RHEV Upgrade Helper

INFO (/LABS/INFO/RHEVUPGRADEHELPER) APPLICATION

This app is designed to help you upgrade your RHEV to a newer version. You just need to provide information about your upgrade path. We will not only present you the steps to upgrade your RHEV, but also some steps to prevent known issues specific to your upgrade scenario.

- RHEV Upgrade Options
- Environment Checks
- Prepare Your Environment
- **Upgrade RHEV**

Upgrade RHEV

- **Step 1 : Enable the RHEV 3.5 repository in your yum configuration.**

```
# yum-config-manager --enable rhel-6-server-rhev-3.5-rpms
```
- **Step 2 : Update the rhvm-setup package to ensure you have the most recent version of engine-setup.**

```
# yum update rhvm-setup
```
- **Step 3 : Run the engine-setup command to upgrade Red Enterprise Virtualization Manager.**

```
# engine-setup
```
- **Step 4 : Disable the old RHEV 3.4 repository in your yum configuration**

```
# yum-config-manager --disable rhel-6-server-rhev-  
3.4-rpms
```

- **Step 5 : Run the following command to ensure all packages are up to date**

```
# yum update
```

- **Step 6 : Restart ovirt-engine service to make changes take effect**

```
# service ovirt-engine restart
```
