" mandatory statement as required by the Law.

#### 7.1.1. Version Numbers

Root and sub-root certificates and end user certificates issued by TURKTRUST support the X.509 v3 version pursuant to the "IETF RFC 5280 Internet X.509 Public Key Infrastructure Certificate and Certificate Revocation List (CRL) Profile" document.

#### 7.1.2. Certificate Extensions

QECs contain the qualified electronic certificate extensions defined under the "IETF RFC 3039 Internet X.509 Public Key Infrastructure Qualified Certificates Profile" and "Nitelikli Elektronik Sertifika, SİL ve OCSP İstek/Cevap Mesajları Profilleri – Nisan 2007" ("Qualified Electronic Certificate, CRL, and OCSP Request/Response Message Profiles – April 2007") documents.

QECs issued by TURKTRUST contain the following extensions:

Extension Name	Critical	Description
Authority Key Identifier	No	Public key hash value of the issuer TURKTRUST certificate.
Subject Key Identifier	No	Public key hash value of the certificate.
Key Usage	Yes	Digital signature and non-repudiation fields are set.
Certificate Policies	No	<ul style="list-style-type: none"> <li>Policy Identifier OID: 2.16.792.3.0.3.1.1.1</li> <li>Policy Qualifier Info – CPS: <a href="http://www.turktrust.com.tr/sue">http://www.turktrust.com.tr/sue</a></li> <li>Policy Qualifier Info – User Notice: The phrase “Bu sertifika 5070 sayılı Elektronik İmza Kanununa göre nitelikli elektronik sertifikadır.” stating that the certificate is a qualified electronic certificate in accordance with the Electronic Signature Law, no 5070.</li> </ul>
Basic Constraints	No	CA marked “false”.
Subject Alternative Name	No	Optional. May contain the e-mail address of the subject.
Qualified Certificate Statements	No	<ul style="list-style-type: none"> <li>OID for ETSI TS 101 862 accordance (0.4.0.1862.1.1)</li> <li>OID for Turkish Information Technologies and Telecommunications Authority accordance (2.16.792.1.61.0.1.5070.1.1)</li> <li>Optional monetary limit.</li> </ul>
CRL Distribution Points	No	HTTP URL of the CRL signed by the issuer certificate.
Authority Information Access	No	Addresses of the issuer certificate and the TURKTRUST OCSP service.

SSL certificates issued by TURKTRUST contain the following extensions:

Extension Name	Critical	Description
Authority Key Identifier	No	Public key hash value of the issuer TURKTRUST certificate.
Subject Key Identifier	No	Public key hash value of the certificate.
Key Usage	Yes	Signing, key encipherment, data encipherment, and key agreement fields are set.
Certificate Policies	No	<ul style="list-style-type: none"><li>• Policy Identifier OID: 2.16.792.3.0.3.1.1.2</li><li>• Policy Qualifier Info – CPS: <a href="http://www.turktrust.com.tr/sue">http://www.turktrust.com.tr/sue</a></li></ul>
Basic Constraints	No	CA marked “false”.
Subject Alternative Name	No	Optional. May contain alternative domain names of the subject.
CRL Distribution Points	No	HTTP URL of the CRL signed by the issuer certificate.
Authority Information Access	No	Addresses of the issuer certificate and the TURKTRUST OCSP service.
Extended Key Usage	No	Server authentication and client authentication values are set.

OSCs issued by TURKTRUST contain the following extensions:

Extension Name	Critical	Description
Authority Key Identifier	No	Public key hash value of the issuer TURKTRUST certificate.
Subject Key Identifier	No	Public key hash value of the certificate.
Key Usage	Yes	Signing and non-repudiation fields are set.

Certificate Policies	No	<ul style="list-style-type: none"> <li>Policy Identifier OID: 2.16.792.3.0.3.1.1.4</li> <li>Policy Qualifier Info – CPS: <a href="http://www.turktrust.com.tr/sue">http://www.turktrust.com.tr/sue</a></li> </ul>
Basic Constraints	No	CA marked “false”.
CRL Distribution Points	No	HTTP URL of the CRL signed by the issuer certificate.
Authority Information Access	No	Addresses of the issuer certificate and the TURKTRUST OCSP service.
Extended Key Usage	No	Code signing and commercial software publishing values are set.

EV SSL certificates issued by TURKTRUST contain the following extensions:

Extension Name	Critical	Description
Authority Key Identifier	No	Public key hash value of the issuer TURKTRUST certificate.
Subject Key Identifier	No	Public key hash value of the certificate.
Key Usage	Yes	Signing, key encipherment, data encipherment, and key agreement fields are set.
Certificate Policies	No	<ul style="list-style-type: none"> <li>Policy Identifier OID: 2.16.792.3.0.3.1.1.5</li> <li>Policy Qualifier Info – CPS: <a href="http://www.turktrust.com.tr/sue">http://www.turktrust.com.tr/sue</a></li> </ul>
Basic Constraints	No	CA marked “false”.
Subject Alternative Name	No	Optional. May contain alternative domain names of the subject.
CRL Distribution Points	No	HTTP URL of the CRL signed by the issuer certificate.
Authority Information Access	No	Addresses of the issuer certificate and the

		TURKTRUST OCSP service.
Extended Key Usage	No	Server authentication and client authentication values are set.

### **7.1.3. Algorithm Object Identifiers**

For signing all the certificates issued by TURKTRUST, one of the algorithms below is used:

Algorithm Name	OID
SHA-1 with RSA	1.2.840.113549.1.1.5
SHA-256 with RSA	1.2.840.113549.1.1.11
SHA-384 with RSA	1.2.840.113549.1.1.12
SHA-512 with RSA	1.2.840.113549.1.1.13

SHA-1 usage will be abandoned after it becomes certain that at least one of the other algorithms is supported in all contemporary electronic signature applications.

### **7.1.4. TURKTRUST Name Forms**

Certificates issued by TURKTRUST use X.500 distinguished names.

The full name of TURKTRUST is written in "O" (organization) fields as "TURKTRUST Bilgi İletişim ve Bilişim Güvenliği Hizmetleri A.Ş.". Besides, in QECs, the phrase "Dayanak: T.C. 5070 sayılı Elektronik İmza Kanunu" is written in "OU" (organizational unit) fields, stating that the certificate is in accordance with the Electronic Signature Law no. 5070.

QECs issued by TURKTRUST contain the following "Subject" fields:

"SERIAL NUMBER"	Unique national ID for Turkish citizens, country code and passport number for foreigners.
"CN"	The exact full name of the subject person.
"C"	"TR"
"L"	Optional. Subject's city of residence.
"O"	Optional. The organization where the subject works.
"OU"	Optional. The organizational unit where the subject works.
"T"	Optional. The occupational title of the subject.

SSL certificates issued by TURKTRUST contain the following "Subject" fields:

"SERIAL NUMBER"	Values explained in Sections 3.1.5.2 and 3.1.5.3 of this document.
"CN"	Values explained in Sections 3.1.5.2 and 3.1.5.3 of this document.
"C"	Country code of the subject.
"S"	Optional. State or province of the subject.
"L"	Optional. Subject's city of residence.
"O"	Values explained in Sections 3.1.5.2 and 3.1.5.3 of this document.
"OU"	Optional. Organizational unit of the subject.

OSCs issued by TURKTRUST contain the following "Subject" fields:

"SERIAL NUMBER"	The trade registry code or number of the subject organization, which is certifiable in accordance with the legislation in the country of the subject.
"CN"	The exact full name of the subject, which is certifiable in accordance with the legislation in the country of the subject.
"C"	"TR"
"S"	Optional. State or province of the subject.
"L"	Optional. Subject's city of residence.
"O"	Optional. The exact full name of the subject organization, which is certifiable in accordance with the legislation in the country of the subject.
"OU"	Optional. Organizational unit of the subject.

EV SSL certificates issued by TURKTRUST contain the following "Subject" fields:

"CN"	Values explained in Sections 3.1.5.2 and 3.1.5.3 of this document.
"O"	Values explained in Sections 3.1.5.2 and 3.1.5.3 of this document.
"OU"	Optional. Organizational unit of the subject.
"BUSINESS CATEGORY"	One of the values "Private Organization", "Government Entity", "Business Entity", or "Non-Commercial Entity" depending on the category of the subject.
"JURISDICTION OF INCORPORATION COUNTRY NAME"	The name of the country where the jurisdiction about the subject organization is in effect.
"JURISDICTION OF INCORPORATION STATE OR PROVINCE NAME"	Optional. The state or province where the jurisdiction about the subject organization is in effect.
"JURISDICTION OF INCORPORATION LOCALITY NAME"	Optional. The city where the jurisdiction about the subject organization is in effect.
"SERIAL NUMBER"	Values explained in Sections 3.1.5.2 and 3.1.5.3 of this document.
"C"	Country of the subject.
"S"	State or province of the subject.
"L"	City of the subject.
"STREET ADDRESS"	Optional. The street address and number of the subject.
"POSTAL CODE"	Optional. The postal code of the subject.

#### **7.1.5. Name Constraints**

No anonymity or pseudonyms shall be used in qualified electronic certificates issued by TURKTRUST. Identity numbers are used as a distinguishing feature in the names.

**7.1.6. Certificate Policy Object Identifier**

In the "certificate policy" extension of certificates issued by TURKTRUST, the relevant certificate policy object identifier number (OID) indicated in Section 1.2 of this CPS document is used by the certificate type.

**7.1.7. Usage of Policy Constraints Extension**

TURKTRUST's sub-root certificates may contain policy constraints extension as necessary.

**7.1.8. Policy Qualifiers Syntax**

In the "certificate policy" extension of certificates issued by TURKTRUST, the access information for the CPS document has been provided as policy qualifier in URL form.

**7.1.9. Processing Semantics for the Critical Certificate Policies Extension**

Not applicable.

**7.2. CRL Profile**

CRLs generated by TURKTRUST basically contain TURKTRUST's electronic signature and publisher's information, CRL's date of publication, date of publication for the next CRL, and serial numbers of revoked certificates and dates and times of revocation. CRLs generated by TURKTRUST are in accordance with the document "Nitelikli Elektronik Sertifika, SİL ve OCSP İstek/Cevap Mesajları Profilleri – Nisan 2007" ("Qualified Electronic Certificate, CRL, and OCSP Request/Response Message Profiles – April 2007") which was published by the Information and Communication Technologies Authority of Turkey.

