

Policy Analysis Query - 'access to releng servo networks'

Generated on Wed, 27 Nov 2013, 10:15:05 by Michal Purzynski

Report Time: Wed, 27 Nov 2013, 10:15:05

Note: This query uses Topology Intelligence to show all of the possible paths of traffic that are relevant to the selected policies.
All queries use the latest Topology information, even for historical queries.

Query Parameters

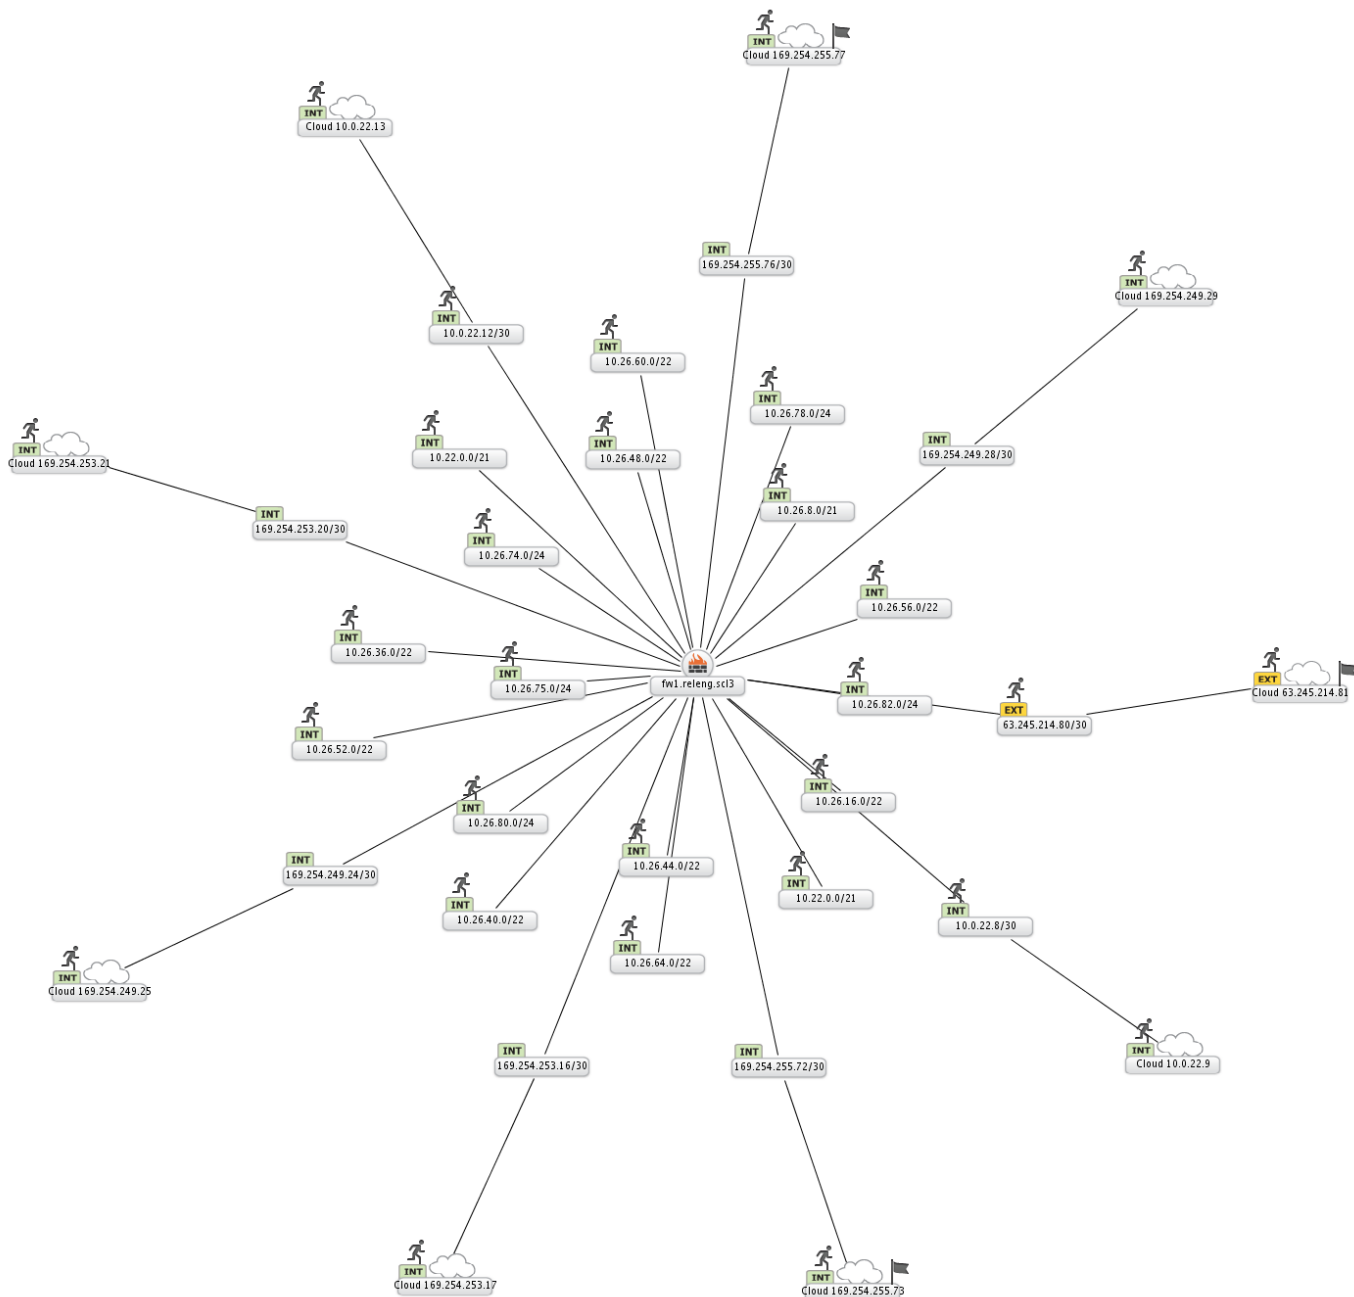

Targets: fw1.releng.scl3/Automatic by topology
Source: 8.8.8.8/255.255.255.255, 10.0.0.0/255.0.0.0, 63.245.208.0/255.255.240.0
Destination: 10.134.0.0/255.255.0.0
Service: Any
Applications: Any
Users: Any
Rule Action: Allow
Shadowing: Partially shadowed or Unshadowed

Juniper SRX, J-series - fw1.releng.scl3

Policy Package: Standard

Revision:

Revision	Action	Date	Time	Date on Device	Time on Device	Administrator	Installed On	GUI Client	Audit Log	Policy Package	Global Policy	Ticket ID
91	 Automatic	Tue, 26 Nov 2013	14:01:28	Tue, 26 Nov 2013	14:01:10	xionox		-	-	Standard		

59 out of 2059 rules match the query:

Notes:

1. The result contains one or more 'Partially Shadowed' rules.
See [below](#) for more details.

Notes

[top](#)

1. Partially Shadowed rules:
A rule is considered to be partially shadowed by a previous rule if some of the traffic included in both the rule and the query is handled by the previous rule.
