

Java (1991/1995)

- General purpose object-oriented programming language, targeted at virtual machines.

```
public class Hello {  
    public static void main(String[] args) {  
        System.out.println("Hello World");  
    }  
}
```

- Very well suited for writing small system components (applets) that can be embedded in other applications, like web browsers and mobile phones.
