

Ch 13 The Origin of Species, Evidence of Evolution p. 244-251

Ch 13 Natural Selection and Population Genetics p. 252-259

Ch 13 Problem Sets

Ch 13 Mechanisms of Evolution, Fitness, and Outcomes p. 260-265

Ch 14 Macroevolution and Speciation P. 270-277

Ch 14 Taxonomy p. 285-289

Ch 15 Major Episodes and 4 Stage Hypothesis

p. 294-298

Ch 15 Origin of Eukaryotes and Multicellular Life p,. 307, 311

Ch 18 Overview of Ecology and Adaptations

P. 374-379

Ch 18 Basic Biomes P. 384-386, Water Cycle P. 391

Ch 18 Human Impact and Global Climate Change P. 392-398

Ch 19 Populations and Density (No age structure) p. 404-405,

Ch 19 Population Growth Models P. 408-409

Ch 19 Regulation of Population Growth and Applications (No Biological control) p. 410-414; Human Population Growth P. 417, 419-420 (No age structures)

Ch 20 Loss of Biodiversity and Interspecific Relationships P. 426-432

Ch 20 Trophic Structure, Biological Magnification, Food Webs p. 432-434

Ch 20 Species Diversity and Succession, Energy Flow P. 435-439

Ch 20 Biogeochemical Cycles and Biodiversity

Hotspots P. 440-444