**7.2.1. Version Number**

CRLs generated by TURKTRUST support the X.509 v2 version under the "IETF RFC 5280 Internet X.509 Public Key Infrastructure Certificate and Certificate Revocation List (CRL) Profile" document.

**7.2.2. CRL and CRL Entry Extensions**

CRLs generated by TURKTRUST use extensions defined in RFC 5280.

**7.3. OCSP Profile**

TURKTRUST provides uninterrupted on-line certificate status protocol OCSP support which is a real time certificate status inquiry. By this service, when appropriate certificate status inquiries are received, the status of certificates and additional information as required by the protocol are returned to the inquirer as the response. The OCSP responses generated by TURKTRUST are in accordance with the document "Nitelikli Elektronik Sertifika, SİL ve OCSP İstek/Cevap Mesajları Profilleri – Nisan 2007" ("Qualified Electronic Certificate, CRL, and OCSP Request/Response Message Profiles – April 2007") which was published by the Information and Communication Technologies Authority of Turkey.

**7.3.1. Version Number**

The OCSP service provided by TURKTRUST supports the v1 protocol version under the "IETF RFC 2560 Internet X.509 Public Key Infrastructure Online Certificate Status Protocol - OCSP" document.

**7.3.2. OCSP Extension**

In the content of OCSP service provided by TURKTRUST, extensions defined in RFC 2560 may be used. However, it is not mandatory to use all extensions other than the basic OCSP information.

## **8. COMPLIANCE AUDIT AND OTHER ASSESSMENTS**

TURKTRUST is audited by the Information and Communication Technologies Authority under the e-signature legislation. Along with this audit, TURKTRUST SSL EV SSL and OSC processes are audited according to the ETSI TS 102 042 standard by an authorized auditing body.

In addition, all CA processes are subject to periodical compliance audit, in terms of continuity of the information security management system, pursuant to the ISO/IEC 27001 Information Security Management System certificate.

Provision of CA services and security conditions related to operations are kept under control via an internal audit plan.

TURKTRUST carries out risk assessments according to the ISO/IEC 27001 Information Security Management System. Therefore, business risks are evaluated and the necessary security conditions and operational procedures are determined. The risk analysis is regularly reviewed and revised if necessary.

### **8.1. Frequency and Circumstances of Assessment**

The Information and Communication Technologies Authority, as the regulating and auditing Agency, conducts audits as it deems necessary ex officio. During the audit, it is mandatory that certification authorities and relevant persons fulfill the requests of auditors in providing all books, documents, and records, access to management premises, buildings and extensions, taking written and verbal information, taking samples, and auditing operations and accounts.

SSL, EV SSL and OSC processes are audited yearly according to the ETSI TS 102 042 standard and the certification is renewed every three years.

Pursuant to the ISO/IEC 27001 Information Security Management System certificate, follow-up audits on a yearly basis and a recertification audit in every third year are conducted.

Internal audit is conducted at least once a year according to the plan, and more frequently if deemed necessary.

### **8.2. Identification and Qualifications of Assessor**

The Information and Communication Technologies Authority is the regulating and auditing agency designated by the Law.

The ETSI TS 102 042 audit is performed by a qualified auditing body that meets the requirements below:

- Qualified in PKI technologies, information security tools and techniques, information technologies, security audits and third party reporting.
- Accredited by a similar organization to the European Cooperation for Accreditation with respect to its conformity with the ISO/IEC 17021.
- Accredited with respect to its conformity with the provision 3.4 of the CEN Workshop Agreement (CWA) 14172-2 standard.

The ISO/IEC 27001 Information Security Management System certification shall be conducted by an authorized assessor.

TURKTRUST's corporate internal audit is conducted by TURKTRUST's authorized personnel. The internal audit is conducted by the Information Security Management System and Quality Management System personnel within TURKTRUST.

### **8.3. Assessor's Relationship to Assessed Entity**

The Institution which is the auditor is the regulatory organization authorized by the Law to audit all CAs operating in the field of QECs in Turkey.

The ETSI 102 042 audit is performed by an independent and authorized auditing body.

The ISO/IEC 27001 Information Security Management System certification shall be conducted by an independent, authorized assessor.

TURKTRUST's institutional audit is conducted by TURKTRUST's authorized personnel.

### **8.4. Topics Covered by Assessment**

The audit by the Institution covers, within the framework of authority entrusted by the Law, all processes relating to TURKTRUST's electronic certification services, technical infrastructures used in providing such services and the facilities where such services are provided.

The ETSI 102 042 audit covers all the processes of SSL, EV SSL and OSC services, the technical infrastructure used while giving these services and the premises where the services are performed.

The ISO/IEC 27001 Information Security Management System certification covers TURKTRUST's electronic certification and time-stamping services.

The internal audit covers all matters that fall under the legal audit.

### **8.5. Actions Taken as a Result of Deficiency**

During the audits conducted by the Institution pursuant to the Regulation, if any matter so significant as to adversely affect TURKTRUST's activities and operation are found out, sanctions and penalties are imposed as indicated in the legislation.

TURKTRUST identifies the corrective and preventive actions about the minor non-conformities detected during the ETSI TS 102 042 conformance audit of the SSL, EV SSL and OSC processes. If the deficiencies detected are of major extent, this may lead to revocation of the related certificate and authorization.

Any deficiencies found out during the ISO/IEC 27001 Information Security Management System may lead to revocation of the certificate if such deficiencies are of major extent. Minor deficiencies shall be remedied by TURKTRUST until the next audit.

Deficiencies detected in the internal audits conducted by TURKTRUST are remedied and preventive measures are taken.

### **8.6. Communication of Results**

The results of the audit conducted by the Institution pursuant to the Law shall be communicated officially to TURKTRUST if deemed necessary. Non-communication of any result from the Institution means there is no adverse assessment.

The audit results of SSL, EV SSL and OSC processes that are audited according to the ETSI TS 102 042 standard shall be communicated officially to TURKTRUST by the auditing body.

The ISO/IEC 27001 Information Security Management System audit results shall be communicated officially to TURKTRUST by the assessor.

The results of the internal audit are included in the internal audit reports and submitted to evaluation by the relevant authorized persons.

## **9. OTHER BUSINESS AND LEGAL MATTERS**

This section of the CPS document describes TURKTRUST's commercial and legal practice and service conditions that should be fulfilled for certification processes.

### **9.1. Fees**

#### **9.1.1. Certificate Issuance and Renewal Fees**

Certificates issued by TURKTRUST are priced differently depending on type.

QECs are priced according to their validity periods and to the extent of material transaction limits included, and according to certificate generation costs and market conditions. A higher material transaction limit is reflected to the certificate prices at the higher certificate financial liability insurance premiums.

SSL and EV SSL certificates and OSCs are priced according to certificate type, term and characteristics. Furthermore, during pricing of SSL and EV SSL certificates, the extent of material transaction limits, the commercial general liability insurance and the professional liability insurance are also taken into account.

Updated certificate price schedules are announced to customers at the TURKTRUST website and through other appropriate communication channels.

#### **9.1.2. Certificate Access Fees**

Certificates issued by TURKTRUST are kept accessible to the public provided that subscribers consent in writing.

No fees shall be charged for certificate access services.

#### **9.1.3. Revocation or Status Information Access Fees**

Revocation or status information for certificates issued by TURKTRUST are kept accessible to relying people by way of CRLs and OCSP service.

No fees shall be charged for access services to revocation or status information for QECs as required by the Law.

Access services on revocation or status information provided by TURKTRUST for SSL and EV SSL certificates and OSCs are also free of charge.

#### **9.1.4. Fees for Other Services**

TURKTRUST does not charge fees for manuals and documents such as CP, CPS, subscriber's and certificate services commitments published to the public.

Fees for other products and services which are offered to customers with added value are announced to customers at the website and through other appropriate communication channels.

#### **9.1.5. Refund Policy**

TURKTRUST does not refund for QECs, SSL and EV SSL certificates and OSCs. However, if the certificate contains information different than that on the application due to causes attributable to TURKTRUST, a new certificate shall be issued free of charge, or it is refunded upon request.

## **9.2. Financial Responsibility**

TURKTRUST is under obligation to carry certificate financial liability insurance to cover the damages that would arise from its failure to perform its obligations under the Law. Conditions regarding the insurance are included in the "Certificate Financial Insurance Liability Regulation" promulgated in the Official Gazette dated 26 August 2004 issue 25565 and respective communiqués.

TURKTRUST is under obligation to carry commercial general liability insurance and professional liability insurance in accordance with the ETSI TS 102 042 standard concerning SSL and EV SSL services.

### **9.2.1. Insurance Coverage**

Pursuant to Article 6 of the certificate financial insurance liability regulation, certificate financial liability insurance insures the CA for legal liabilities against those suffering damages that may arise from its failure to fulfill its obligations to use secure products and systems, provide services securely, prevent imitation and falsification.

In addition to the certificate financial liability insurance done for the QECs, SSL and EV SSL certificates are covered by commercial general liability insurance and professional liability insurance indicated below.

The commercial general liability insurance covers all direct and indirect damages that can be linked to the SSL and EV SSL services. Professional liability insurance covers the legal responsibilities arising from damages that may be caused by the professional activities of TURKTRUST about the SSL and EV SSL services.

### **9.2.2. Other Assets**

Not applicable.

### **9.2.3. Insurance or Warranty Coverage for End-Users**

TURKTRUST is under obligation to buy the certificate financial liability insurance for the QECs to cover damages arising from its failure to fulfill its legal obligations prior to delivering the certificate to the subscriber.

In addition, TURKTRUST is under obligation to carry commercial general liability insurance and professional liability insurance in accordance with the ETSI TS 102 042 standard concerning SSL and EV SSL services.

## **9.3. Confidentiality of Business Information**

### **9.3.1. Scope of Confidential Information**

The following are included in the scope of confidential information: all confidential commercial information and documents relating to TURKTRUST's certification services, private keys of root and sub-root certificates of TURKTRUST's issuing certification authorities, software and hardware information, operational records, audit reports, access passwords to on-site areas and devices, facility layout and interior design, emergency action plans, business plans, sales data, cooperation agreements, confidential information of business partner organizations.

