### Validator Component

Called/Used by Developer
Component
Runs Validation tests for the
addon

Runs all Test Categories

#### File

Add: hasMany Test Results

## **Developer Component**

Need to Remove various validate\* calls, move them into test cases if they contain actual validation, Validator component if they contain logic.

Need to add calls to get the current status of a review

# **Test Category**

Name Group Tier Critical (i.e., don't run children on failures) Type (extension, theme, general)

Has many test Cases

### Test Result

Line Number
Result (Fail, Warn, Pass)
Reason
Help Link
Timestamp (date test was
run)

### **Developer Views**

Modify Uploader to accommodate new test structure, namely adding ajax calls where needed

Modify Addon\_status to include latest test status for addons

# Test Case

File to run, should contain a test function that we can call Name
