Grovo Cheat Sheet

Lesson: What is Firefox?

Course: Firefox for Windows

Description: Free, fast web browser

Lesson Overview

Discover Mozilla's browser and some of its key capabilities.

- Firefox is fast, works with many different types of websites and is intuitively designed.
- Your browser is arguably the most important piece of software on your computer because it connects you
 to the Internet.
- With a browser you can use Web applications without installing anything, and it helps keep your computer safe from things like malware and viruses.

Glossary terms in this Lesson

Browser: A program through which one navigates the Internet.

Internet Explorer: A Web browser developed by the Microsoft Corporation and included with the Microsoft Windows operating system.

Malware: Malicious software; a type of software that infiltrates a computer without permission and causes unwanted problems.
