

# ICE toolbar OpenOffice.org extension

## Download and install the extension

1. **Download** the ICE toolbar extension: [ice-toolbar.oxt](#)
2. Save file to your Desktop - Save Target As (Internet Explorer) or Save Link As (Firefox) to your Desktop.
3. **Start** OpenOffice.org **Writer**.
4. From **Menu**, select **Tools > Extension Manager**
5. Click the **Add** button.

6. Browse to the Desktop
7. Select **ice-toolbar.oxt** and click **Open**.

8. Choose **For all users**.

9. Click **Close**.

**Note:** If the toolbar doesn't work, try restarting OOo Writer.

## Assign a short cut

To make use of the ICE style short cuts, assign the **Esc** key as the trigger.

1. From the **Menu**, select **Tools > Customize** then select the **Keyboard** tab.
2. From the **Category** section, **Expand OpenOffice.org Macros > Expand Share > Expand ICE Library > Select Toolbar**.
3. From the **Function** section, select **eventKeyControl**.
4. From the **Shortcut keys** section, select **Esc** then click the **Modify** button.

5. Click the **OK** button.

## Update the extension

Use this process if an ICE Toolbar was previously installed.

1. **Start** OpenOffice.org **Writer**.
2. From the **Menu**, select **Tools > Extension Manager**.
3. Click the **Check for Updates** button.
4. If there is a new version listed in Available Extension Updates, select **ICE Toolbar**.
5. Click the **Install** button.
6. Installation should work with no errors, click **OK**.
7. **Close** the Extension Manager.
