[Mark as Duplicate](#)

Tim Waugh 2011-01-26 10:53:24 EST [Description](#) **Private** [\[reply\]](#) [-]

Description of problem:
When trying to print the first and third pages of a web page, all three pages are printed out.

Version-Release number of selected component (if applicable):
firefox-3.6.13-1.fc14.x86_64
gtk2-2.22.0-1.fc14.1.x86_64

How reproducible:
100%

Steps to Reproduce:
1. Visit a web page.
2. File->Page Setup... and choose Landscape
3. Print Preview and see that it would be three pages of output, and decide to print only the first and last.
4. File->Print..., select "Pages:" and enter "1,3" into the entry box. (In my case I also selected "Short Edge (Flip)" in the One-Sided option in Page Setup.)
5. Click Print.

Actual results:
Extra page printed. Wasted paper, ink, time.

Expected results:
Job printed as directed.

Additional info:
Printing the document to a file and then printing that file from the command line works fine:

```
lp -dBen -o Duplex=DuplexTumble -P 1,3 file.pdf
```

showing the the problem is not with CUPS.
