

# Installing Firefox

## Windows 2000/XP:

1. Insert the CD, the Firefox installer will start automatically.  
- If it doesn't, begin the process by clicking on Start, Run, and then the Browse button.  
- Go to My Computer to find the CD-ROM/DVD drive, open Windows and then double click "FirefoxSetup3.6.exe".
2. Grant permission to launch the setup wizard by clicking **OK** continue.
3. Follow the prompts and instructions in the setup wizard.
4. Double click the "Mozilla Firefox" icon on your desktop and start browsing!

## Windows Vista:

1. Insert the CD.
2. Double click on "FirefoxSetup3.6.exe" to start the installer.
3. Grant permission to launch the setup wizard by clicking **OK** continue.
4. Follow the prompts and instructions in the setup wizard.
5. Double click the "Mozilla Firefox" icon on your desktop and start browsing!

## Mac OS X (10.4 and higher):

1. Insert the CD.
2. Open the CD icon on your desktop.
3. Open the "Mac OS X" folder.
4. Double click the Firefox 3.6 disk image "Firefox 3.6.dmg".
5. Click to Accept the End-User License Agreement.
6. Drag the "Firefox" icon to your Applications folder.
7. Open your Applications folder and double click "Firefox" to start browsing!
