

**Devhub content page template:  
Navigation change**

**Objective:** In order to support a deeper hierarchy than we currently have, we need to redesign the primary navigation for the content pages. Luckily, Mozilla already has this solution deployed in our Styleguide site (<http://www.mozilla.org/en-US/styleguide/>), but I've included a mock up of how the menu would look for the Build section of Devhub for additional reference, based on the redesigned sitemap.
