Troubles with Asian fonts in the calc chart

In this article, there are two problems described. The latter is more serious.

- The default font for Calc charts ignore the default settings for normal cells.
 issue 82456 and issue 85934
- Can't change the Asian fonts in Calc carts. issue 86579

Default setting and cells

• Fonts for "default" setting is Sans-Serif.

Cell Style: Default			×		
Backgro Organizer Numbers			Protection sian Typography Borders		
Western text font — <u>F</u> ont Arial	Typeface	Size	Language PS English (USA)		
Asian text font F <u>o</u> nt MS Pゴシック	Typeface ▼ 標準 ▲	S <u>i</u> ze	Language Japanese 💌		
"MS P Gothic" (Sans-Serif font)					
Arial					
The same font will be used on both your printer and your screen.					
	OK Cancel	Help	<u>R</u> eset <u>S</u> tandard		

Example

•	
	2005年12月期
Product その1	1,234
Product その2	395
Product その3	802
合計(total)	2,431

Normal cells looks properly.

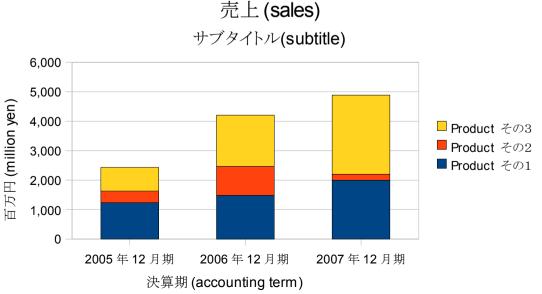

Default setting and charts

• Once you make a chart, fonts are strange.

Title	×				
Borders Area Transparency Characters Font Effects Alignment					
Western text font Font Typeface Size Language Albany Regular 13 T	-				
Asian text font Font Typeface Size Language Andale Sans UI ▼ Regular ▼ 13 ▼ ▼					
This font has not been installed. The closest available font will be used. OK Cancel Help Res					
	(million yen)				

This problem has been reported as issue 82456 and issue 85934.

- This is the property of "Title" of the chart.
- I don't have "Albany" nor "Andale Sans UI".
- Additionally, Language settings have gone.

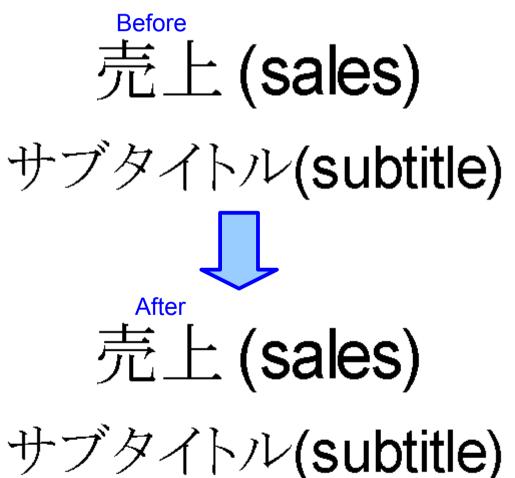

Changing the fonts, but...

• After changing the fonts for the "Title", I still see the same view.

Title		×			
Borders Area Transparency	Characters Font Effects	Alignment			
Western text font <u>F</u> ont Arial	<u>T</u> ypeface <u>S</u> ize Regular ▼ 13 ▼	Language			
Asian text font F <u>o</u> nt MS Pゴシック	Typeface Size 標準 ▼ 13 ▼	Language			
"MS P Gothic" (San-Serif font)					
Arial					
The same font will be used on both your printer and your screen.					
OK Cancel <u>H</u> elp <u>R</u> eset					

It seems nothing has changed. Japanese characters should appear with Sans-Serif font, but they don't.

Changing the fonts again

It seems I have no way to change the looks for Asian fonts...

Title Borders Area Transparency Characters Font Effects Alignment	売上(sales)
Western text font Font	
Impact Regular 13	
Asian text font Font Typeface Size Language AR丸ゴシック体E I Regular I 13 I	サブタイトル(subtitle)
	After
4.208	一 売 上 (sales)
The same font will be used on both your printer and your screen.	
OK Cancel <u>H</u> elp <u>R</u> eset	サブタイトル(subtitle)
It seems only the Western text font affects.	
With this setting, the title should look like	

this!

売上[sales]
