App Builder Powered by Mortar Learn more about Mortar

1 What kind of app are you building?

General app   2D games

2 What layout will it have?
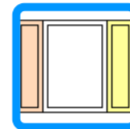

empty canvas | 3 column (holy grail) | 3 column (blog style) | 2 column (left menu) | 2 column (right menu) | multi column stacked
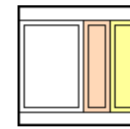

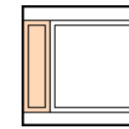

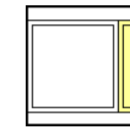

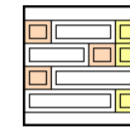

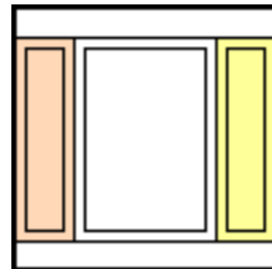

3 column (holy grail)
The most common website layout is the three column.

- It is also the most difficult one to get right
- The main page is in the center
- With a narrow column on either side.

3 (Optional) Select x-tags, modules and libraries to go with it

tab box
A container used to display
a set of tabbed pages
of elements.
view demo
