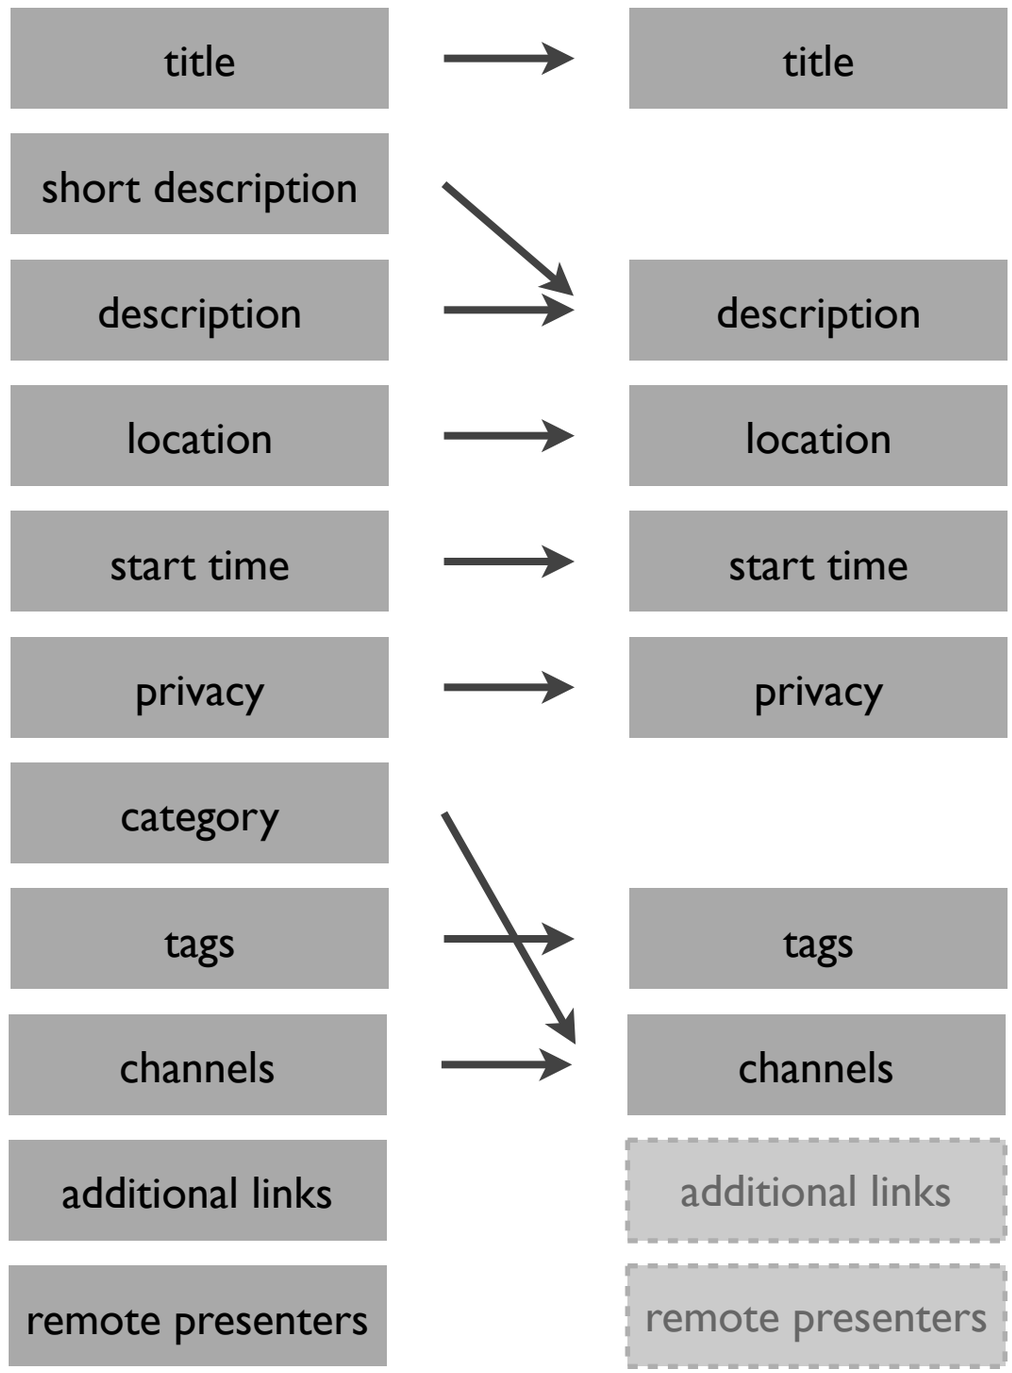
A great description of this awesome video. A great description of this awesome video. A great description of this awesome video.

Remove input field redundancies.

If perceivably redundant or not necessary, remove.
Go from 11 to 7 input fields.



Single page creation.

Change to single page for putting content on Air Mozilla.

Adjust prompts.

Change user interaction with prompts: less text, visual differentiation and in line with input.

Eliminate summary page.

End on event page where user can edit if needed.

Set defaults.

Don’t require a photo for events. Make option later.

Smart form future events.

If event is in the future, remove file upload in form.

Video upload feedback.

Separate page for video upload progress.

#1 (Screen): New Video

Enter video information.

Completion

Skip summary pages and show video page.
