

# Navigator — AOO Writer & AOO Calc

Two blank (new) files in AOO Writer and AOO Calc. Launch Navigator: menu 'View – Navigator' or F5

## 1. AOO Writer

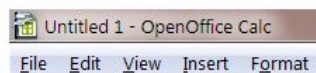

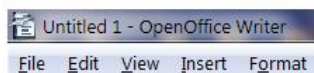

- In context menu there is no space between the name of a file and wording "(active)".
- In drop-down list there is due space. Moreover inactive item has wording "(inactive)", not present in the context menu.

## 2. AOO Calc

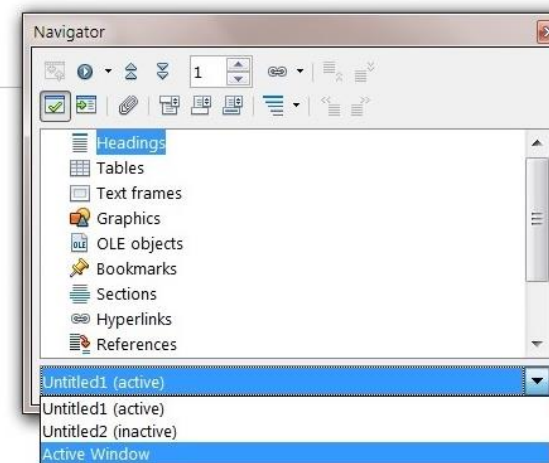

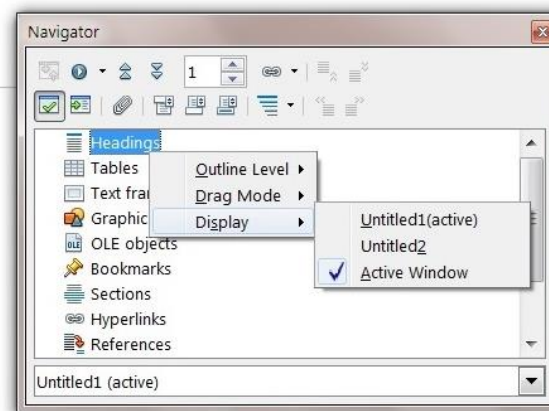

- No discrepancy between context menu and drop-down list.
- Notice missing accelerator keys in context menu (in contrast to context menu in AOO Writer).

## 3. Famous/Infamous file name "Untitled"

This is somehow not surprising. Navigator in context menu and in drop-down list shows a file name without space e.g. "Untitled1", whereas in the title bar of a document's window — one sees a file name with space i.e. "Untitled 1".
