## Sync your desktop and mobile browsing

**WebSync**  is an add-on that lets you bring your desktop history, bookmarks, passwords, and open tabs to your mobile.

To synchronize seamlessly, create a WebSync account on your desktop and install the WebSync add-on to your Nokia N900. [Learn more and get started using WebSync.](#) 

Imagine an Awesome Bar (Smart Location Bar) that knows your Web history regardless of which device you visited it on – home desktop, work laptop, or mobile.

Leverage years of desktop browsing on the first day you fire up your mobile. Even your saved passwords from your desktop can be used to automatically fill out forms.

## Super-charge your search

As you type, the Awesome Bar (Smart Location Bar) will display websites that you frequently or recently have visited or bookmarked. It learns as you use it, adapting to your preferences and making your browsing more personal

Tap the Awesome Bar to enter a URL or search term and send your search directly to Google, Wikipedia, Amazon.com, or Twitter with one touch. Add search engines for many websites using the Instant Web Site ID icon located next to the Awesome Bar text field

[Return to top](#)

## Customize your browser

**Add features that help make your browser your own. Firefox is the world's only mobile Web browser to support add-ons**

Discover and install add-ons directly from your mobile. Check out our growing catalog of [mobile add-ons](#)

Any developer in the world can [build a mobile add-on for Firefox](#), or easily adapt an existing one to be optimized for mobile

We recommend installing the [Web Sync add-on](#) to sync your mobile and desktop browsing

Set your Preferences to your liking. Access your browser tools with one touch to get more Firefox product information, change languages, manage content and privacy settings

Thumbnails of your open tabs lets you easily identify your open pages

Spell Checker catches typos and misspellings in form fields

### Type Less

**If you've ever been there before, the Awesome Bar's practically found your search result before you've typed a couple keys**

Access your favorite search engines from the title bar in just one tap

Bookmark a website in one touch and optionally tag it with a memorable term

Password Manager lets you choose to remember site passwords so you don't have to type them more than once

### Privacy & Security

Customize your settings for passwords, cookies, loading images and installing add-ons for a fully empowered mobile browsing experience

Instant Web site ID ("Larry") lets you tap on a site favicon for an instant identity overview

The Password manager lets you choose to remember site passwords and avoid long and difficult typing

Popup blocker banishes pop-ups from your surfing experience once and for all

Clear private data in one touch as an extra security measure

Receive Automated Update notifications as soon as updates to Firefox are available. Install them right away, or wait until you're ready

### Touch Friendly Interface

Touch screen lets you swipe to either side to access your open tabs or browser controls

Start scrolling and browser controls get stored away out of view

Single-tap to zoom in, double-tap to zoom back out

### Performance & Productivity

Optimized for power and efficiency, Firefox for mobile is built on the same browser engine as Firefox for the desktop, letting you interact with and enjoy your favorite sites

Offline browsing in Firefox lets you have a Web connection even if your mobile device doesn't have one. Certain enabled sites may allow applications—like your Web-based email—to stay with you at all times

Memory Management in Firefox uses less of your mobile phone's memory while it's running so you can browse all your favorite sites with speed

Downloads Manager lets you download any file to your mobile. It will download in the background while you continue browsing, enables multiple simultaneous downloads, and lets you to stop, pause or resume downloads

## Global Community

Firefox for mobile is offered in more than 30 languages and counting

Improved text rendering lets you read your language as it's written. With a new graphics engine, Arabic, Dutch, Hebrew and other script languages now render seamlessly

Mozilla is a global community of people creating a better Internet

## Under the Hood

Firefox's leading Web compatibility uses open standards like [HTML5](#), [CSS](#) and [JavaScript](#), so developers can create fast, powerful, beautiful applications, and even tap into the unique capabilities of mobile devices like camera, [geolocation](#) and [device orientation](#). Learn more and [develop for Mobile](#).

Firefox has a fast JavaScript engine, using Mozilla's "TraceMonkey" just-in-time compiler, and is optimized for ARM processors

Offline browsing in Firefox lets you have a Web connection even if your mobile device

doesn't have one. Certain enabled sites may allow applications—like your Web-based email—to stay with you at all times

Next Generation Graphics in Firefox renders text and graphics, including [SVG](#) and [Canvas](#), faster and sharper than ever before, thanks to our upgraded graphics engine

---

## Location-Aware Browsing

Get maps and info relevant to your location. Saves time by allowing Web sites to ask you where you are. It's all optional – Firefox doesn't share your location without your permission. [Learn more.](#)
