

Summary

SELinux is preventing /sbin/ip (ifconfig_t) "write" to pipe:[24210] (unconfined_t).

Detailed Description

SELinux denied access requested by /sbin/ip. It is not expected that this access is required by /sbin/ip and this access may signal an intrusion attempt. It is also possible that the specific version or configuration of the application is causing it to require additional access.

Allowing Access

You can generate a local policy module to allow this access - see <http://fedora.redhat.com/docs/selinux-faq-fc5/#id2961385> Or you can disable SELinux protection altogether. Disabling SELinux protection is not recommended. Please file a http://bugzilla.redhat.com/bugzilla/enter_bug.cgi against this package.

Additional Information

Source Context	system_u:system_r:ifconfig_t
Target Context	system_u:system_r:unconfined_t
Target Objects	pipe:[24210] [fifo_file]
Affected RPM Packages	iproute-2.6.16-6.fc6 [application]
Policy RPM	selinux-policy-2.4.5-3.fc6
Selinux Enabled	True
Policy Type	targeted
MLS Enabled	True
Enforcing Mode	Enforcing
Plugin Name	plugins.catchall
Host Name	fernandesg2.sportex.com
Platform	Linux fernandesg2.sportex.com 2.6.18-1.2849.fc6 #1 SMP Fri Nov 10 12:36:14 EST 2006 i686 i686
Alert Count	1
Line Numbers