### **9.3.2. Information Not Within the Scope of Confidential Information**

Information and documents of TURKTRUST which are not commercially confidential, and which should be kept public pursuant to the Law and practices shall be excluded from the scope of confidential information. Certificates issued, CRLs, customer guides relating to

certification services, the CP document, the CPS document, information included in subscriber's and certificates services commitments are not confidential.

### **9.3.3. Responsibility to Protect Confidential Information**

All TURKTRUST employees have responsibility in protecting confidential information. Pursuant to security policies, no person or third party other than the authorized employee is allowed to access any confidential information. All procedures relating to ensuring information security are strictly applied and such application is subject to TURKTRUST's internal audit.

## **9.4. Privacy of Personal Information**

### **9.4.1. Privacy Plan**

TURKTRUST, in the scope of certification services provided, protects privacy of personal information of certificate applicants, subscribers or other participants.

### **9.4.2. Information Treated as Private**

Information and documents for identity validation received from certificate applicants and needed during the certification services provided by TURKTRUST shall be used for certification services, and such customer information as demographic information, communications information not included in the certificate's content is deemed private information.

### **9.4.3. Information Not Deemed Private**

Information included in the certificates of subscribers who are TURKTRUST's customers and announced to relying people along with the certificates is not deemed private unless otherwise requested by the subscriber.

### **9.4.4. Responsibility to Protect Private Information**

All TURKTRUST employees have responsibility in protecting private information of applicants and customers. No person or third party other than the authorized employee is allowed to access any private information.

### **9.4.5. Notice and Consent to Use Private Information**

TURKTRUST may use the certificate, seal, and information contained therein provided in the certificate application for the purposes set out in this CPS and subscriber's agreement or letter of commitment

### **9.4.6. Disclosure Pursuant to Judicial and Administrative Process**

Private information about subscribers required in the judicial and administrative processes shall be given only to the requesting authority or the subscribers themselves.

### **9.4.7. Other Information Disclosure Circumstances**

Not applicable.

## **9.5. Intellectual Property Rights**

TURKTRUST holds the intellectual property rights on all certificates issued by TURKTRUST, CRLs, customer guides relating to certification services, CP and CPS documents, subscriber's and certificate services commitments, all internal and external documents relating to certification services, databases, websites and all products developed in association with certification services.

Certificate subscribers hold the property rights on all distinguishing names and marks included in the certificate's content and owned by the subscriber.

## **9.6. Representations and Warranties**

### **9.6.1. CA Representations and Warranties**

Issuing certification authorities under TURKTRUST represent and warrant that contents of all issued certificates are accurate, identity validation steps have been performed accurately and reliably, the right certificate has been issued to the right applicant and delivered to the right person, published certificate status information is updated and accurate, and they will perform all practice requirements and obligations included in CP and CPS.

As regards to EV SSL certificates, TURKTRUST specifically warrants that:

- Legal Existence: TURKTRUST has confirmed that, as of the date the EV SSL certificate was issued, the Subject named in the EV SSL certificate legally exists as a valid organization or entity;
- Identity: TURKTRUST has confirmed that, as of the date the EV SSL certificate was issued, the legal name of the Subject named in the EV SSL certificate matches the name on the official government records;
- Right to Use Domain Name: TURKTRUST has taken all steps reasonably necessary to verify that, as of the date the EV SSL certificate was issued, the Subject named in the EV SSL certificate has the exclusive right to use all the Domain Name(s) listed in the EV SSL certificate;
- Authorization for EV SSL Certificate: TURKTRUST has taken all steps reasonably necessary to verify that the Subject named in the EV SSL certificate has authorized the issuance of the EV SSL certificate;
- Accuracy of Information: TURKTRUST has taken all steps reasonably necessary to verify that all of the other information in the EV SSL certificate is accurate, as of the date the EV SSL certificate was issued;
- Letter of Commitment: The Subject named in the EV SSL certificate has entered into a legally valid and enforceable Letter of Commitment with TURKTRUST that satisfies the requirements of this CPS or, if they are affiliated, the Applicant Representative has acknowledged and accepted the Terms of Use;
- Status: TURKTRUST follows the requirements of this CPS and maintain a 24 x 7 online-accessible repository with current information regarding the status of the EV SSL certificate as valid or revoked; and
- Revocation: TURKTRUST follows the requirements of this CPS and revoke the EV SSL certificate for any of the revocation reasons specified in the CA/Browser Forum Guidelines.

In particular to EV SSL certificate beneficiaries listed below, warranties mentioned in this section do apply:

- The Subscriber entering into the Subscriber Agreement for the EV SSL certificate;
- The Subject named in the EV SSL certificate;
- All Application Software Suppliers with whom the Root CA has entered into a contract for inclusion of its certificate in software distributed by such Application Software Suppliers;
- All Relying Parties that actually rely on such EV SSL certificate during the period when it is Valid.

Issuing certification authorities under TURKTRUST fulfill CA obligations stated in Article 10 of the Law and Article 14 of the Regulation to issue QECs, and the ETSI TS 102 042 obligations to perform SSL, EV SSL and OSC services.

#### **9.6.2. Registration authority Representations and Warranties**

Registration centers under TURKTRUST represent and warrant that identity validation have been performed accurately and reliably for the applicants according to the certificate types as stated in this CPS document, records are kept accurately, certificate issuing, renewal and revocation requests transmitted to the CA center have been accurate and complete.

#### **9.6.3. Subscriber Representations and Warranties**

Subscribers represent and warrant that they will furnish updated and accurate information and documents to TURKTRUST during certificate application and renewal and revocation requests, use their certificates under the conditions stated in the CP and CPS documents, and fulfill all obligations stipulated in the subscriber's agreement or the letter of commitment.

Subscribers of QECs have to fulfill obligations stated in Article 15 of the Regulation along with the stipulations in the subscriber's agreement or the letter of commitment.

#### **9.6.4. Relying Party Representations and Warranties**

Subscribers and relying people are under obligation to check the validity of electronic signature generated based on TURKTRUST's QECs.

The owners of SSL and EV SSL certificates and OSCs and the relying parties are under obligation to check the validity of the contents of the certificates issued by TURKTRUST when they rely on them.

#### **9.6.5. Representations and Warranties of Other Participants**

Other participants which are comprised of all persons and organizations which TURKTRUST cooperates with and from which TURKTRUST procures services during certification services represent and warrant that they provide the services reliably and accurately and not disclose confidential or private information regarding TURKTRUST's processes and customers. TURKTRUST signs service contracts with service providing organizations in which such representations and warranties are explicitly stipulated.

#### **9.7. Disclaimers of Warranties**

Not applicable.

#### **9.8. Limitations of Liability**

Certificates issued by TURKTRUST are insured within the material transaction limits for money transactions. Limits of liability regarding the certificates and usages are explicitly stipulated in the subscriber's commitment.

Mandatory certificate financial liability insurance for QECs covers 10.000 TL per occurrence and 1.000.000 TL in the aggregate for the yearly policy term.

Certificate financial liability insurance for SSLs covers 10.000 TL per occurrence and 1.000.000 TL in the aggregate for the yearly policy term.

For EV SSL certificates, commercial general liability insurance covers USD 2.000.000 per occurrence and in the aggregate for the yearly policy term and professional liability

insurance covers USD 5.000.000 per occurrence and in the aggregate for the yearly policy term.

### **9.9. Indemnities**

If TURKTRUST fails to fulfill its obligations pursuant to the policies and principles in the CP and this CPS and third parties suffer damages due to such failure, TURKTRUST shall indemnify any such damage.

Pursuant to Article 13 of the Law, TURKTRUST is under obligation to indemnify the damages it inflicts to third parties under qualified electronic certificate services by way of violation of the Law and Regulation. In such cases, if TURKTRUST proves its faultlessness, then it is relieved of such obligation of indemnification.

Where subscribers fail to fulfill their obligations under the subscriber's agreement or letter of commitment and TURKTRUST or third parties suffer damages due to such failure, the subscriber shall indemnify such damage. The indemnification clause is included in the subscriber's commitment.

### **9.10. Term and Termination of CPS Documentation**

#### **9.10.1. Term**

This version of the CPS document is valid until a new version is available.

#### **9.10.2. Termination**

Where a situation arises that require changing the content of the present version of this CPS document depending on changes and arrangements that may occur in TURKTRUST's activities and certification services, this document may become partially or wholly invalid. In such case, a new CPS document version which covers relevant changes shall be prepared and published by TURKTRUST.

#### **9.10.3. Effect of Termination and Survival**

Where the validity of the present CPS version terminates, necessary measures are taken to ensure continuity of TURKTRUST's activities and certification services. The new CPS version is prepared before the validity of the old CPS version terminates and the change shall be realized without interruption of service.

Where it becomes necessary to make changes in certificates issued by TURKTRUST due to the aforesaid changes, subscribers and relying people shall be notified and necessary actions are completed rapidly. Practices that have changed due to the new version shall be immediately implemented by TURKTRUST.

### **9.11. Individual Notices and Communications to Participants**

All individual notices from TURKTRUST to subscribers shall be made by e-mail. Official papers can be sent as a notice for necessary situations.

Notices from TURKTRUST to relying people shall be published over the web or press media.

### **9.12. Amendments**

Where a situation arises that require changing the content of the present version of this CPS document depending on changes and arrangements that may occur in TURKTRUST's activities and certification services, a new CPS document version which covers

relevant changes shall be prepared and published by TURKTRUST upon the approval of the board of management of TURKTRUST.

While the CPS document undergo minor changes that would not affect the use and acceptability of certificates issued earlier, there may be significant changes that would directly affect certificate use. TURKTRUST practice differs for two cases.

#### **9.12.1. Amendment Procedure**

Where a situation arises that require amending the content of the present version of this CPS document depending on changes and arrangements that may occur in TURKTRUST's activities and certification services, a new CPS document version which covers relevant changes shall be prepared and published by TURKTRUST.

The CPS document and related practices are reviewed annually during management review meetings.

Amendments to CP shall be reflected onto the relevant practices in CPS. Therefore, a new CP version necessitates a new CPS version. The access data to the CPS document given as URL in the "certificate policy" extension of certificates issued by TURKTRUST shall remain the same, but the CPS document indicated by this address is the new version.

