SelinuxTroubleshootd Log Entry

SELinux denied access requested by wine-preloader. It is not expected that this access is required by wine-preloader and this access may signal an intrusion attempt.

----- Comment #1 From [Juan Lang](#) 2008-10-10 13:18:07 -----

In fact, Wine needs to be able to mmap address 0, and this is a misconfiguration of SELinux, not something Wine can "fix."

----- Comment #2 From [James Hawkins](#) 2008-10-10 13:59:46 -----

Closing.

----- Comment #3 From [Alexandre Julliard](#) 2008-11-03 05:15:05 -----

*** [Bug 15897](#) has been marked as a duplicate of this bug. ***
