

Summary:

SELinux is preventing ck-get-x11-serv (consolekit_t) "connectto" unconfined_notrans_t.

Detailed Description:

SELinux denied access requested by ck-get-x11-serv. It is not expected that this access is required by ck-get-x11-serv and this access may signal an intrusion attempt. It is also possible that the specific version or configuration of the application is causing it to require additional access.

Allowing Access:

You can generate a local policy module to allow this access - see FAQ (<http://fedora.redhat.com/docs/selinux-faq-fc5/#id2961385>) Or you can disable SELinux protection altogether. Disabling SELinux protection is not recommended. Please file a bug report (http://bugzilla.redhat.com/bugzilla/enter_bug.cgi) against this package.

Additional Information:

Source Context	system_u:system_r:consolekit_t:s0-s0:c0.c1023
