In Firefox 4 printing seems to have changed in a way that negatively impacts PDF printing. I tried using Acrobat Distiller, FreePDF, PDFCreator, NitroPDF Pro. Changes to Firefox 4 seem to make it impossible to pass of text to a ghostscript style PDF printer rather it hands off all the text as images which makes the PDF files much larger and none searchable. Is there a way to disable this behavior in Firefox 4 so that works like it did in 3?

I tested with a completely new profile and a new installation. No extra extensions, themes or plugins are installed.

Reproducible: Always

Steps to Reproduce:

1. Open a webpage with text (any)
2. Print with any PDF-printer (for example: Acrobat Distiller, FreePDF, PDFCreator)
3. open PDF-file in PDF-viewer (any, for example: Adobe Reader, Fxif, Sumatra)

Actual Results:

All the text is as image which makes the PDF files much larger and none searchable

Expected Results:

Text should be searchable.

As a workaround I have foubnd this: Run Firefox 4 in Safe Mode, which disables all addons. The PDF when printed will be searchable and very low in size.

The key now is to find out which addon is breaking this function. Hope others can do some testing and shed some light on this.

Additional Comments:

Status: UNCONFIRMED
