Default on login is useful to reduce the info that the user will be exposed to:

The screenshot shows the 'Create User' page in Red Hat Satellite, specifically the 'Locations' tab. The left sidebar contains navigation links: Monitor, Content, Containers, Hosts, Configure, Infrastructure, Insights, and Administer. The top header displays 'Red Hat Satellite', the organization 'acme', and the location 'Any Location'. The 'Locations' tab is active, showing a list of 'All items' (empty) and a 'Selected items' list containing 'washington'. A 'Default on login' dropdown is set to 'washington'. At the bottom are 'Submit' and 'Cancel' buttons.