Where minor amendments occur, certificates issued earlier shall continue to be used in accordance with the new CP and CPS documents. However, if a new CP version is issued due to significant amendments, the certificates issued earlier which are associated with the amended certificate policy may not be used compatibly with the new CP.

#### **9.12.2. Notification Mechanism and Period**

Where changes in TURKTRUST's activities and certification services and amendments to the present CP and CPS documents occur, subscribers and relying parties shall be immediately notified on the updated CP and CPS versions issued.

Particularly in significant amendments, since the usability and acceptability of the certificate may be affected in some applications, TURKTRUST shall use all reasonable means to notify subscribers and relying people. The amendment shall be published in the TURKTRUST website, subscribers shall be notified through e-mail, and where necessary all relying parties shall be informed through the press media.

Minor changes are announced in the web site and subscribers are notified by e-mail.

The new CP and CPS versions shall be published in the TURKTRUST repository along with the old versions to include detailed version information and kept accessible to relevant parties.

#### **9.12.3. Circumstances under Which OID Must Be Changed**

Significant changes realizing in a way that crucially affecting the authentication steps used or the security level of certificate in certificate services, which could directly affect certificate usage and acceptability require that object identifier numbers of the relevant certificate policy defined in the CP document may be changed. In this case, new certificates contain object identifier numbers of the new certificate policy to be implemented.

### **9.13. Dispute Resolution**

Where disputes arise between TURKTRUST and subscribers and relying parties, efforts shall be made to settle such disputes pursuant to the policy and principles laid down in the CP and CPS documents, procedures, commitments and contracts.

Actions relating to qualified electronic certificates shall be conducted under the Law and the Regulation and associated Communiqués.

If disputes could not be amicably settled, then Ankara Courts have jurisdiction for resolution of disputes.

**9.14. Governing Law**

The use of electronic signature in Turkey which gives the same consequence as of manual signature is regulated by the "Electronic Signature Law" no.5070 and the Ordinances and Communiqués issued by the Information and Communication Technologies Authority. The Institution is responsible for regulating and auditing the CA's operations under the Law.

**9.15. Compliance with Applicable Law**

TURKTRUST provides QEC services in accordance with the "Electronic Signature Law" no.5070 and the Ordinances and Communiqués issued by the Information and Communication Technologies Authority.

**9.16. Miscellaneous Provisions****9.16.1. Entire Agreement**

Not applicable.

**9.16.2. Assignment**

Not applicable.

**9.16.3. Severability**

Where any section of the CP and CPS documents become invalid in a manner not to affect the validity of other sections, the unaffected other sections shall remain valid and in effect and be implemented until the new versions are issued by TURKTRUST which reflect the changes.

**9.16.4. Waiver of Rights**

Not applicable.

**9.16.5. Force Majeure**

Any circumstance which obstructs TURKTRUST's performance of activities relating to electronic certification service provision and is normally beyond TURKTRUST's control is called a force majeure. While such forces majeurs continue to be effective, TURKTRUST's activities may be interrupted or experience problems. Natural disasters, wars, acts of terrorism, failures in telecommunication, Internet and similar infrastructures are deemed forces majeurs.

**9.17. Other Provisions**

Not applicable.

## **10. APPENDIX – EV SSL INFORMATION VERIFICATION REQUIREMENTS**

### **1. General Overview**

TURKTRUST conducts the information verification requirements that are pre-requisite for EV SSL issuance, in accordance with the verification requirements indicated in the "Guidelines for the Issuance and Management of Extended Validation Certificates" guide which is published by the CA/Browser Forum.

Before EV Certificate issuance (in this document "EV Certificate" stands for "EV SSL Certificate" and used interchangeably), TURKTRUST ensures that the information about the Applicant (in this document "Applicant" stands for "Certificate Applicant" and used interchangeably) is verified according to this CPS document and the related TURKTRUST procedures and the requirements are met.

In this document "the real persons applying on behalf of the Applicant" represents the real persons who are "the Contract Signer", "the Certificate Approver" or "the Certificate Requester" whenever suitable and used interchangeably.

#### **I. Verification Requirements – Overview**

Before issuing an EV Certificate, TURKTRUST ensures that all subject organization information to be included in the EV Certificate are verified. Such verification processes are intended to accomplish the following:

**(A)** Verify Applicant's existence and identity, including

- a. Verify the Applicant's legal existence and identity,
- b. Verify the Applicant's physical existence (business presence at a physical address), and
- c. Verify the Applicant's operational existence (business activity).

**(B)** Verify the certificate applicant is a registered holder, or has exclusive control, of the Domain Name(s) to be included in the EV SSL certificate

**(C)** Verify the Applicant's authorization for the EV SSL certificate, including;

- a. Verify the name, title, and authority of the real persons applying on behalf of the Applicant
- b. Verify that the real persons applying on behalf of the Applicant signed the Subscriber Agreement or the Letter of Commitment
- c. Verify that the real persons applying on behalf of the Applicant signed the EV SSL Certificate Request.

#### **II. Acceptable Methods of Verification – Overview**

TURKTRUST is responsible for taking all verification steps reasonably necessary to satisfy each of the Verification Requirements set forth in the subsections below.

### **2. Definitions**

**Qualified Independent Information Source (QIIS):** The publicly available and relied upon database that meets the requirements set forth in Section 10.V. of this Appendix.

**Qualified Government Information Source (QGIS):** The database maintained by the government that meets the requirements set forth in Section 10.VI. of this Appendix.

**Qualified Government Tax Information Source (QTIS):** The database maintained by the government that meets the requirements set forth in Section 10.VII. of this Appendix. The formal information source that contains tax information of private organizations, business entities and real persons.

**Fully Qualified Domain Name (FQDN):** Used for identifying the full domain name that exists in the domain name system.

**Related Commercial Register Organization:** register organization defined as “the Registration Authority in the Applicant’s Jurisdiction of Registration” or “Incorporating or Registration Agency in the Applicant’s Jurisdiction of Incorporation or Registration” in the Guide. In Turkey, these are TOBB and the affiliated chambers of commerce.

**Verified Legal Opinion or Verified Accountant Letter:** A document prepared by a lawyer or a chartered accountant who is authorized to provide legal opinions.

### **3. Verification of Applicant’s Legal Existence and Identity**

#### **I. Verification Requirements**

To verify the Applicant’s legal existence and identity, TURKTRUST does the following:

#### **(A) Private Organization Subjects**

- a. **Legal Existence:** Verify that the Applicant is a legally recognized entity, in existence and validly formed (e.g., incorporated) with the Incorporating or Registration Agency in the Applicant’s Jurisdiction of Incorporation or Registration, and not designated on the records of the Incorporating or Registration Agency by labels such as “inactive”, “invalid”, “not current”, or the equivalent.
- b. **Organization Name:** Verify that the Applicant’s formal legal name as recorded with the Incorporating or Registration Agency in the Applicant’s Jurisdiction of Incorporation or Registration matches the Applicant’s name in the EV Certificate Request.
- c. **Registration Number:** Obtain the specific Registration Number assigned to the Applicant by the Incorporating or Registration Agency in the Applicant’s Jurisdiction of Incorporation or Registration. Where the Incorporating or Registration Agency does not assign a Registration Number, the TURKTRUST obtains the Applicant’s date of Incorporation or Registration.
- d. **Registered Agent:** Obtain the identity and address of the Applicant’s Registered Agent or Registered Office (as applicable in the Applicant’s Jurisdiction of Incorporation or Registration).

#### **(B) Government Entity Subjects**

- a. **Legal Existence:** Verify that the Applicant is a legally recognized Government Entity, in existence in the political subdivision in which such Government Entity operates.
- b. **Entity Name:** Verify that the Applicant’s formal legal name matches the Applicant’s name in the EV Certificate Request.
- c. **Registration Number:** TURKTRUST attempts to obtain the Applicant’s date of incorporation, registration, or formation, or the identifier for the legislative

act that created the Government Entity. In circumstances where this information is not available, TURKTRUST enters appropriate language to indicate that the Subject is a Government Entity.

**(C) Business Entity Subjects**

- a. **Legal Existence:** Verify that the Applicant is engaged in business under the name submitted by the Applicant in the Application.
- b. **Organization Name:** Verify that the Applicant's formal legal name as recognized by the Registration Authority in the Applicant's Jurisdiction of Registration matches the Applicant's name in the EV Certificate Request.
- c. **Registration Number:** TURKTRUST attempts to obtain the specific unique Registration Number assigned to the Applicant by the Registration Agency in the Applicant's Jurisdiction of Registration. Where the Registration Agency does not assign a Registration Number, TURKTRUST obtains the Applicant's date of Registration.

**(D) Non-Commercial Entity Subjects (International Organizations)**

- a. **Legal Existence:** Verify that the Applicant is a legally recognized Non-Commercial Entity or an International Organization Entity.
- b. **Entity Name:** Verify that the Applicant's formal legal name matches the Applicant's name in the EV Certificate Request.
- c. **Registration Number:** TURKTRUST attempts to obtain the Applicant's date of formation, or the identifier for the legislative act that created the International Organization Entity. In circumstances where this information is not available, TURKTRUST enters appropriate language to indicate that the Subject is an International Organization Entity.

**II. Acceptable Method of Verification**

**(A) Private Organization Subjects**

All items listed in Section 3.I.(A) of this Appendix are verified directly with, or obtained directly from, the Incorporating or Registration Agency in the Applicant's Jurisdiction of Incorporation or Registration. Such verification may be through use of a Qualified Government Information Source operated by, or on behalf of, the Incorporating or Registration Agency, or by direct contact with the Incorporating or Registration Agency in person or via mail, e-mail, Web address, or telephone, using an address or phone number obtained from a Qualified Independent Information Source.

**(B) Government Entity Subjects**

All items listed in Section 3.I.(B) of this Appendix are either verified directly with, or obtained directly from, one of the following:

- a. a Qualified Government Information Source in the political subdivision in which such Government Entity operates,
- b. a superior governing Government Entity in the same political subdivision as the Applicant (e.g. a Secretary of State may verify the legal existence of a specific State Department),
- c. from a judge that is an active member of the federal, state or local judiciary within that political subdivision,

- d. an attorney representing the Government Entity.

