

Glyphs for some Romanian diacritics in various fonts

IMPORTANT

Please note that, due to a historical bug, four Romanian glyphs are rendered incorrectly by the vast majority of Unicode fonts:

- incorrect "T with cedilla below" (Unicode 0162) instead of correct "T with comma below" (Unicode 021A)
- incorrect "t with cedilla below" (Unicode 0163) instead of correct "t with comma below" (Unicode 021B)
- incorrect "S with cedilla below" (Unicode 015E) instead of correct "S with comma below" (Unicode 0218)
- incorrect "s with cedilla below" (Unicode 015F) instead of correct "s with comma below" (Unicode 0219)

Glyphs with cedilla-below does not exist in Romanian language.
