

To assign a script to a new menu entry

1. Choose **Tools - Customize**, and click the **Menus** tab.
2. Click **Add**.
3. In the **Category** list box, scroll down and open the "OOo-dev Macros" entry.
4. You see entries for "OOo-dev Macros" (scripts in the share directory of your OOo (scripts in the user directory), and the current document. Open any one of them languages.
5. Open any scripting language entry to see the available scripts. Select a script.
6. A list of the script functions appears in the **Functions** list box. Select a function.