Any communication from a judge is verified in the same manner as is used for verifying factual assertions that are asserted by an Attorney as set forth in Section 10.I. of this Appendix.

Such verification may be by direct contact with the appropriate Government Entity in person or via mail, e-mail, Web address, or telephone, using an address or phone number obtained from a Qualified Independent Information Source.

### **(C) Business Entity Subjects**

All items listed in Section 3.I.(C). of this Appendix, are verified directly with, or obtained directly from, the Registration Agency in the Applicant's Jurisdiction of Registration. Such verification may be performed by means of a Qualified Government Information Source, a Qualified Governmental Tax Information Source, or by direct contact with the Registration Agency in person or via mail, e-mail, Web address, or telephone, using an address or phone number obtained from a Qualified Independent Information Source.

### **(D) Non-Commercial Entity Subjects (International Organization)**

All items listed in Section 3.I.(D). of this Appendix are verified either:

- a. With reference to the constituent document under which the Non-Commercial Entity Subject or the International Organization was formed,
- b. Directly with a signatory country's government in which TURKTRUST is permitted to do business. Such verification may be obtained from an appropriate government agency or from the laws of that country, or by verifying that the country's government has a mission to represent it at the International Organization.
- c. Directly against any current list of qualified entities that the CA/Browser Forum may maintain at [www.cabforum.org](http://www.cabforum.org).
- d. In cases where the Non-Commercial Entity Subject or the International Organization applying for the EV Certificate is an organ or agency - including a non-governmental organization of a verified International Organization, then the CA may verify the International Organization Applicant directly with the verified umbrella International Organization of which the Applicant is an organ or agency.

## **4. Verification of Applicant's Physical Existence**

### **I. Address of Applicant's Place of Business**

#### **(A) Verification Requirements**

To verify the Applicant's physical existence and business presence, TURKTRUST verifies that the physical address provided by the Applicant is an address where the Applicant or a Parent/Subsidiary Company conducts business operations (not, for example, a mail drop or P.O. box, or 'care of' (C/O) address, such as an address for an agent of the Organization), and is the address of the Applicant's Place of Business.

#### **(B) Acceptable Methods of Verification**

##### **a. Place of Business in the Country of Incorporation or Registration**

- i. For Applicants whose Place of Business is in the same country as the Applicant's Jurisdiction of Incorporation or Registration and whose Place of

Business is not the same as that indicated in the relevant Qualified Government Information Source used to verify legal existence:

- i.1. For Applicants listed at the same Place of Business address in the current version of either at least one QGIS (other than that used to verify legal existence), QIIS or QTIS, TURKTRUST confirms that the Applicant's address, as listed in the EV Certificate Request, is a valid business address for the Applicant or a Parent/Subsidiary Company by reference to such QGIS, QIIS, or QTIS, and may rely on the Applicant's representation that such address is its Place of Business.
  - i.2. For Applicants who are not listed at the same Place of Business address in the current version of either at least one QIIS or QTIS, TURKTRUST confirms that the address provided by the Applicant in the EV Certificate Request is the Applicant's or a Parent/Subsidiary Company's business address, by obtaining documentation of a site visit to the business address, which is performed by a reliable individual or firm. The documentation of the site visit:
    - Verifies that the Applicant's business is located at the exact address stated in the EV Certificate Request (e.g., via permanent signage, employee confirmation, etc.),
    - Identifies the type of facility (e.g., office in a commercial building, private residence, storefront, etc.) and whether it appears to be a permanent business location.
    - Indicates whether there is a permanent sign (that cannot be moved) that identifies the Applicant,
    - Indicates whether there is evidence that the Applicant is conducting ongoing business activities at the site (not that it is just, for example, a mail drop, P.O. box, etc.),
    - Include one or more photos of the exterior of the site (showing signage indicating the Applicant's name, if present, and showing the street address if possible), and the interior reception area or workspace.
- ii. For all Applicants, TURKTRUST may alternatively rely on a Verified Legal Opinion or a Verified Accountant Letter that indicates the address of the Applicant's or a Parent/Subsidiary Company's Place of Business and that business operations are conducted there.
- iii. For Government Entity Applicants, TURKTRUST may rely on the address contained in the records of the QGIS in the Applicant's jurisdiction.
- iv. For Applicants whose Place of Business is in the same country as the Applicant's Jurisdiction of Incorporation or Registration and where the QGIS used to verify legal existence contains a business address for the Applicant, the TURKTRUST may rely on the address in the QGIS to confirm the Applicant's or a Parent/Subsidiary Company's address as listed in the EV Certificate Request, and may rely on the Applicant's representation that such address is its Place of Business.

**b. Place of Business not in the Country of Incorporation or Registration**

TURKTRUST relies on a Verified Legal Opinion or Verified Accountant's Letter that indicates the address of the Applicant's Place of Business and that business operations are conducted there.

**II. Telephone Number for Applicant's Place of Business****(A) Verification Requirements**

To further verify the Applicant's physical existence and business presence, as well as to assist in confirming other verification requirements, TURKTRUST verifies a main telephone number for one of the Applicant's Places of Business.

**(B) Acceptable Methods of Verification**

To verify the Applicant's telephone number, TURKTRUST performs items "a" and either "b" or "c" as listed below:

- a.** Confirm the Applicant's telephone number by calling it and obtaining an affirmative response sufficient to enable a reasonable person to conclude that the Applicant is reachable by telephone at the number dialed,
- b.** Confirm that the telephone number is listed as one of the Applicant's or Parent/Subsidiary Company's or Principal Individual's (for business entities) telephone numbers, matching an address of one of the Applicant's Places of Business in records provided by the applicable phone company, or, alternatively, in at least one QIIS, QGIS, or QTIS,
- c.** Rely on a Verified Legal Opinion or a Verified Accountant Letter to the effect that the Applicant's telephone number, as provided, is a main phone number for the Applicant's Place of Business.

**5. Verification of Applicant's Operational Existence****I. Verification Requirements**

If the Applicant has been in existence for less than three years, as indicated by the records of the Incorporating Agency or Registration Agency, and is not listed in either the current version of one QIIS or QTIS, TURKTRUST verifies that the Applicant has the ability to engage in business.

**II. Acceptable Methods of Verification**

To verify the Applicant's operational existence, TURKTRUST performs one of the following:

- (A) Verify that the Applicant has an active current Demand Deposit Account with a Regulated Financial Institution. TURKTRUST receives authenticated documentation directly from a Regulated Financial Institution verifying that the Applicant has an active current Demand Deposit Account with the institution.
- (B) Rely on a Verified Legal Opinion or a Verified Accountant Letter to the effect that the Applicant has an active current Demand Deposit Account with a Regulated Financial Institution.

**6. Verification of Applicant's Domain Name****I. Verification Requirements**

TURKTRUST confirms that the Applicant;

- Is the registered holder of the Domain Name, or
- Has been granted the exclusive right to use the Domain Name by the registered holder of the Domain Name.

To verify the Applicant's registration, or exclusive control, of the Domain Name(s) to be listed in the EV Certificate, TURKTRUST verifies that each such Domain Name is registered with an Internet Corporation for Assigned Names and Numbers (ICANN)-approved registrar or a registry listed by the Internet Assigned Numbers Authority (IANA). For Government Entity Applicants, TURKTRUST relies on the Domain Name listed for that entity in the records of the QGIS in the Applicant's Jurisdiction.

TURKTRUST compares any registration information that is publicly available from the WHOIS database with the verified Subject organization information and confirms that it is neither misleading nor inconsistent.

TURKTRUST further confirms that the Applicant is aware of its registration or exclusive control of the Domain Name.

## **II. Acceptable Methods of Verification**

### **(A)Applicant as Registered Holder**

Acceptable methods by which TURKTRUST verifies that the Applicant is the registered holder of the Domain Name include the following:

- a. Performing a WHOIS inquiry on the Internet for the Domain Name supplied by the Applicant, and obtaining a response indicating that the Applicant or a Parent/Subsidiary Company is the entity to which the Domain Name is registered; or
- b. Communicating with the contact listed on the WHOIS record to confirm that the Applicant is the registered holder of the Domain Name and having the contact update the WHOIS records to reflect the proper Domain Name registration. Confirmation that the registered owner of the Domain Name is a Parent/Subsidiary Company of the Applicant, or a registered trading name of the Applicant is sufficient to establish that the Applicant is the registered owner of the Domain Name.
- c. In cases where domain registration information is private, and the domain registrar offers services to forward communication to the registered domain holder, TURKTRUST may contact the Applicant through the domain registrar by e-mail or paper mail.

### **(B)Applicant's Exclusive Right to Use**

In cases where the Applicant is not the registered holder of the Domain Name, TURKTRUST verifies the Applicant's exclusive right to use the Domain Name(s)..

- a. In cases where the registered domain holder can be contacted using information obtained from WHOIS, or through the domain registrar, TURKTRUST obtains positive confirmation from the registered domain holder by paper mail, e-mail, telephone, or facsimile that the Applicant has been granted the exclusive right to use the requested Fully Qualified Domain Name (FQDN).

In addition, TURKTRUST verifies the Applicant's exclusive right to use the Domain Name using one of the following methods:

- i. Relying on a Verified Legal Opinion or a Verified Accountant Letter to the effect that the Applicant has the exclusive right to use the specified Domain Name in identifying itself on the Internet; or.
  - ii. Relying on a representation from the Contract Signer, or the Certificate Approver, if expressly so authorized in a mutually-agreed-upon contract.
- b. In cases where the registered domain holder cannot be contacted, TURKTRUST:
  - i. Relies on a Verified Legal Opinion or a Verified Accountant Letter to the effect that the Applicant has the exclusive right to use the specified Domain Name in identifying itself on the Internet; and.
  - ii. Relies on a representation from the Contract Signer, or the Certificate Approver, if expressly so authorized in a mutually-agreed-upon contract, coupled with a practical demonstration by the Applicant establishing that it controls the Domain Name by making an agreed-upon change in information found online on a Web page identified by a uniform resource identifier containing the Applicant's FQDN.

