

Portable Fire Extinguishers

Ten Tips to Follow:

1. Most fires start small and can be brought under control with the correct fire extinguisher in the first 2 minutes of the fire.
2. Fire extinguishers are listed and labeled for the fires they can handle. The higher the number the bigger the fire. Keep in mind that higher rated extinguishers are often much heavier.
3. Be sure everyone is out of the area and that you won't be trapped by the fire.
