Choose the style of OpenOffice.org Help.

Open/Save dialogs

Use OpenOffice.org dialogs

Specifies whether OpenOffice.org dialogs are used to open and save documents. Otherwise the dialogs of the operating system are used.

When you open a file by an URL from the Windows file dialog, Windows will open a local copy of the file, located in the Internet Explorer cache. The OpenOffice.org file dialog opens the remote file.

The OpenOffice.org dialogs for opening and saving documents are described in OpenOffice.org Help.