**(C) Knowledge**

Acceptable methods by which TURKTRUST verifies that the Applicant is aware that it has exclusive control of the Domain Name include the following:

- a. Relying on a Verified Legal Opinion or a Verified Accountant Letter to the effect that the Applicant is aware that it has exclusive control of the Domain Name; or
- b. Obtaining a confirmation from the Contract Signer or Certificate Approver verifying that the Applicant is aware that it has exclusive control of the Domain Name.

**7. Verification of Name, Title, and Authority of Contract Signer and Certificate Approver****I. Verification Requirements**

For both the Contract Signer and the Certificate Approver, TURKTRUST verifies the following:

**(A) Name, Title and Agency**

TURKTRUST verifies the name and title of the Contract Signer and the Certificate Approver, as applicable. TURKTRUST also verifies that the Contract Signer and the Certificate Approver are agents representing the Applicant.

**(B) Signing Authority of Contract Signer**

TURKTRUST verifies that the Contract Signer is authorized by the Applicant to enter into the Subscriber Agreement (and any other relevant contractual obligations) on behalf of the Applicant, including a contract that designates one or more Certificate Approvers on behalf of the Applicant.

**(C) EV Authority of Certificate Approver**

TURKTRUST verifies, through a source other than the Certificate Approver him- or herself, that the Certificate Approver is expressly authorized by the Applicant to do the following, as of the date of the EV Certificate Request:

- a. Submit, and, if applicable, authorize a Certificate Requester to submit, the EV Certificate Request on behalf of the Applicant; and

- b. Provide, and, if applicable, authorize a Certificate Requester to provide, the information requested from the Applicant by TURKTRUST for issuance of the EV Certificate; and
- c. Approve EV Certificate Requests submitted by a Certificate Requester.

**II. Acceptable Methods of Verification – Name, Title and Agency**

Acceptable methods of verification of the name, title, and agency status of the Contract Signer and the Certificate Approver include the following:

**(A) Name and Title**

TURKTRUST may verify the name and title of the Contract Signer and the Certificate Approver by any appropriate method designed to provide reasonable assurance that a person claiming to act in such a role is in fact the named person designated to act in such role.

**(B) Agency**

TURKTRUST may verify the agency of the Contract Signer and the Certificate Approver by:

- a. Contacting the Applicant's Human Resources Department by phone or mail (at the phone number or address for the Applicant's Place of Business, verified in accordance with these Guidelines) and obtaining confirmation that the Contract Signer and/or the Certificate Approver, as applicable, is an employee; or
- b. Obtaining an Independent Confirmation From the Applicant (as described in Section 10.IV. of this Appendix), or a Verified Legal Opinion (as described in Section 10.I. of this Appendix), or a Verified Accountant Letter (as described in Section 10.II. of this Appendix) verifying that the Contract Signer and/or the Certificate Approver, as applicable, is either an employee or has otherwise been appointed as an agent of the Applicant

**III. Acceptable Methods of Verification – Authority**

Acceptable methods of verification of the Signing Authority of the Contract Signer, and the EV Authority of the Certificate Approver, as applicable, include:

**(A) Legal Opinion**

The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, may be verified by reliance on a Verified Legal Opinion (as described in Section 10.I. of this Appendix);

**(B) Accountant Letter**

The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, may be verified by reliance on a Verified Accountant Letter (as described in Section 10.II. of this Appendix);

**(C) Corporate Resolution**

The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, may be verified by reliance on a properly authenticated corporate resolution that confirms that the person has been granted such Signing Authority, provided that such resolution is certified by the appropriate corporate officer.

**(D) Independent Confirmation from Applicant**

The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, MAY be verified by obtaining an Independent Confirmation from the Applicant (as described in Section 10.IV. of this Appendix)

**(E) Contract between TURKTRUST and Applicant**

The EV Authority of the Certificate Approver may be verified by reliance on a contract between TURKTRUST and the Applicant that designates the Certificate Approver with such EV Authority.

**(F) Prior Equivalent Authority**

The signing authority of the Contract Signer, and/or the EV authority of the Certificate Approver, may be verified by relying on a demonstration of Prior Equivalent Authority.

- a. Prior Equivalent Authority of a Contract Signer may be relied upon for confirmation or verification of the signing authority of the Contract Signer when the Contract Signer has executed a binding contract between TURKTRUST and the Applicant with a legally valid and enforceable seal or handwritten signature and only when the contract was executed more than 90 days prior to the EV Certificate application. TURKTRUST records sufficient details of the previous agreement to correctly identify it and associate it with the EV application. Such details may include any of the following.
  - i. Agreement title,
  - ii. Date of Contract Signer's signature,
  - iii. Contract reference number, and
  - iv. Filing location.
- b. Prior Equivalent Authority of a Certificate Approver may be relied upon for confirmation or verification of the EV Authority of the Certificate Approver when the Certificate Approver has performed one or more of the following:
  - i. Under contract to TURKTRUST, has served (or is serving) as an Enterprise RA for the Applicant, or
  - ii. Has participated in the approval of one or more certificate requests, for certificates issued by TURKTRUST and which are currently and verifiably in use by the Applicant. In this case TURKTRUST must have contacted the Certificate Approver by phone at a previously validated phone number or have accepted a signed and notarized letter approving the certificate request.

**(G) QIIS or QGIS**

The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, may be verified by a QIIS or QGIS that identifies the Contract Signer and/or the Certificate Approver as a corporate officer, sole proprietor, or other senior official of the Applicant.

**(H) Contract Signer's Representation/Warranty**

Provided that TURKTRUST verifies that the Contract Signer is an employee or agent of the Applicant, TURKTRUST may rely on the signing authority of the Contract Signer by

obtaining a duly executed representation or warranty from the Contract Signer that includes the following acknowledgments:

- a. That the Applicant authorizes the Contract Signer to sign the Subscriber Agreement on the Applicant's behalf,
- b. That the Subscriber Agreement (or the Letter of Commitment) is a legally valid and enforceable agreement,
- c. That, upon execution of the Subscriber Agreement (or the Letter of Commitment), the Applicant will be bound by all of its terms and conditions,
- d. That serious consequences attach to the misuse of an EV certificate, and
- e. The contract signer has the authority to obtain the digital equivalent of a corporate seal, stamp or officer's signature to establish the authenticity of the company's Web site.

#### **IV. Pre-Authorized Certificate Approver**

Where TURKTRUST and Applicant contemplate the submission of multiple future EV Certificate Requests, then, after TURKTRUST:

- (A) Has verified the name and title of the Contract Signer and that he/she is an employee or agent of the Applicant; and
- (B) Has verified the Signing Authority of such Contract Signer in accordance with one of the procedures in Section 7. III. of this Appendix.

TURKTRUST and the Applicant may enter into a written agreement, signed by the Contract Signer on behalf of the Applicant, whereby, for a specified term, the Applicant expressly authorizes one or more Certificate Approver(s) designated in such agreement to exercise EV Authority with respect to each future EV Certificate Request submitted on behalf of the Applicant and properly authenticated as originating with, or otherwise being approved by, such Certificate Approver(s).

Such an agreement provides that the Applicant shall be obligated under the Subscriber Agreement for all EV Certificates issued at the request of, or approved by, such Certificate Approver(s) until such EV Authority is revoked, and includes mutually agreed-upon provisions for:

- Authenticating the Certificate Approver when EV Certificate Requests are approved,
- Periodic re-confirmation of the EV Authority of the Certificate Approver,
- Secure procedures by which the Applicant can notify TURKTRUST that the EV Authority of any such Certificate Approver is revoked, and,
- Such other appropriate precautions as are reasonably necessary.

#### **8. Verification of Signature on Subscriber Agreement (or Letter of Commitment) and EV Certificate Requests**

Both the Subscriber Agreement (or Letter of Commitment) and each non-pre-authorized EV Certificate Request are signed. The Subscriber Agreement is signed by an authorized Contract Signer. The EV Certificate Request is signed by the Certificate Requester submitting the document, unless the Certificate Request has been pre-authorized in line with Section 7.IV. of this Appendix. If the Certificate Requester is not also an authorized Certificate Approver, then an authorized Certificate Approver independently approves

the EV Certificate Request. In all cases, applicable signatures must be legally valid and contain an enforceable seal or handwritten signature (for a paper Subscriber Agreement and/or EV Certificate Request), or a legally valid and enforceable electronic signature (for an electronic Subscriber Agreement and/or EV Certificate Request), that binds the Applicant to the terms of each respective document.

## **I. Verification Requirements**

### **(A) Signature**

TURKTRUST authenticates the signature of the Contract Signer on the Subscriber Agreement and the signature of the Certificate Requester on each EV Certificate Request in a manner that makes it reasonably certain that the person named as the signer in the applicable document is, in fact, the person who signed the document on behalf of the Applicant.

### **(B) Approval Alternative**

In cases where an EV Certificate Request is signed and submitted by a Certificate Requester who does not also function as a Certificate Approver, approval and adoption of the EV Certificate Request by a Certificate Approver in accordance with the requirements of Section 9 of this Appendix can substitute for authentication of the signature of the Certificate Requester on such EV Certificate Request

## **II. Acceptable Methods of Signature Verification**

Acceptable methods of authenticating the signature of the Certificate Requester or Contract Signer include the following:

- (A)** A phone call to the Applicant's or Agent's phone number, as verified in accordance with these Guidelines, asking to speak to the Certificate Requester or Contract Signer, as applicable, followed by a response from someone who identifies themselves as such person confirming that he/she did sign the applicable document on behalf of the Applicant.
- (B)** A letter mailed to the Applicant's or Agent's address, as verified through independent means in accordance with these Guidelines, for the attention of the Certificate Requester or Contract Signer, as applicable, followed by a phone or mail response from someone who identifies themselves as such person confirming that he/she did sign the applicable document on behalf of the Applicant.
- (C)** Use of a signature process that establishes the name and title of the signer in a secure manner, such as through use of an appropriately secure login process that identifies the signer before signing, or through use of a digital signature made with reference to an appropriately verified certificate.
- (D)** Notarization by a notary, provided that TURKTRUST independently verifies that such notary is a legally qualified notary in the jurisdiction of the Certificate Requester or Contract Signer.

## **9. Verification of Approval of EV Certificate Request**

### **I. Verification Requirements**

In cases where an EV Certificate Request is submitted by a Certificate Requester, before TURKTRUST issues the requested EV Certificate, TURKTRUST verifies that an authorized Certificate Approver reviewed and approved the EV Certificate Request.

