#### Technical information about each root certificate

Certificate Name	SG TRUST SERVICES RACINE
Certificate Issuer Field	CN = SG TRUST SERVICES RACINE OU = SG TRUST SERVICES O = GROUPE SG
Certificate Summary	SG TRUST SERVICES RACINE has two internally-operated intermediate certificates, one for authentication certificates and another for signing certificates.
Root Cert URL	<a href="https://bugzilla.mozilla.org/attachment.cgi?id=537544">https://bugzilla.mozilla.org/attachment.cgi?id=537544</a>
SHA1 Fingerprint	A1:1F:B9:2D:BE:35:C9:21:C1:EA:99:B1:EB:FA:2C:43:E3:EE:84:89
Valid From	2003-07-22
Valid To	2023-07-22
Certificate Version	3
Cert Signature Algorithm	PKCS #1 SHA-1 With RSA Encryption
Signing key parameters	2048
Example Certificate (non-SSL)	<a href="https://bugzilla.mozilla.org/attachment.cgi?id=544773">https://bugzilla.mozilla.org/attachment.cgi?id=544773</a> We attached you users' certificate (authentication and signing) : the private key password is : #SGTS2011.

CRL URL	<a href="http://crl.sgtrustservices.com/racine-GroupeSG/LatestCRL">http://crl.sgtrustservices.com/racine-GroupeSG/LatestCRL</a> <a href="http://crl.sgtrustservices.com/SGTS-2Etoiles/LatestCRL">http://crl.sgtrustservices.com/SGTS-2Etoiles/LatestCRL</a> (NextUpdate: 6 days)
OCSP URL	None
Requested Trust Bits	Email (S/MIME) Comment #9: Certificate issued by "SG TRUST SERVICES RACINE" root certificate are for authentication and signature usages. So we only need the email trust bit to be active.
Validation Type	IV
EV Policy OID(s)	Not EV

#### CA Hierarchy information for each root certificate

CA Hierarchy	SG TRUST SERVICES RACINE has two internally-operated intermediate certificates, one for authentication certificates and another for signing certificates.
Externally Operated SubCAs	None
Cross-Signing	None
Technical Constraints on third party issuers	Not applicable

#### Verification Policies and Practices

Policy Documentation	Document Repository: <a href="http://www.sgtrustservices.com/entreprise/pc/index.htm">http://www.sgtrustservices.com/entreprise/pc/index.htm</a> CP for Authentication and Encryption Certs (French): <a href="http://www.sgtrustservices.com/entreprise/pc/authentication/index.htm">http://www.sgtrustservices.com/entreprise/pc/authentication/index.htm</a> CP for Signing Certs (French): <a href="http://www.sgtrustservices.com/entreprise/pc/signature/index.htm">http://www.sgtrustservices.com/entreprise/pc/signature/index.htm</a>  CP for 2-Star Certs (French): <a href="https://www.sgts.rgs2e.sgtrustservices.com/doc/PC/SG_TS_2E_PC_Authentication.pdf">https://www.sgts.rgs2e.sgtrustservices.com/doc/PC/SG_TS_2E_PC_Authentication.pdf</a> CP for 2-Star Certs (English translation of some sections): <a href="https://bugzilla.mozilla.org/attachment.cgi?id=560318">https://bugzilla.mozilla.org/attachment.cgi?id=560318</a>
Audits	Audit Type: ETSI 102 042 Auditor: LSTI Auditor Website: <a href="http://www.lsti-certification.fr/">http://www.lsti-certification.fr/</a> ETSI Certificate: <a href="https://bugzilla.mozilla.org/attachment.cgi?id=537541">https://bugzilla.mozilla.org/attachment.cgi?id=537541</a> (2011.05.11) On LSTI website: <a href="http://www.lsti-certification.fr/images/stories/listergs_07032011.pdf">http://www.lsti-certification.fr/images/stories/listergs_07032011.pdf</a> (Last page, audited to RGS V1.0, SG TS 2ETOILES for authentication and signature)
SSL Verification Procedures	N/A. Not requesting the website trust bit.
Organization Verification Procedures	CA is qualified for RGS level two stars. CP for 2-Star Certs Section 3.2.3.3 describes the steps to verify and register a Certificate Manager (the customer) English translations provided <a href="https://bugzilla.mozilla.org/attachment.cgi?id=560318">https://bugzilla.mozilla.org/attachment.cgi?id=560318</a> - The Legal Representative also signs the subscription contract between the organisation to which they belong (the Client) and SG Trust Services. - The Legal Representative must provide the future Manager with a "K-bis" certifying the company's registration with a

