Making device-mapper control node
md: md0: raid array is not clean -- starting background reconstruction
mdadm: /dev/md0 has been started with 2 drives.
Scanning logical volumes
  Reading all physical volumes.  This may take a while...
  Found volume group "vg_main" using metadata type lvm2
Activating logical volumes
  5 logical volume(s) in volume group "vg_main" now active
Attempting to enter user-space to capture vmcore
Creating root device.
Checking root filesystem.
fsck 1.38 (30-Jun-2005)
fsck: WARNING: couldn't open /etc/fstab: No such file or directory
e2fsck 1.38 (30-Jun-2005)
fsck.ext3: while determining whether /dev/vg_main/lv_root is mounted.
/dev/vg_main/lv_root: recovering journal
/dev/vg_main/lv_root: clean, 115195/4194304 files, 1314895/4194304 blocks
Mounting root filesystem.
Trying mount -t ext3 /dev/vg_main/lv_root /sysroot
Using ext3 on root filesystem
Switching to new root and running init.
INIT: version 2.86 booting