**II. Acceptable Methods of Verification**

Acceptable methods of verifying the Certificate Approver's approval of an EV Certificate Request include:

- (A)** Contacting the Certificate Approver by phone or mail at a verified phone number or address for the Applicant and obtaining oral or written confirmation that the Certificate Approver has reviewed and approved the EV Certificate Request,
- (B)** Notifying the Certificate Approver that one or more new EV Certificate Requests are available for review and approval at a designated access-controlled and secure Web site, followed by a login by, and an indication of approval from, the Certificate Approver in the manner required by the Web site; or
- (C)** Verifying the signature of the Certificate Approver on the EV Certificate Request in accordance with Section 8 of this Appendix.

**10. Verification of Certain Information Sources****I. Verified Legal Opinion****(A) Verification Requirements**

Before relying on a legal opinion submitted to TURKTRUST, TURKTRUST verifies that such legal opinion meets the following requirements:

**a. Status of Author**

TURKTRUST verifies that the legal opinion is authored by an independent legal practitioner retained by and representing the Applicant (or an in-house legal practitioner employed by the Applicant) (Legal Practitioner) who is either:

- i.** A lawyer (or solicitor, barrister, advocate, or equivalent) licensed to practice law in the country of the Applicant's Jurisdiction of Incorporation or Registration or any jurisdiction where the Applicant maintains an office or physical facility, or.
- ii.** A notary that is a member of the International Union of Notaries, and is licensed to practice in the country of the Applicant's Jurisdiction of Incorporation or Registration or any jurisdiction where the Applicant maintains an office or physical facility (and that such jurisdiction recognizes the role of the Notary).

**b. Basis of Opinion**

TURKTRUST verifies that the Legal Practitioner is acting on behalf of the Applicant.

**c. Authenticity**

TURKTRUST confirms the authenticity of the Verified Legal Opinion.

**(B) Acceptable Methods of Verification**

Acceptable methods of establishing the foregoing requirements for a Verified Legal Opinion are:

**a. Status of Author**

TURKTRUST verifies the professional status of the author of the legal opinion by directly contacting the authority responsible for registering or licensing such Legal

Practitioner(s) in the applicable jurisdiction (in Turkey, the verification is performed by the Union of Turkish Bar Associations and the related Bars that register the lawyers);

**b. Basis of Opinion**

The text of the legal opinion must make it clear that the Legal Practitioner is acting on behalf of the Applicant and that the conclusions of the legal opinion are based on the Legal Practitioner's stated familiarity with the relevant facts and the exercise of the practitioner's professional judgment and expertise. The legal opinion may also include disclaimers and other limitations customary in the Legal Practitioner's jurisdiction, provided that the scope of the disclaimed responsibility is not so great as to eliminate any substantial risk (financial, professional, and/or reputational) to the Legal Practitioner, should the legal opinion prove to be erroneous..

**c. Authenticity**

To confirm the authenticity of the legal opinion, TURKTRUST makes a telephone call or sends a copy of the legal opinion back to the Legal Practitioner at the address, phone number, facsimile, or (if available) e-mail address for the Legal Practitioner listed with the authority responsible for registering or licensing such Legal Practitioner, and obtain confirmation from the Legal Practitioner or the Legal Practitioner's assistant that the legal opinion is authentic. If a phone number is not available from the licensing authority, TURKTRUST uses the number listed for the Legal Practitioner in records provided by the applicable phone company, QGIS, or QIIS

In circumstances where the opinion is digitally signed, in a manner that confirms the authenticity of the document and the identity of the signer, as verified by TURKTRUST in Section 10.I.(B).a. of this Appendix, no further verification of authenticity is required.

**II. Verified Accountant Letter****(A) Verification Requirements**

Before relying on an accountant letter submitted to TURKTRUST, TURKTRUST verifies that such accountant letter meets the following requirements:

**a. Status of Author**

TURKTRUST verifies that the accountant letter is authored by an independent Accounting Practitioner retained by and representing the Applicant (or an in-house professional accountant employed by the Applicant) who is a certified public accountant, chartered accountant, or has an equivalent license within the Applicant's Jurisdiction of Incorporation, Jurisdiction of Registration, or the jurisdiction where the Applicant maintains an office or physical facility. Verification of license is through that jurisdiction's member of the International Federation of Accountants (IFAC) or through the regulatory organization in that jurisdiction appropriate to contact when verifying an accountant's license to practice in that jurisdiction.

**b. Basis of Opinion**

TURKTRUST verifies that the Accounting Practitioner is acting on behalf of the Applicant.

**c. Authenticity**

TURKTRUST confirms the authenticity of the Verified Accountant Letter.

**(B)Acceptable Methods of Verification**

Acceptable methods of establishing the foregoing requirements for a Verified Accountant Letter are listed here:

**a. Status of Author**

TURKTRUST verifies the professional status of the author of the accountant letter by directly contacting the authority responsible for registering or licensing such Accounting Practitioners in the applicable jurisdiction.

**b. Basis of Opinion**

The text of the Verified Accountant Letter must make clear that the Accounting Practitioner is acting on behalf of the Applicant and that the information in the letter is based on the Accounting Practitioner's stated familiarity with the relevant facts and the exercise of the practitioner's professional judgment and expertise. The Verified Accountant Letter may also include disclaimers and other limitations customary in the Accounting Practitioner's jurisdiction, provided that the scope of the disclaimed responsibility is not so great as to eliminate any substantial risk (financial, professional, and/or reputational) to the Accounting Practitioner, should the Verified Accountant Letter prove to be erroneous.

**c. Authenticity**

To confirm the authenticity of the accountant's opinion, TURKTRUST makes a telephone call or send a copy of the Verified Accountant Letter back to the Accounting Practitioner at the address, phone number, facsimile, or (if available) e-mail address for the Accounting Practitioner listed with the authority responsible for registering or licensing such Accounting Practitioners and obtain confirmation from the Accounting Practitioner or the Accounting Practitioner's assistant that the accountant letter is authentic. If a phone number is not available from the licensing authority, TURKTRUST may use the number listed for the Accountant in records provided by the applicable phone company, QGIS, or QIIS.

In circumstances where the opinion is digitally signed, in a manner that confirms the authenticity of the document and the identity of the signer, as verified by TURKTRUST in Section 10.II.(B).a. of this Appendix, no further verification of authenticity is required.

**III. Face-to-Face Validation****(A)Verification Requirements**

Before relying on face-to-face vetting documents submitted to TURKTRUST, TURKTRUST verifies that the Third-Party Validator meets the following requirements:

**a. Qualification of Third-Party Validator**

TURKTRUST independently verifies that the Third-Party Validator is a legally-qualified Notary (or legal equivalent in the Applicant's jurisdiction), Lawyer, or Accountant in the jurisdiction of the individual's residency.

**b. Document Chain of Custody**

TURKTRUST verifies that the Third-Party Validator viewed the Vetting Documents in a face-to-face meeting with the individual being validated.

**c. Verification of Attestation**

If the Third-Party Validator is not a Notary, then TURKTRUST confirms the authenticity of the attestation and vetting documents.

**(B) Acceptable Methods of Verification**

Acceptable methods of establishing the foregoing requirements for vetting documents are:

**a. Qualification of Third-Party Validator**

TURKTRUST verifies the professional status of the Third-Party Validator by directly contacting the authority responsible for registering or licensing such Third-Party Validators in the applicable jurisdiction.

**b. Document Chain of Custody**

The Third-Party Validator must submit a statement to TURKTRUST which attests that they obtained the Vetting Documents submitted to TURKTRUST for the individual during a face-to-face meeting with the individual.

**c. Verification of Attestation**

If the Third-Party Validator is not a Notary, then TURKTRUST confirms the authenticity of the vetting documents received from the Third-Party Validator. TURKTRUST makes a telephone call to the Third-Party Validator and obtains confirmation from them or their assistant that they performed the face-to-face validation. TURKTRUST may rely upon self-reported information obtained from the Third-Party Validator for the sole purpose of performing this verification process. In circumstances where the attestation is digitally signed, in a manner that confirms the authenticity of the documents, and the identity of the signer as verified by TURKTRUST in Section 10.III.(A).a of this Appendix, no further verification of authenticity is required.

**IV. Independent Confirmation From Applicant**

An Independent Confirmation from the Applicant is a confirmation of a particular fact (e.g., knowledge of its exclusive control of a Domain Name, confirmation of the employee or agency status of a Contract Signer or Certificate Approver, confirmation of the EV Authority of a Certificate Approver, etc.) that is:

- Received by TURKTRUST from a Confirming Person (someone other than the person who is the subject of the inquiry) that has the appropriate authority to confirm such a fact, and who represents that he/she has confirmed such fact;
- Received by TURKTRUST in a manner that authenticates and verifies the source of the confirmation; and
- Binding on the Applicant.

An Independent Confirmation from the Applicant may be obtained via the following procedure:

**(A) Confirmation Request**

TURKTRUST initiates a Confirmation Request via an appropriate out-of-band communication, requesting verification or confirmation of the particular fact at issue as follows:

**a. Addressee**

The Confirmation Request is directed to:

- i. A position within the Applicant's organization that qualifies as a Confirming Person (e.g., Secretary, President, CEO, CFO, COO, CIO, CSO, Director, etc.) and is identified by name and title in a current QGIS, QIIS, QTIS, Verified Legal Opinion, Verified Accountant Letter, or by contacting the Applicant's Human Resources Department by phone or mail (at the phone number or address for the Applicant's Place of Business, verified in accordance with this Appendix); or
- ii. The Applicant's Registered Agent or Registered Office in the Jurisdiction of Incorporation as listed in the official records of the Incorporating Agency, with instructions that it be forwarded to an appropriate Confirming Person; or
- iii. A named individual verified to be in the direct line of management above the Contract Signer or Certificate Approver by contacting the Applicant's Human Resources Department by phone or mail (at the phone number or address for the Applicant's Place of Business, verified in accordance with this Appendix).

