

This is a document page, saved as .doc with the exact footer I used in the original file. I used the same font, color and size.

Here is the hoplink I created the hyper link with”:

<http://skip1343.jamorama.hop.clickbank.net?page=4>

I saved it as a .pdf and got the same broken link.

Now here is the cloaked link I used:

[Learn To Jam With The Best!](#)
[This Is The cloaked link Hyperlink](#)
