

1 First level outline

1.1 Second Level Outline

1.1.1 __construct()

This function is called when the class is instantiated (which is just a big word for created).
When you do the following:

```
$ebiz = new class_ebiz();
```

This is unnumbered text

1.1.1.1 Fourth level Outline

1.1.1.1.1 Fifth Level Outline

__construct()

This function is called when the class is instantiated (which is just a big word for created).
When you do the following:

```
$ebiz = new class_ebiz();
```