**b. Means of Communication**

The Confirmation Request is directed to the Confirming Person in a manner reasonably likely to reach such person. The following options are acceptable:

- i. By paper mail addressed to the Confirming Person at:
  - The address of the Applicant's Place of Business as verified by TURKTRUST in accordance with this Appendix, or
  - The business address for such Confirming Person specified in a current QGIS, QTIS, QIIS, Verified Legal Opinion, or Verified Accountant Letter, or
  - The address of the Applicant's Registered Agent or Registered Office listed in the official records of the Jurisdiction of Incorporation, or
- ii. By e-mail addressed to the Confirming Person at the business e-mail address for such person listed in a current QGIS, QTIS, QIIS, Verified Legal Opinion, or Verified Accountant Letter; or
- iii. By telephone call to the Confirming Person, where such person is contacted by calling the main phone number of the Applicant's Place of Business (verified in accordance with these Guidelines) and asking to speak to such person, and a person taking the call identifies him- or herself as such person; or
- iv. By facsimile to the Confirming Person at the Place of Business. The facsimile number must be listed in a current QGIS, QTIS, QIIS, Verified Legal Opinion, or Verified Accountant Letter. The cover page must be clearly addressed to the Confirming Person.

**(B) Confirmation Response**

TURKTRUST receives a response to the Confirmation Request from a Confirming Person that confirms the particular fact at issue. Such response may be provided to TURKTRUST by telephone, by e-mail, or by paper mail, so long as TURKTRUST can reliably verify that it was provided by a Confirming Person in response to the Confirmation Request.

**(C)** TURKTRUST may rely on a verified Confirming Person to confirm their own contact information: email address, telephone number, and facsimile number. TURKTRUST may rely on this verified contact information for future correspondence with the Confirming Person if:

- a. The domain of the e-mail address is owned by the Applicant and is the Confirming Person's own e-mail address and not a group e-mail alias,
- b. The Confirming Person's telephone/fax number is verified by TURKTRUST to be a telephone number that is part of the organization's telephone system, and is not the personal phone number for the person.

**V. Qualified Independent Information Source (QIIS)**

A Qualified Independent Information Source (QIIS) is a regularly-updated and current, publicly available, database designed for the purpose of accurately providing the information for which it is consulted, and which is generally recognized as a dependable source of such information. A commercial database is a QIIS if the following are true:

- (A) Data it contains that will be relied upon has been independently verified by other independent information sources;
- (B) The database distinguishes between self-reported data and data reported by independent information sources;
- (C) The database provider identifies how frequently they update the information in their database;
- (D) Changes in the data that will be relied upon will be reflected in the database in no more than 12 months; and
- (E) The database provider uses authoritative sources independent of the Subject, or multiple corroborated sources, to which the data pertains.

Databases in which TURKTRUST or its owners or affiliated companies maintain a controlling interest, or in which any Registration Authorities or subcontractors to whom TURKTRUST has outsourced any portion of the vetting process (or their owners or affiliated companies) maintain any ownership or beneficial interest do not qualify as a QIIS. TURKTRUST checks the accuracy of the database and ensure its data is acceptable.

**VI. Qualified Government Information Source (QGIS)**

A Qualified Government Information Source (QGIS) is a regularly-updated and current, publicly available, database designed for the purpose of accurately providing the information for which it is consulted, and which is generally recognized as a dependable source of such information provided that it is maintained by a Government Entity, the reporting of data is required by law, and false or misleading reporting is punishable with criminal or civil penalties.

**VII. Qualified Government Tax Information Source (QTIS)**

A Qualified Government Tax Information Source is a Qualified Government Information Source that specifically contains tax information relating to Private Organizations, Business Entities or Individuals.

**11. Other Verification Requirements****I. High Risk Status****(A) Verification Requirements**

TURKTRUST endeavors to identify High Risk Applicants, and conduct such additional verification activity, and take such additional precautions, as are reasonably necessary to ensure that such Applicants are properly verified.

**(B)Acceptable Methods of Verification**

TURKTRUST may identify High Risk Applicants by checking appropriate lists of organization names that are most commonly targeted in phishing and other fraudulent schemes, and automatically flagging EV Certificate Requests from Applicants named on these lists for further scrutiny before issuance. Examples of such lists include:

- a. Lists of phishing targets published by the Anti-Phishing Work Group (APWG); and.
- b. Internal databases maintained by TURKTRUST that include previously revoked EV Certificates and previously rejected EV Certificate Requests due to suspected phishing or other fraudulent usage.

The information is then be used to flag suspicious new EV Certificate Requests. If an Applicant is flagged as a High Risk Applicant, TURKTRUST performs reasonably appropriate additional authentication and verification to be certain beyond reasonable doubt that the Applicant and the target in question are the same organization.

**II. Denied Lists and Other Legal Black Lists****(A) Verification Requirements**

TURKTRUST verifies whether the Applicant, the Contract Signer, the Certificate Approver, the Applicant's Jurisdiction of Incorporation, Registration, or Place of Business:

- a. Is identified on any government denied list, list of prohibited persons, or other list that prohibits doing business with such organization or person under the laws of the country of TURKTRUST's jurisdiction(s) of operation; or
- b. Has its Jurisdiction of Incorporation, Registration, or Place of Business in any country with which the laws of TURKTRUST's jurisdiction prohibit doing business.

TURKTRUST does not issue any EV Certificate to the Applicant if either the Applicant, the Contract Signer, or Certificate Approver or if the Applicant's Jurisdiction of Incorporation or Registration or Place of Business is on any such list.

**(B)Acceptable Methods of Verification**

TURKTRUST takes reasonable steps to verify with the following lists and regulations:

- a. TURKTRUST, about its operations in the U.S., takes reasonable steps to verify with the following US Government denied lists and regulations:
  - BIS Denied Person List - <http://www.bis.doc.gov/dpl/thedeniallist.asp>
  - BIS Denied Entities List - <http://www.bis.doc.gov/entities/default.htm>
  - US Treasury Department List of Specially Designated Nationals and Blocked Persons - <http://www.treas.gov/ofac/t11sdn.pdf>
  - US Government export regulations
- b. TURKTRUST, about its operations in any other country, takes reasonable steps to verify with all equivalent denied lists and export regulations (if any) in such other country.

**12. Final Cross-Correlation and Due Diligence**

After all of the verification processes and procedures are completed, the EV SSL application is cross-controlled and passed through a final approval under the TURKTRUST Certification Services Department. This last control is performed by a person who is not involved in the previous steps of the related application. This person may obtain and document further explanation or clarification from the Applicant, Certificate Approver, Certificate Requester, Qualified Independent Information Sources, and/or other sources of information, as necessary, to resolve those discrepancies or details that require further explanation. After completing all the control steps, if the application is found to be valid and accurate, it is approved and the EV SSL certificate is issued.

**13. Requirements for Re-use of Existing Documentation****I. For Validated Data**

**(A)** The age of validated data used to support issuance of an EV Certificate (before revalidation is required) shall not exceed the following limits:

- a. Legal existence and identity – thirteen months,
- b. Address of Place of Business – thirteen months, but thereafter data may be refreshed by checking a Qualified Independent Information Source, even where a site visit was originally required,
- c. Telephone number for Place of Business – thirteen months,
- d. Bank account verification – thirteen months,
- e. Domain Name – thirteen months,
- f. Identity and authority of Certificate Approver – thirteen months,

**(B)** The age of information used by TURKTRUST to verify such an EV Certificate Request must not exceed the Maximum Validity Period for such information set forth above, based on the date the information was last updated by the QIIS, QGIS, or QTIS.

**(C)** TURKTRUST may issue multiple EV Certificates listing the same Subject and based on a single EV Certificate Request, subject to the aging and updating requirement stated above.

**(D)** Each EV Certificate issued by TURKTRUST is supported by a valid and current EV Certificate application form signed by the appropriate Applicant Representative on behalf of the Applicant or Terms of Use acknowledged by the appropriate Applicant Representative.

**(E)** In the case of outdated information, TURKTRUST repeats the verification processes required in this Appendix.

**II. Validation for Existing Subscribers**

In conjunction with an EV Certificate Request placed by an Applicant who is already a customer of TURKTRUST, TURKTRUST performs all authentication and verification tasks required by this Appendix to ensure that the request is properly authorized by the Applicant and that the information in the EV Certificate will still be accurate and valid.

**III. Exceptions**

Notwithstanding the requirements set forth in Section 13.I and Section 13.II of this Appendix, when performing the authentication and verification tasks for issuing an

EV Certificate where the Applicant has a current valid EV Certificate issued by TURKTRUST, TURKTRUST may

**(A)** Rely on its prior authentication and verification of:

- a. The Applicant's Place of Business under Section 4.I. of this Appendix,
- b. The telephone number of the Applicant's Place of Business required by Section 4.II of this Appendix but still performs the verification required by Section 4. II. (B) a. of this Appendix,
- c. The Applicant's Operational Existence under Section 5. of this Appendix,
- d. The name, title, and authority of the Contract Signer, Certificate Approver, and Certificate Requester, except where a contract is in place between TURKTRUST and the Applicant that specifies a specific term for the authority of the Contract Signer, and/or the Certificate Approver, and/or Certificate Requester in which case, the term specified in such contract will control;
- e. The email address used by TURKTRUST for independent confirmation from the Applicant under 10. IV. (A) b. (ii) of this Appendix.

**(B)** Rely on a prior Verified Legal Opinion or Accountant Letter that established:

- a. The Applicant's exclusive right to use the specified Domain Name under Section 6.II.(B).a.i. and Section 6.II.(B).b.i. of this Appendix, provided that TURKTRUST verifies that either:
  - i. The WHOIS record still shows the same registrant as indicated when TURKTRUST received the prior Verified Legal Opinion or Verified Accountant Letter, or,
  - ii. The Applicant establishes domain control via a practical demonstration as detailed in Section 6.II.(B).b.ii of this Appendix.
- b. That the Applicant is aware that it has exclusive control of the Domain Name, under Section 6.II.(C) of this Appendix.

#### **IV. Validation of Re-issuance Requests**

TURKTRUST may rely on previously verified information to issue a replacement certificate where:

- (A)** The expiration date of the replacement certificate is the same as the expiration date of the currently valid EV Certificate that is being replaced, and
- (B)** The Subject of the Certificate is the same as the Subject in the currently valid EV Certificate that is being replaced.