	<p>French trade and companies register (or any similar trade register for foreign entities) or an identification certificate from the Répertoire National des Entreprises et de leurs Établissements database. Legal Representatives of an association must provide a copy of the Journal Officiel containing the mention of their organisation as well as a copy of its articles of association and the minutes of the last Annual General Meeting during which an executive was appointed.</p> <ul style="list-style-type: none"> <li>- The Customer account manager meets with the future CM in person and checks their proof of identity.</li> <li>- The Customer account manager validates the appointment of the Certificate Manager and verifies that: <ul style="list-style-type: none"> <li>-- The Registration File is complete.</li> <li>-- The Legal Representative has signed the Certificate Manager Identification Form and the subscription contract.</li> <li>-- The future Certificate Manager has signed the Certificate Manager Identification Form.</li> <li>-- The information in the Certificate Manager Identification Form is consistent with both the ID card (for personal ID information) and the subscription contract (for the organisation's information).</li> </ul> </li> </ul>
<p>Explanation of Certificate Manager (Comment #32)</p>	<p>Registration service is a group of person of SG Trust Services. Only Registration Operators, in the Registration Service (group of person of SG Trust Services formerly identified by Head of the CA) can approve certificate issuance.</p> <p>Certificate Manager is a person into a client company of SG Trust Services who can:</p> <ul style="list-style-type: none"> <li>- Collect the registration document (Individual Subscriber Request) of the Subscriber;</li> <li>- Valid the registration documents before sending to registration service;</li> <li>- Make sign Disclosure Statement to the Subscriber;</li> </ul> <p>Each Certificate Manager meets the registration service of SG Trust Service in face to face. The Legal Representative must provide the future Manager with a "K-bis" certifying the company's registration with a French trade and companies register (or any similar trade register for foreign entities) or an identification certificate from the "Répertoire National des Entreprises et de leurs Établissements" database. Legal Representatives of an association must provide a copy of the "Journal Officiel" containing the mention of their organization as well as a copy of its articles of association and the minutes of the last Annual General Meeting during which an executive was appointed.</p> <p>Registration Service validates each subscriber's registration demand by:</p> <ul style="list-style-type: none"> <li>- Validating that the Certificate Manager who provide the registration documents are well-known;</li> <li>- Validating the completion of registration documents;</li> <li>- Validating the copy of the subscriber's identity card;</li> <li>- Compare signature of disclosures statements and signature of the identity card.</li> </ul>
<p>Email Address Verification Procedures</p>	<p>Comment #32: The email address is provided by subscriber into the documents registration. The Certificate Manager verifies that the email is correct and is attached to his organization before sending to Registration Service. In technical process, only the subscriber can receive into the email declared on registration documents the install URL of his certificate.</p> <p>CA is qualified for RGS level two stars. CP for 2-Star Certs Section 3.2.3.4 describes the steps that the Certificate Manager (the customer) takes to register a certificate subscriber. English translations provided <a href="https://bugzilla.mozilla.org/attachment.cgi?id=560318">https://bugzilla.mozilla.org/attachment.cgi?id=560318</a></p>

	<p>The following procedure is systematically applied:</p> <ul style="list-style-type: none"> <li>- The future Subscriber must bring the Certificate Manager his ID card.</li> <li>- The Certificate Manager verifies that the person present matches the ID card.</li> <li>- The Certificate Manager photocopies the proof of identity adding "Certified Copy" and signs it. The Subscriber also signs the photocopy of the ID card.</li> <li>- The Certificate Manager ensures that the future Subscriber is authorised to use the certificates on behalf of the Client.</li> <li>- The Certificate Manager asks the Subscriber to complete and sign the Individual Subscriber Request Form. He ensures that the identity information filled in by the Subscriber matches the information on the ID card.</li> </ul> <p>The Certificate Manager sends the registration file to the Customer account manager. The registration file of a new Subscriber includes:</p> <ul style="list-style-type: none"> <li>- The Individual Subscriber Request (ISR) form dated less than 3 months prior, completed and signed both by the future Subscriber and the CM.</li> <li>-- The ISR form includes personal information on the future Subscriber required for creating the certificate.</li> <li>-- The ISR form includes the General Terms and Conditions of Use.</li> <li>- The photocopy of the Certificate Subscriber's ID card, signed by the Certificate Manager and the Subscriber.</li> </ul> <p>Comment #6: Subscribers must provide complete registration information. To obtain a cryptographic support and install their certificate, they must meet a registration operator who checks the identity paper of the subscriber.</p>
Code Signing Subscriber Verification Procedures	N/A. Not requesting the code signing trust bit.
Multi-factor Authentication	<p>Translation of CP section 2.4: Published datas are accessible in read mode to all people concerning by certificates signed by SG Trust Services (Internet Access). Adding, deleting and modifications are limited only to authorized persons defining by Head of the CA.</p> <p>Registration Operators and PKI's administrators can access data, including status of certificates (adding, deleting or modification process) by personal authentication certificate stored on SSCD, after obtaining a particular accreditation.</p> <p>Technical administrators of the publication web site can access data, including status of certificates (adding, deleting or modification process) by personal two-factor authentication, after obtaining a particular accreditation.</p> <p>Data transfer from PKI's administrators to Technical administrators of the publication web site is done throw a secured channel to maintain data's integrity.</p>
