

Hello.

We are Mozilla Webmaker — a global community of friendly humans on a mission to help understand the web by actively creating it. We believe digital literacy is a vital skill like reading, writing or math so we build tools that allow regular people to tinker with the inner workings of the web.

Our goal: encourage millions of people around the world to move beyond using the web to making it.

What exactly is a Webmaker?

Anyone who makes something using the open building blocks of the web. If you're uploading photos or videos, posting to a blog or using social media, you've already taken the first step. We encourage you to go further by creating a **Make**. That's our term for anything you create from scratch or remix that links back to the web. [Popcorn Maker](#) and [Thimble](#) are tools we developed to help you get started.

This quote is TBD. It might (and probably will) sprawl across multiple lines.

– [Meredith Stewart](#), teacher

Meet the Webmakers

Why is Mozilla Doing This?

We're a non-profit organization with a [mission](#) to change the world by bringing diverse people together to create dynamic new web projects, technology and approaches to learning. We're passionate about the public potential of the web and want to empower people to design and build its future.

What does this project do?

> Tools

We design authoring tools and software with our community. Supercharging web video with Popcorn Maker or creating and remix web pages with Thimble.

> Guides

We create starter projects, how-to guides and teaching kits to inspire people at every skill level to create on the web and share their knowledge with others.

> Community

We bring together people with diverse skills and backgrounds like teachers, filmmakers, journalists and hackers to collaborate online and at events around the globe.

With support from our gracious partners and Mozillians like you!
