

The screenshot shows the 'Fields' dialog box with the 'Variables' tab selected. The 'Type' list on the left contains items like 'Set variable', 'Show variable', 'DDE field', etc., with 'User Field' highlighted. The 'Selection' list in the center shows a scrollable list of field names, with 'activitylogs\_hosting\_server\_r...' currently selected. The 'Format' list on the right includes 'Text' (which is selected), 'Formula', 'General', and numerical formats. At the bottom, there's a 'Name' input box containing 'activitylogs\_hosting\_server\_r...' and a 'Value' input box containing 'activitylogs', along with 'Insert', 'Close', and 'Help' buttons.

I would like to receive information about your products and services.

The screenshot shows the 'Fields' dialog box with the 'Variables' tab selected. The 'Type' list includes options like 'Set variable', 'Show variable', 'DDE field', etc., with 'User Field' highlighted. The 'Selection' list shows a list of database fields, with 'DB\_Alpha\_Admin\_Id' highlighted. The 'Format' list includes 'Text' (selected), 'Formula', 'General', and numeric formats. Below the lists are 'Name' and 'Value' fields; 'Name' is 'D' and 'Value' is 'db2inst1'. At the bottom are 'Insert', 'Close', and 'Help' buttons.

Type in the letter "B". Notice how the **value** text box is now in synch with the highlighted field name in the **Selection** list.

This screenshot shows the 'Fields' dialog box with the 'Variables' tab selected. The 'Type' list includes options like 'Set variable', 'Show variable', 'DDE field', etc., with 'User Field' highlighted. The 'Selection' list shows a list of database fields, with 'DB2\_Alpha\_part01\_Filename' highlighted. The 'Format' list includes 'Text' (selected), 'Formula', 'General', and numeric formats. Below the lists are 'Name' and 'Value' fields; 'Name' is 'B' and 'Value' is 'db2inst1'. At the bottom are 'Insert', 'Close', and 'Help' buttons.

The screenshot shows the LibreOffice Writer 'Variables' dialog box. The 'Type' tab is selected, displaying a list of variable types: Set variable, Show variable, DDE field, Insert Formula, Input field, Number range, Set page variable, Show page variable, and User Field. The 'User Field' option is highlighted with a blue selection bar. The 'Selection' tab is active, showing a dropdown menu with various variable names such as activitylogs\_hosting\_server, activitylogs\_PC\_share\_point, etc. The 'Format' tab is also visible, showing options like Text, Formula, General, and various number formats. Below the tabs, there are 'Name' and 'Value' text input fields, both currently empty. At the bottom right are buttons for 'Insert', 'Close', and 'Help'.
