Test for Profile Housekeeping

<u>Setup</u>

1. Establish two profiles: A and B. (They may have other names but are cited here as A and B. If more than two profiles already exist, there is no adverse impact on these test cases.)

2. Open the SeaMonkey browser in profile A.

3. On the menu bar, select [Edit > Preferences].

4. On the Browser pane of the Preferences window, select the "Home page" radio button for each of the three items in the "Display on" selection list.

5. On the Browser pane, use the "Choose File" button in the "Home Page" area to navigate to and select the bookmarks file for Profile A.

6. Switch to profile B.

7. On the menu bar, select [Edit > Preferences].

8. On the Browser pane of the Preferences window, select the "Home page" radio button for each of the three items in the "Display on" selection list.

9. On the Browser pane, use the "Choose File" button in the "Home Page" area to navigate to and select the bookmarks file for Profile B.

<u>Test Case A</u>

1.   Open the SeaMonkey browser in profile A.

2.   Browse to a Web page that is not the home page.

3.   Switch to profile B.

4.   Browse to a Web page that is not the home page.

5.   Switch to profile A.

6.   Switch to profile B.

7.   Switch to profile A.

8.   Terminate SeaMonkey.

9.   Ensure that no remnant of SeaMonkey is still operating in the background.

10.   Using the Profile Manager, open the SeaMonkey browser in profile B. (Since the last profile used was A, it is necessary to use the Profile Manager to start in B.)

11.   Switch to profile A.

Results

- At step #5, the home page for profile A is displayed.

- At step #6, the page seen in step #4 is displayed.

- At step #10, the page seen in step #4 is displayed.

- At step #11, the home page for profile A is displayed.

Test Case B

1.   Open the SeaMonkey browser in profile A.

2.   Browse to a Web page that is not the home page.

3.   Open a tab to another page that is not the home page.

4.   Switch to profile B.

5.   Browse to a Web page that is not the home page.

6.   Open a tab to another page that is not the home page.

7.   Terminate SeaMonkey.

8.   On the Quit SeaMonkey dialogue popup, select the Quit button.

9.   Ensure that no remnant of SeaMonkey is still operating in the background.

10.   Using the Profile Manager, open the SeaMonkey browser in profile A. (Since the last profile used was B, it is necessary to use the Profile Manager to start in A.)

11.   Switch to profile B.

Results

- At step #10, both tabs are open. They display the pages that were seen in steps #2-3.

- At step #11, the home page for profile B is displayed.

Test Case C

1.   Open the SeaMonkey browser in profile A.

2.   Browse to a Web page that is not the home page.

3.   Switch to profile B.

4.   Browse to a Web page that is not the home page.

5.   Open a tab to another page that is not the home page.

6.   Drag the left-hand tab to the right of the right-hand tab.

7.   Close the current (new) left-hand tab.

8.   Switch to profile A.

9.   Terminate SeaMonkey.

10.   Ensure that no remnant of SeaMonkey is still operating in the background.

11.   Using the Profile Manager, open the SeaMonkey browser in profile A.

12.   Switch to profile B.

Results

- At step #8, the page seen in step #2 is displayed.

- At step #11, the home page for profile A is displayed.

- At step #12, the two tabs seen at step #6 are displayed. That is, the tab closed in step #7 is reopened.
