

Apple iPhone 5

Powered by the new iOS 6 operating system, it comes with a new map service that provides voice-guided navigation. This makes it a viable alternative to portable navigation devices. It is the thinnest and lightest LTE smartphone.

Samsung Galaxy S III LTE

The Samsung Galaxy S III LTE has a unique feature known as Smart Stay. When your eyes are reading the screen, the smartphone will set the display brightness at a comfortable level for reading. The screen switches off automatically once your eyes leave the screen.

HTC One XL

While the HTC One XL lacks the quad-core engine of the HTC One X, it packs in the same features, like the burst shooting mode that captures 99 images continuously. Users can also snap a photo while shooting video.
