

Ulrich Mikloweit

"Small Stellated Truncated Dodecahedron (Wenninger Number 97)"

Xerographic paper, 24 cm in diameter, 2001.

Ulrich Mikloweit
Essen, Germany

"The objects of my art are paper polyhedron models, most preferable uniform ones. The nets are constructed on a computer and printed on white paper of 80 g/m². They are cut out with scissors and knives and assembled with glue. My initial motivation came from pictures of M. C. Escher. "
