

Overscroll Handling – Option 1 – Overscroll page

If user scrolls beyond the
end of a page, page
overscrolls and reveals a
background image

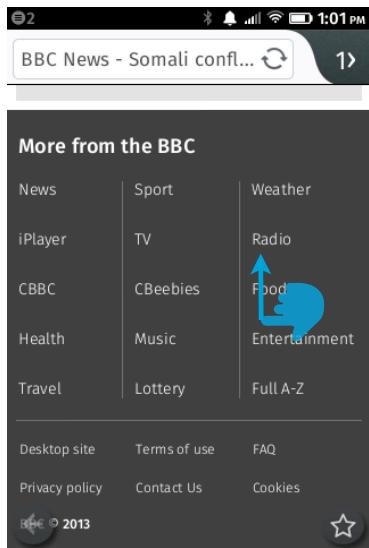

Overscroll Handling – Option 2 – Collapse buttons down to indicator

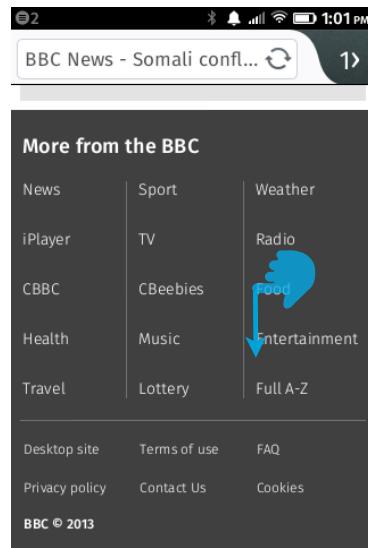

If user scrolls beyond the end of a page, the buttons collapse down to a visual indicator.

Swiping from the bottom of the page makes the buttons reappear. Alternatively, scrolling up the page makes the buttons reappear, as per option 3.

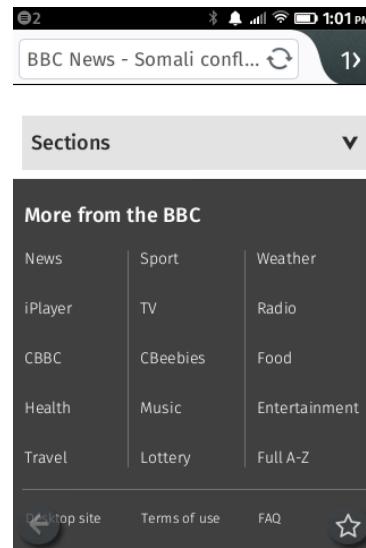

Overscroll Handling – Option 3 – Make buttons disappear/reappear
