

Stay in Sync With Your Firefox

Access your history, bookmarks and even open tabs across all your devices.

Why Sync Up?

Get Up and Go

Doing online research from the office, only to see it's time to head home? Now you can go back to your opened tabs and search history in an instant from any PC. Your Firefox is as you left it, no matter where you log in.

Backup Your Info

All your settings, passwords, bookmarks, and other customizations are saved in a more universal way, not tethered to a single machine. If you replace a device, you don't lose your Firefox.

Security

Your information is encrypted so only you can access it when you enter a Secret Phrase. Firefox puts security as a top priority and syncing is no exception.

Why Get Weave Sync?

Typing is hard

Let's face it, typing on your mobile is difficult. A bid farewell to typing long URLs and search terms when the Awesome Bar remembers your history, bookmarks and tabs from both your PC and mobile, quickly getting you where you want to go and with very little typing.

Don't start from scratch

Say goodbye to resetting and retying. Weave Sync syncs your Firefox passwords and preferences, so you can hit the ground running.

Get up and go

Take your Firefox with you wherever you go. Surf the Web on your PC, get up and go, and have everything waiting for you on your phone: your history, open tabs, bookmarks, the Awesome Bar - just as you had left it.

Getting Started

1. Install Weave Sync on your PC

Make sure your PC runs Firefox 3.5 or higher and your phone is a Firefox-tested device (upgrade Firefox).

- Download Weave Sync

After the download is complete, click "Restart Firefox" to finish installing the Weave Sync Add-on.

When Firefox restarts, use the "Tools" menu or the Weave Sync icon on the bottom-right of the status-bar to open Weave Sync and sign in.

2. Install the Weave Sync add-on on your mobile

Go your Preferences, select the add-ons button.

Search for and select the Weave Sync add-on. Sign in, sync, and away you go.

Get Started

1. Install the free [Firefox Sync Add-on](#).
2. Restart Firefox and follow prompts to create an account with both a password and a Secret Phrase.
3. Install Firefox Sync on all the other devices you use.
4. Sign-in and choose how to sync, then start browsing where you left off.
