

## Test A

(This requires a configuration with a local (i.e., non-Internet) home page with links to non-local pages on the Internet.)

1. Cleared the browser cache.
2. While connected to the Internet, went to `<http://www.rossde.com/>`.
3. Clicked on the Online/Offline icon to go offline.
4. On the open Web page, selected a link to `<http://rsrpd.org/>` with middle mouse button to open in a new tab.
5. Selected link from `<http://www.rossde.com/>` to `<http://rsrpd.org/>` using middle-click to get new tab.
6. Got error popup over a blank page. Address area contained `<http://rsrpd.org/>`. Tab contained title "Untitled".

7. Selected OK button on the popup.
8. Closed tab. Remaining page (original tab) was blank with `<http://rsrpd.org/>` in the address area instead of `<http://www.rossde.com/>`. Neither [Go > Home] nor [File > Recently Closed Tabs > ] menu functions worked.
9. Using [File > New > Browser Tab] on the menu bar, opened a new tab. Home page for profile appeared in the new tab. The original tab refreshed with the state it had just before step #4, including the correct URI `<http://www.rossde.com/>` in the address area.

## Test B

(This requires a configuration with at least two distinct profiles. Each profile should have a local (i.e., non-Internet) home page with links to non-local pages on the Internet.)

1. Deleted the cache for both profiles.

2. While connected to the Internet, went to <<http://www.rossde.com/>>.
3. Terminated the browser.
4. Disabled the Internet connection.
5. Launched the browser.
6. Selected the Online/Offline icon on the browser window to go offline.
7. Again went to <<http://www.rossde.com/>>, this time getting the cached page.
8. Used the Profile Manager to change to the second profile.
9. Enabled the Internet connection.
10. Observed that the Online/Offline icon on the browser window indicated online.
11. Went to <[http://www.google.com/advanced\\_search?hl=en](http://www.google.com/advanced_search?hl=en)>.
12. Used the Profile Manager to change back to the first profile.
13. Observed that the Online/Offline icon on the browser window still indicated offline.
14. Attempted to go to <<http://www.cbc.ca/news/>> from home page (which displays bookmarks file containing that link) using middle-click to get new tab.
15. Obtained the same error popup observed in Test A step #6.
16. Selected OK button on the popup.
17. Closed tab. Remaining page (original tab) was blank with <<http://www.cbc.ca/news/>> in the address area. Neither [Go > Home] nor [File > Recently Closed Tabs > ] menu functions worked.
18. Using [File > New > Browser Tab] on the menu bar, opened a new tab. Home page for profile appeared in the new tab. The original tab refreshed with the home page.
