Caseroom
Legal Document Management System

AcuLearn's Caseroom is a secure cloud based document management service that allows you to mark up, preview, tag, search, export and share documents.

Caseroom is built on Amazon Web Services, the world's most advanced and secure cloud. Upload your custodian files and folders into Caseroom and let it manage your documents with ease.

No More Long Waiting Time For Documents To Convert

Once your documents (PDF, PST, EML, MSG, PPTX, DOCX, XLSX, TIFF, JPG, GIF, PNG etc) are uploaded to Caseroom, the powerful conversion engine will quickly process your documents within seconds.

Extract PST

PST is processed according to your folder format.
The folders and their respective emails are in the exact order so you will no longer have any problems looking for the right email.
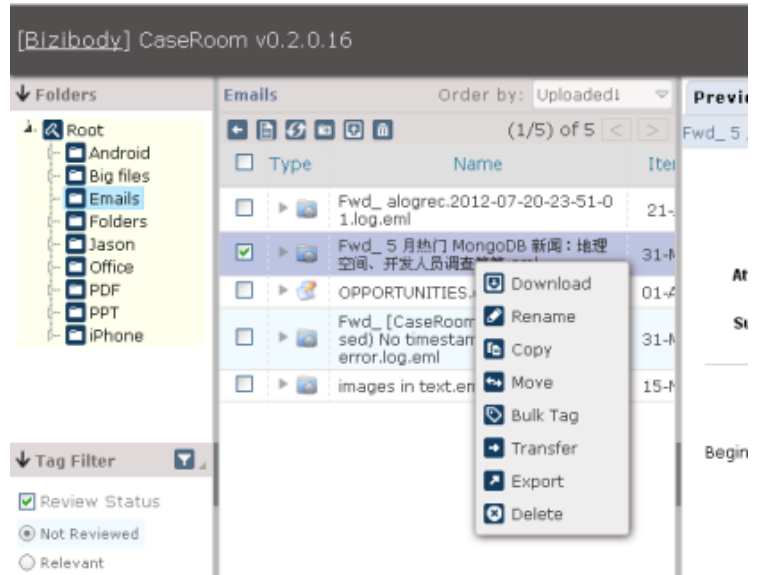

Preview, Tag and Search

The moment your documents are uploaded to Caseroom, you will be able to preview and tag your documents with ease.
You can search your documents easily using the system search engine and if necessary you can access more advance search capabilities to refine your search criteria.
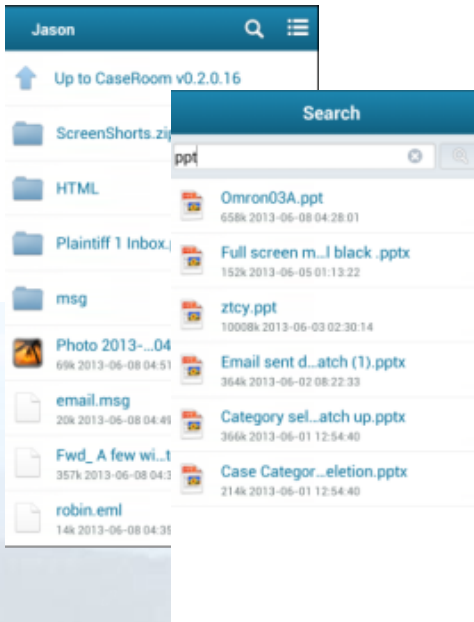

Simple And Familiar User Interface

Caseroom is built with the users ease of use in mind. Using HTML 5, Caseroom interface resembles the interface and mouse clicks of your computer operating system. For instance, "double click" to open and "right click" for properties and actions such as download, export, copy etc.
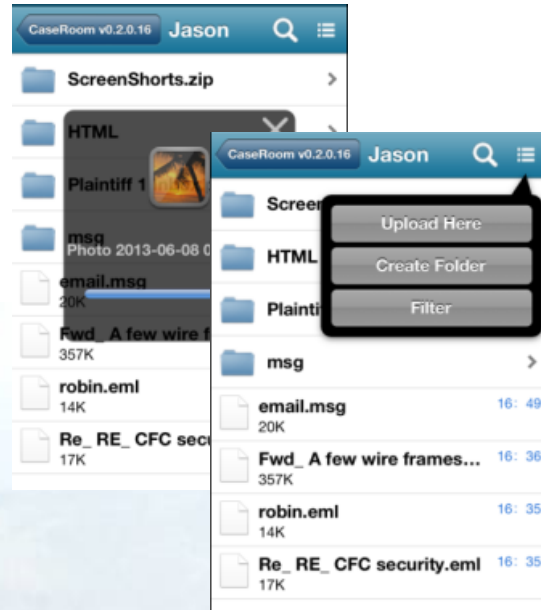

Caseroom On The Go

You can access your Caseroom using your iOS and Android devices.
These apps are designed so users are able access their documents with the ease of touch screen.
