Tabs on Top-

-Would be great to feature the same websites, but make sure they're the localized version of each.
-Would be awesome to include the Arrow

Firefox Button

-Would be great to feature the same websites, but make sure they're the localized version of each.
-Would be awesome to include the Arrow

Switch to Tab

-Would be great to feature the same websites, but make sure they're the localized version of each.
-Would be awesome to include the Arrow

Bookmarks Button

-Would be great to feature the same websites, but make sure they're the localized version of each.
-Would be awesome to include an arrow pointing to the Button
-Make sure to take **Mac** version, not windows.

Simplified Stop/Reload Button
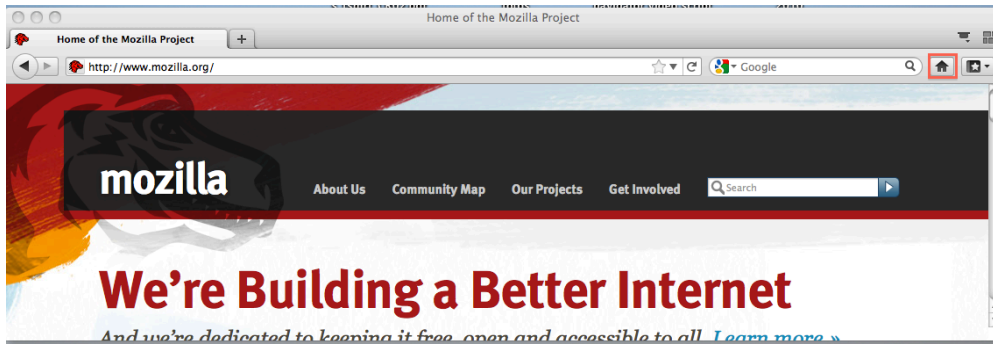

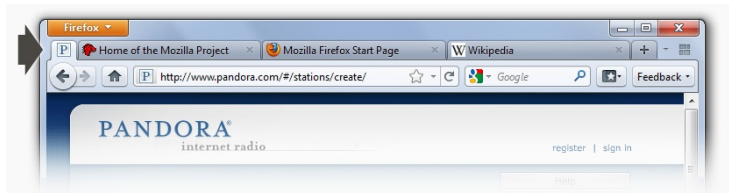

-Would be great to feature the same website, but make sure they're the localized version of each.
-Would be awesome to include an arrow pointing to the Button

Home of the Mozilla Project

Home Button
-Would be great to feature the same website, but make sure they're the localized version of each.
-Would be awesome to include an arrow pointing to the Button

App Tabs

-Would be great to feature the same websites, but make sure they're the localized version of each.
-Would be awesome to include the Arrow
-Would be awesome to do more than 1 App Tab.
-ideas include Gmail, Google Calendar, Ebay, Facebook

Panorama
-Would be great to feature the same websites, but make sure they're the localized version of each.

Add-Ons Manager

-Would be cool to take the shot of the "get Add-ons" category, not the Plugins category.
