The screenshot shows the Windows Task Manager window with the 'Processes' tab selected. The window title is 'Task Manager'. The menu bar includes 'File', 'Options', and 'View'. Below the menu bar are tabs for 'Processes', 'Performance', 'App history', 'Startup', 'Users', 'Details', and 'Services'. The main area displays a table of running processes, categorized into 'Apps (5)' and 'Background processes (35)'. The table has columns for Name, Status, CPU, Memory, Disk, and Network. The 'Apps (5)' section includes Firefox (32 bit) (2), Task Manager, Thunderbird (32 bit), Winamp (32 bit), and WordPerfect X6 (32 bit). The 'Background processes (35)' section includes Adobe Acrobat Update Service (32 bit), Adobe Flash Player 14.0 d0 (32 bit), Adobe Flash Player 14.0 d0 (32 bit), Conexant Audio Message Service, Conexant High Definition Audio Filter Agent, CyberLink YouCam Tray (32 bit), and ETD Control Center. At the bottom left, there is a 'Fewer details' button, and at the bottom right, there is an 'End task' button.

After clicking on video, it played completely, and in full screen.

After playing video all the way through, Firefox has frozen. As I type this, Windows is switching every 10 seconds from WordPerfect to Firefox without my intervention.
