## Fix slowness, crashing, error messages and other problems

### [Reset Firefox – easily fix most problems](#)

When troubleshooting Firefox problems, resetting user preferences can be helpful in pinpointing the issue. This article explains how to do it.

### [Unblock Firefox from connecting to the Internet](#)

### [Uninstall Firefox from your computer](#)

This article describes how to remove the Firefox application from your computer and also how to remove the personal information that Firefox stores.

### [Navigation buttons like back, home, bookmarks and reload are missing](#)

If these or other Firefox toolbar items are missing, this article will show you how to restore them.

### [Firefox won't save settings or remember information](#)

### [Firefox repeatedly opens empty tabs or windows after you click on a link](#)

This article covers a number of fixes you can try if this happens to you.

### [Fix printing problems in Firefox](#)

Learn how to troubleshoot and fix printing problems in Firefox.

### [Reset your Master Password if you've forgotten it](#)

You can reset your Firefox master password if you've forgotten it, however, this will remove all of your saved usernames and passwords. Learn how to do it.

### [Procedures to diagnose and fix problems](#)

### [Stop Firefox from opening multiple tabs when it starts](#)

A pipe character in the address of a home page can cause unexpected results when Firefox opens. This article explains how to fix that.

### [Firefox is stuck in Safe Mode](#)

If you started Firefox in Safe Mode, it will remain in Safe Mode until Firefox is completely closed. Just restart your computer to fix.
