This time, I checked the rror file and found:

2012-03-14 20:54:13   gloda.datastore ERROR got error in _asyncTrackerListener.handleError(): 19:
PRIMARY KEY must be unique

Compating the folder did nothing, but when I tried "Repair" the entry was also over-written by the prior email:

Hi Barry
We have recently been appointed the Australian distributor for TMA winches Italy
I have attached a brief brochure for your information.
I hope this is of some interest.
Regards Graeme Calder
