Tabelle1

60	AAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAA#
89	xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx**?**

text in row 1 is shown in print preview, even if it does not fit in normal view.

text in row 2 is not shown in print preview (and not printed) from char **?** To **#**
a workaround is to use the shrink to fit cell option from format cells dialog
or enable use print metric – but this option is not saved with the document.
this is different from writer, where PrinterIndependentLayout is saved in settings.xml.
